Making Of A Modern Japanese Architecture:

The Making of a Modern Japanese Architecture David B. Stewart, 2002 This is a definitive history of the rise and evolution of modernism in Japanese architecture Illustrated with over 400 photographs the study explores the influence of 20th century Western architectural ideas on the development of Japan's urban landscapes

The Making of a Modern Japanese Architecture David B. Stewart, 1987 This text explores the rise of modern architecture in Japan since 1868 and the interaction between tradition and innovation East and West

Making of a modern Japanese architecture; 1868 to the present D.B. Stewart, *Frank Lloyd Wright and Japan* Kevin Nute, 2000 Looks at Wright's formal and philosophical debt to Japanese art and architecture Eight areas of influence are examined in detail from Japanese prints to specific individuals and publications and are illustrated with text and drawn analyses

Contemporary Japanese Architecture James Steele, 2017-03-16 Contemporary Japanese Architecture presents a clear and comprehensive overview of the historical and cultural framework that informs the work of all Japanese architects as an introduction to an in depth investigation of the challenges now occupying the contemporary designers who will be the leaders of the next generation It separates out the young generation of Japanese architects from the crowded distinguished multi generational field they seek to join and investigates the topics that absorb them and the critical issues they face within the new economic reality of Japan and a shifting global order Salient points in the text are illustrated by beautiful descriptive images provided by the architects and from the extensive collection of the author By combining illustrations with timelines and graphics to explain complex ideas the book is accessible to any student seeking to understand contemporary Japanese architecture

Materials and Meaning in Contemporary Japanese Architecture Dana Buntrock, 2013-09-13 In this beautiful and perceptive book Dana Buntrock examines for the first time how tradition is incorporated into contemporary Japanese architecture Looking at the work of five architects Fumihiko Maki Terunobu Fujimori Ryoji Suzuki Kengo Kuma and Jun Aoki Buntrock reveals the aims influencing many wonderful works barely known in the West the sensual side of Japanese architecture borne out of approaches often less concerned with professionalism than with people and place The buildings described in this book illustrate an architecture that embraces uniqueness expressing unusual stories in the rough outlines of rammed earth and rust and demonstrating new paths opening up for architectural practice today For some these examples will offer new insight into expressions of tradition in Japanese architecture for others this book offers inspiration for their own efforts to assert the unique heritage of other regions around the world Compelling insightful and groundbreaking this book is essential for everyone studying Japanese architecture and anyone trying to invoke narrative and tradition in contemporary design

Imaginary Athens Jin-Sung Chun, 2020-11-25 This book comprehensively examines architecture urban planning and civic perception in three modern cities as they transform into national capitals through an entangled transnational process that involves an imaginative geography based on embellished memories of classical Athens Schinkel's classicist architecture in Berlin especially the

principle of tectonics at its core came to be adopted effectively at faraway cities in East Asia merging with the notion of national polity as Imperial Japan sought to reinvent Tokyo and mutating into an inevitable reflection of modern civilization upon reaching colonial Seoul all of which give reason to ruminate over the phantasmagoria of modernity **Kenzo Tange and the Metabolist Movement** Zhongjie Lin, 2023-08-31 Amid Japan's political turbulence in 1960 seven architects and designers founded Metabolism to propagate radical ideas of urbanism Kenzo Tange's Plan for Tokyo 1960 further celebrated urban expansion as organic processes and pushed city design to an unprecedented scale Metabolists' visionary schemes of the city gave birth to revolutionary design paradigms which reinvented the discourse of modern Japanese architecture and propelled it through the years of Economic Miracle to a global prominence Their utopian concepts which often envisaged the sea and the sky as human habitats of the future reflected fundamental issues of cultural transformation and addressed environmental crises of the postindustrial society This new edition expands Zhongjie Lin's pathbreaking account on Tange and Metabolism centered at the intersection of urbanism and utopianism The thorough historical survey from Metabolism's inauguration at the 1960 World Design Conference to the apex of the movement at Expo 70 and further to the recent demolition of Nakagin Capsule Tower leads to a definition of three Metabolist urban paradigms megastructure group form and ruins which continue to inspire experiments in architecture city design and conservation Kenzo Tange and the Metabolist Movement is a key book for architectural and urban historians architects and all those interested in avant garde design Japanese architecture and contemporary urbanism Traditional Japanese Architecture Mira Locher, 2012-04-17 By examining the Japanese history of buildings and building designs from prehistory to modern day lovers of Japan will develop a deeper understanding and appreciation of this island country Simplicity sensitivity to the natural environment and the use of natural materials are the hallmarks of Japanese architecture The Art of Japanese Architecture provides a broad overview of traditional Japanese architecture in its historical and cultural context It begins with a discussion of prehistoric dwellings and concludes with a description of modern Japanese buildings Important historical influences and trends notably the introduction of Buddhist culture from Korea and China the development of feudalism and the influence of modern Western styles of building are all discussed in detail as facets of Japanese design Through all of these changes a restrained architectural tradition developed in marked contrast to an exuberant tradition characterized by monumentality and the use of bold colors The book provides tremendous insights into the dynamic nature of Japanese architecture and how it reflects an underlying diversity within Japanese culture The book is profusely illustrated with over 370 color photographs woodblock prints maps diagrams and specially commissioned watercolors Modern Japan Louis G. Perez, R. W. Purdy, 2024-05-30 Organized by theme this comprehensive encyclopedia examines all aspects of life in Japan from geography and government to food and etiquette and much more Japan or the Land of the Rising Sun is home to more than 126 million people nearly 10 million of whom live in Tokyo alone How did this tiny island nation become such a powerhouse in the 21st century and where

will it go from here Modern Japan examines history and contemporary life through thematic entries organized into chapters covering such topics as geography history government and politics economy religion and thought social classes and ethnicity gender marriage and sexuality education language etiquette literature and drama art and architecture music and dance food leisure and sports and media and popular culture Each chapter contains an overview of the topic and alphabetized entries on examples of each theme A chronology covers from prehistoric times to the present and special appendices offer profiles of a typical day in the life of representative members of Japanese society key facts and figures about Japan and a holiday chart This volume is ideal for students researching Japan as well as general readers interested in learning more about the country

The Architecture of Landscape, 1940-1960 Marc Treib, 2002-10 The Architecture of Landscape 1940 1960 provides a groundbreaking collection of worldwide perspectives on a vital and underappreciated era of landscape architecture It is also the first critical assessment of this period with information and insight previously unavailable to English language readers

Constructing Empire Bill Sewell, 2019-02-15 Civilians play crucial roles in building empires Constructing Empire shows how Japanese urban planners architects and other civilians contributed often enthusiastically to constructing a modern colonial enclave in northeast China their visions shifting over time Japanese imperialism in Manchuria before 1932 developed in a manner similar to that of other imperialists elsewhere in China but the Japanese thereafter sought to surpass their rivals by transforming the city of Changchun into a grand capital for the puppet state of Manchukuo putting it on the cutting edge of Japanese propaganda Providing a thematic assessment of the evolving nature of planning architecture economy and society in Changchun Bill Sewell examines the key organizations involved in developing Japan's empire there as part of larger efforts to assert its place in the world order This engaging book sheds light on evolving attitudes toward empire and perceptions of national identity among Japanese in Manchuria in the first half of the twentieth century

An Introduction to Architectural Theory Harry Francis Mallgrave, David J. Goodman, 2011-03-16 A sharp and lively text that covers issues in depth but not to the point that they become inaccessible to beginning students An Introduction to Architectural Theory is the first narrative history of this period charting the veritable revolution in architectural thinking that has taken place as well as the implications of this intellectual upheaval The first comprehensive and critical history of architectural theory over the last fifty years surveys the intellectual history of architecture since 1968 including criticisms of high modernism the rise of postmodern and poststructural theory critical regionalism and tectonics Offers a comprehensive overview of the significant changes that architectural thinking has undergone in the past fifteen years Includes an analysis of where architecture stands and where it will likely move in the coming years

The Encyclopedia of Contemporary Japanese Culture Sandra Buckley, 2009 This encyclopedia covers culture from the end of the Imperialist period in 1945 right up to date to reflect the vibrant nature of contemporary Japanese society and culture

The Constructed Other: Japanese Architecture in the Western Mind Kevin Nute, 2021-09-30 The Constructed Other argues that the assumed otherness of Japanese architecture

has made it both a testbed for Western architectural theories and a source of inspiration for Western designers The book traces three recurring themes in Western accounts of Japanese architecture from the reopening of Japan in the mid nineteenth century to the present day a wish to see Western architectural theories reflected in Japanese buildings efforts to integrate elements of Japanese architecture into Western buildings and a desire to connect contemporary Japanese architecture with Japanese tradition It is suggested that together these narratives have had the effect of creating what amounts to a mythical version of Japanese architecture often at odds with historical fact but which has exercised a powerful influence on the development of building design internationally *A Global History of Architecture* Mark M.

Jarzombek, Vikramaditya Prakash, 2011-10-04 Praise for the First Edition Because of its exceptionally wide perspective even architectural historians who do not teach general survey courses are likely to enjoy and appreciate it *Annali d architettura* Not only does *A Global History of Architecture* own the territory of world architecture it pulls off this audacious task with panache intelligence and for the most part grace *Journal of the Society of Architectural Historians* Revised and updated the compelling history of the world's great architectural achievements Organized along a global timeline *A Global History of Architecture* Second Edition has been updated and revised throughout to reflect current scholarship Spanning from 3 500 b c e to the present this unique guide is written by an all star team of architectural experts in their fields who emphasize the connections contrasts and influences of architectural movements throughout history The architectural history of the world comes to life through a unified framework for interpreting and understanding architecture supplemented by rich drawings from the renowned Frank Ching as well as brilliant photographs This new Second Edition Delivers more coverage of non Western areas particularly Africa South Asia South East Asia and Pre Columbian America Is completely re designed with full color illustrations throughout Incorporates additional drawings by Professor Ching including new maps with more information and color Meets the requirements set by the National Architectural Accrediting Board NAAB for non Western architecture in history education Offers new connections to a companion Web site including Google Earth™ coordinates for ease of finding sites Architecture and art enthusiasts will find *A Global History of Architecture* Second Edition perpetually at their fingertips

Building in China Jeffrey W Cody, 2021-01-15 *Building in China* is about striking an architectural balance between the pull of monumental tradition and the push of technological novelty Centering on the dynamic period of post imperial and pre Communist China the book focuses on the building and city planning initiatives of Henry Murphy a little known American architect who initially ventured to China in 1914 to design a campus for the Yale in China programme but who then found himself captivated by a professional and cultural challenge that lasted two decades how to preserve China's rich architectural traditions while also designing new buildings using up to date Western technologies Murphy's buildings were compromises wine in old bottles as he once called them and the book uses those tales as lenses through which to understand not only Murphy's quest to find a middle ground for his architecture in China but also to gaze at a tumultuous

society facing an uncertain future Murphy's buildings were more than vessels for either aesthetic visions or technical expertise inadvertently they became political emblems as Chinese rulers such as Chiang Kai shek and Sun Yat sen's son called on Murphy for city planning advice to complement their hopes for urban reconstruction There are few serious studies of Western architects in the twentieth century who practiced in non Western contexts and those scant studies that have been published concentrate largely on British French or Dutch examples in colonial settings Hence the book makes significant contributions to the fields of both American and Chinese architectural history

Routledge Handbook of Japanese Culture and Society Victoria Bestor, Theodore C. Bestor, Akiko Yamagata, 2011-04-13 This Handbook is an interdisciplinary resource that focuses on contemporary Japan and the social and cultural trends that are important at the beginning of the twenty first century

Project Japan Graham Cooper, 2009 Project Japan is the product of a long journey by author Graham Cooper A sustained rolling programme relating to contemporary art and architecture in Japan this project involved over a decade of commitment more than a dozen research and documentation

Architecture and the Landscape of Modernity in China before 1949 Edward Denison, 2017-02-17 This book explores China's encounter with architecture and modernity in the tumultuous epoch before Communism an encounter that was mediated not by a singular notion of modernism emanating from the west but that was uniquely multifarious deriving from a variety of sources both from the west and importantly from the east The heterogeneous origins of modernity in China are what make its experience distinctive and its architectural encounters exceptional These experiences are investigated through a re evaluation of established knowledge of the subject within the wider landscape of modern art practices in China The study draws on original archival and photographic material from different artistic genres and architecturally concentrates on China's engagement with the west through the treaty ports and leased territories the emergence of architecture as a profession in China and Japan's omnipresence not least in Manchuria which reached its apogee in the puppet state of Manchukuo The study's geographically temporally and architecturally inclusive approach framed by the concept of multiple modernities questions the application of conventional theories of modernity or post colonialism to the Chinese situation By challenging conventional modernist historiography that has marginalised the experiences of the west's other for much of the last century this book proposes different ways of grappling with and comprehending the distinction and complexity of China's experiences and its encounter with architectural modernity
