Making Of A Psychiatrist:

The Making of a Psychiatrist David S. Viscott, 1986 *Because I Come from a Crazy Family* Edward M. Hallowell, 2018-06-12 From the bestselling author of the classic book on ADD *Driven to Distraction* a memoir of the strange upbringing that shaped Dr Edward M Hallowell s celebrated career When Edward M Hallowell was eleven a voice out of nowhere told him he should become a psychiatrist A mental health professional of the time would have called this psychosis But young Edward Ned took it in stride despite not quite knowing what psychiatrist meant With a psychotic father alcoholic mother abusive stepfather and two so called learning disabilities of his own Ned was accustomed to unpredictable behavior from those around him and to a mind he felt he couldn t always control The voice turned out to be right Now decades later Hallowell is a leading expert on attention disorders and the author of twenty books including *Driven to Distraction* the work that introduced ADD to the world In *Because I Come from a Crazy Family* he tells the often strange story of a childhood marked by what he calls the WASP triad of alcoholism mental illness and politeness and explores the wild wish surging beneath his incredible ambition that he could have saved his own family of drunk crazy and well intentioned eccentrics and himself *Because I Come from a Crazy Family* is an affecting at times harrowing ultimately moving memoir about crazy families and where they can lead about being called to the mental health profession and about the unending joys and challenges that come with helping people celebrate who they are A portion of the author s proceeds of this book will go to NAMI National Alliance on Mental Illness *The Modern Psychiatrist's Guide to Contemporary Practice* Brendan Kelly, 2024-07-04 *The Modern Psychiatrist s Guide to Contemporary Practice* provides an overview of psychiatry starting with the most fundamental question of all why does psychiatry exist Key topics are covered such as diagnosing mental illness controversial treatments involuntary admission human rights suicide and global inequality The book incorporates history medicine neuroscience service development legislation and service user movements It summarises key findings and discussions provides opinions based on evidence presents clear conclusions and describes useful radical directions for the future of this most contested of medical disciplines Each chapter includes useful chapter summaries and case studies are provided throughout This book is essential for mental health workers and trainees academics and those interested in what psychiatry is why it exists and its future potential The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution CC BY 4.0 International license *The Making of a Modern Psychiatrist* Mark Warren, 1986 TABLE OF CONTENTS 1 Fantasy 2 Denial 3 Acting Out 4 Anger 5 Dissociation 6 Depression 7 Fear 8 Sublimation 9 Anticipation 10 Fantasy *How Psychiatrists Make Decisions* Douglas W. Heinrichs, 2025-04-24 In an age of scientific psychiatry and evidenced based medicine the judgement of the psychiatric clinician in treating an individual patient has been devalued as the art of medicine as opposed to science with reduced evidentiary value The clinician is asked to apply the results of formal research studies of groups of patients the patient

reduced to a token of a type the latter usually defined by diagnosis Yet the limits of formal research to guide the treatment of the unique individual requires clinical judgments where there is little formal guidance while the clinician's deliberations are devalued as necessary but of questionable validity This dilemma has been encouraged by the tacit nature of the way clinicians reach decisions In this book Heinrichs makes explicit the underlying methodology of the clinical reasoning of experienced psychiatrists Starting with a detailed phenomenological examination of specific cases he argues that this methodology involves constructing models of each individual patient composed of patterns of propensities and their interaction POP models From this rational interventions can be hypothesized and predictions generated and tested The nature and characteristics of this modelling procedure is described in detail By making the model explicit clinicians can more critically assess their work Such models can also play a valuable role in educating clinical trainees This is discussed using recent work of cognitive scientists studying how expertise is developed across disciplines where considerable ambiguity and complexity exist From this specific recommendations follow for applying POP models in training settings to help turn novices into experts Finally the book challenges the devaluing of clinical judgment about individual patients by examining contemporary developments in the philosophy of science Problems with the hypothetico deductive view of science led to a naturalistic exploration of science Model construction to represent concrete pieces of reality to solve concrete problems has emerged as the fundamental process in science as practiced across all scientific disciplines POP modelling simply constitutes this process in psychiatry Hence when properly understood and rigorously applied clinical reasoning is a fully scientific process and merits high epistemological credibility

Euthanasia and Law in Europe John Griffiths, Heleen Weyers, Maurice Adams, 2008-05-21 This book is a successor to J Griffiths A Bood and H Weyers Euthanasia and Law in the Netherlands Amsterdam University Press 1998 which was widely praised for its thoroughness clarity and accuracy The new book emphasises recent legal developments and new research and has been expanded to include a full treatment of Belgium where since 2002 euthanasia has also become legal The book also includes descriptions written by local specialists of the legal situation and what is known about actual practice in a number of other European countries England and Wales France Italy Scandinavia Spain Switzerland The book strives for as complete and dispassionate a description of the situation as possible It covers in detail the substantive law applicable to euthanasia physician assisted suicide withholding and withdrawing treatment use of pain relief in potentially lethal doses palliative and terminal sedation and termination of life without a request in particular in the case of newborn babies the process of legal development that has led to the current state of the law the system of legal control and its operation in practice the results of empirical research concerning actual medical practice A concluding part deals with some general questions that arise out of the material presented Is the legalisation of euthanasia an example of the decline of law or should it on the contrary be seen as part and parcel of the increasing juridification of the doctor patient relationship Does the Dutch experience with legalised euthanasia support the idea of a slippery slope toward a situation in which life especially of the more vulnerable members of society is less effectively protected Is it possible to explain and to predict when a society will decide to legalise euthanasia

Involuntary Detention and Therapeutic Jurisprudence Kate Diesfeld, 2018-05-08

International developments within the last twenty years have demonstrated controversial shifts in treatment for people with mental illnesses and the care of persons with intellectual disabilities. These shifts have been apparent in an emphasis on deinstitutionalization, increased scrutiny of detention and discharge decisions, and in some countries, enforced treatment and care in the community. As we become increasingly conscious of the political and moral dimensions of civil commitment, these concerns are reflected in the professional literature, but this does not often enough focus on issues of clinical and legal principle, nor is it in a form which encourages comparative analysis. This collection draws on contributors from the UK, the USA, Australia, the Netherlands, Canada, and New Zealand who share a commitment to evaluating whether the civil detention processes protect the liberty, dignity, and justice interests of those with mental illnesses and intellectual disabilities. The book is written from a therapeutic jurisprudence perspective and poses a number of questions with international application, such as: Are there more categories of people being detained? Is involuntary detention serving new purposes? Are different forms of detention gaining credence and being more widely utilized? And are admission decisions and review of detention decisions transparent, consistent, and just?

A Psychiatrist's Guide to Advocacy Mary C. Vance, M.D., Katherine G. Kennedy, M.D., Ilse R. Wiechers, M.D., M.P.P., M.H.S., Saul Levin, M.D., M.P.A., 2020-03-31. A Psychiatrist's Guide to Advocacy explores the diverse conditions that may demand an intervention or affirmative response from mental health practitioners charged with advocating for patients and the profession. The editors and authors argue for a greater culture of advocacy among psychiatrists to effect broad and lasting changes, emphasizing that advocacy takes many forms, e.g., organizational, patient level, legislative, media education. The authors identify systemic problems in mental health care, describe the essential factors needed for effective advocacy, and delineate the advocacy needs of diverse patient populations, e.g., children and families, older adults, LGBTQ patients, veterans.

Malpractice and Liability in Psychiatry Peter Ash, Richard L. Frierson, Susan Hatters Friedman, 2022-03-17. This book comprehensively educates psychiatrists about malpractice and other liability. It is written to also specifically assist psychiatrists who are sued or are involved in other complaints. The first two sections discuss malpractice law and the litigation process; the litigation section mainly addresses some of the more emotionally charged issues, including dos and don'ts, how an attorney will be looking at the case, the defendant doctor's testifying at deposition and trial, and the stress of being sued. The subsequent three sections address specific topics that give rise to liability, with each section taking a different perspective, such as risks in particular clinical by practice site and special issues including practice in special situations such as the current pandemic. The final section discusses other forms of liability, such as complaints to medical boards or professional association ethics committees. An exceptional work. Malpractice and

Liability in Psychiatry functions as both a go to handbook and all encompassing read on the aforementioned topics

Mental Health Law in China Bo Chen, 2022-05-01 This book provides an important critique of mental health law and practice in China with a focus on involuntary detention and treatment The work explores China s mental health law reform regarding treatment decision making in the new era of the UN Convention on the Rights of Persons with Disabilities CRPD It adopts a socio legal approach not only by undertaking a comprehensive desk based analysis of the reforms introduced by China s Mental Health Law MHL but also examining its implementation based on evidence from practice The book seeks to investigate whether China s first national MHL takes a step closer to the requirements of the UN Convention on the Rights of Persons with Disabilities on mental health treatment decision making and if not why not The book will be of interest to those working in the areas of mental health law and policy medical law and disability human rights law and Asian Studies
