**International Handbook of Educational Policy** Nina Bascia,Alister Cumming,Amanda Datnow,Kenneth Leithwood,David Livingstone,2008-05-14 Nina Bascia Alister Cumming Amanda Datnow Kenneth Leithwood and David Livingstone This Handbook presents contemporary and emergent trends in educational policy research in over fty chapters written by nearly ninety leading researchers from a number of countries It is organized into ve broad sections which capture many of the current dominant educational policy foci and at the same time situate current understandings historically in terms of both how they are conceptualized and in terms of past policy practice The chapters themselves are empirically grounded providing illustrations of the conceptual implications c tained within them as well as allowing for comparisons across them The se re exivity within chapters with respect to jurisdictional particularities and c trasts allows readers to consider not only a range of approaches to policy analysis but also the ways in which policies and policy ideas play out in di erent times and places The sections move from a focus on prevailing policy tendencies through increasingly critical and outsider perspectives on policy They address in turn the contemporary strategic emphasis on large scale reform substantive emphases at several levels on leadership and governance improving teacher quality and conceptualizing learning in various domains around the notion of literacies and concluding nally with a contrasting topic workplace learning which has had less policy attention and thus allows readers to consider both the advantages and disadvantages of learning and teaching under the bright gaze of policy

**Effective Assessment and the Improvement of Education** Roger Murphy,Patricia Broadfoot,2017-09-29 Originally published in 1995 this volume brings together twenty classic contributions from the work of Desmond Nuttall as an educational researcher thinker and policy adviser A full commentary by two of his former colleagues who knew him well accompanies the text They have set out to explain and explore the essence of his contribution to others

Much in the book is as relevant today as when the articles were written put together they form a formidable collection The book was published in the year after Desmond s death It is hoped it will remain a fitting tribute to him It will remind his friends of his classic ideas and brings together in one volume contributions that students of education may have missed

International Perspectives in Educational Effectiveness Research James Hall,Ariel Lindorff,Pamela Sammons,2020-08-10 This edited volume explores questions about what works how for whom when and why in education and considers how and to what extent such knowledge can be understood and extended across countries and different educational systems The book starts by presenting an overview of the history of educational effectiveness research and offers examples of current theories of educational effectiveness Next it provides exemplars of effectiveness studies that report on educational systems policies and practices from across six continents These studies vary in their research methods and outcomes illustrating a field of research that is conscious of its origins its agenda and its ambition to understand and improve the functioning of schools networks and education systems around the world The book brings these threads together within the final chapter and uses them to signpost directions for future research International Perspectives in Educational Effectiveness Research is an excellent and timely addition to the educational effectiveness literature It offers a rigorous and insightful range of international perspectives that will be of interest to researchers policy makers and students of the field Professor Christopher Chapman University of Glasgow UK President Elect of the International Congress for School Effectiveness and Improvement This important new volume brings up to date the contributions of educational effectiveness research to the development of policy and practice in the field over the last 50 years Drawing together the ideas of many of the major researchers in the field it provides a comprehensive analysis of these earlier contributions leading to critical commentaries that point to areas for future attention The editors make use of expertise from a range of disciplines to strengthen the themes that are addressed Most importantly the book emphasises the need to pay greater attention to the challenge of equity arguably the most significant challenge facing education systems internationally In this respect a particular strength of the book is the accounts provided from many different parts of the world These underline the importance of context a factor often previously overlooked in this field of research Given all of this I have no doubt that International Perspectives in Educational Effectiveness Research will become a major source for practitioners policy makers and researchers Professor Mel Ainscow Emeritus Professor of Education University of Manchester Professor of Education University of Glasgow UK The International Handbook of Educational Research in the Asia-Pacific Region J.P. Keeves,Ryo Watanabe,2013-11-11 The aim of the Handbook is to present readily accessible but scholarly sources of information about educational research in the Asia Pacific region The scale and scope of the Handbook is such that the articles included in it provide substantive contributions to knowledge and understanding of education in the Asia region In so doing the articles present the problems and issues facing education in the region and the findings of research conducted within the region that contribute to the resolution of

these problems and issues Moreover since new problems and issues are constantly arising the articles in the Handbook also indicate the likely directions of future developments The different articles within the Handbook seek to conceptualize the problems in each specific content area under review provide an integration of the research conducted within that area the theoretical basis of the research the practical implications of the research and the contribution of the research towards the resolution of the problems identified Thus the articles do not involve the reporting of newly conducted research but rather require a synthesis of the research undertaken in a particular area with reference to the research methods employed and the theoretical frameworks on which the research is based In general the articles do not advocate a single point of view but rather present alternative points of view and comment on the debate and disagreements associated with the conduct and findings of the research Furthermore it should be noted that the Handbook is not concerned with research methodology and only considers the methods employed in inquiry in so far as the particular methods of research contribute to the effective investigation of problems and issues that have arisen in the conduct and provision of education at different levels within the region
