## **Making Of Modern Intellectual Property Law:**

The Making of Modern Intellectual Property Law Brad Sherman, Lionel Bently, 1999-07-08 One of the common themes in recent public debate has been the law's inability to accommodate the new ways of creating, distributing and replicating intellectual products. In this book the authors argue that in order to understand many of the problems currently confronting the law it is necessary to understand its past. This is its first detailed historical account. In this book the authors explore two related themes. First they explain why intellectual property law came to take its now familiar shape with sub-categories of patents, copyright, designs and trade marks. Secondly the authors set out to explain how it is that the law grants property status to intangibles. In doing so they explore the rise and fall of creativity as an organising concept in intellectual property law, the mimetic nature of intellectual property law and the important role that the registration process plays in shaping intangible property.

**The Making of Modern Intellectual Property Law** Brad Sherman, Lionel Bently, 1999 This book is the first detailed historical account of why intellectual property law with its sub-categories of patents, copyright, designs and trade marks took the shape that it did over the course of the nineteenth century. The authors also discuss ways in which the law grants property status to intangibles.

Modern Intellectual Property Law Jonathan Galloway, Daithí Mac Síthigh, Andrew Griffiths, Aisling McMahon, 2010-07-12 Modern Intellectual Property Law combines coverage of each intellectual property right granted for creations of the mind into a thoughtful unified textbook. Deconstructing the fundamental topics into short, clear sections separated by subheadings throughout, Colston and Galloway's text is the ideal student companion to this intriguing area of the law. This new edition has been completely revised to bring it up to date with the latest debate and changes to the law. All significant recent developments are covered, including the continuing controversy over patents for computer-implemented inventions and biotechnological inventions, the House of Lords' developments of patent law, the ECJ jurisprudence relating to trade mark dilution and comparative advertising, as well as the database right and international efforts to reconcile copyright with peer-to-peer file sharing. This text also discusses the ongoing effort to achieve an appropriate balance between intellectual property and competition law in order to protect market competition while retaining key incentives to drive the process of innovation. Written for students, this accessible and comprehensive textbook provides the perfect starting point for anyone studying intellectual property law in the UK.

**Modern Intellectual Property Law 3/e**, **The Making of Intellectual Property Law in Vietnam** Tran Kien, 2025-09-03 This book is about the making of intellectual property law in Vietnam across colonial and socialist space and time from 1864 to 1994. It provides a completely new, provoking narrative disproving previously published scholarship which claimed that there was no intellectual property law in Vietnam during the colonial and socialist periods. In doing so, the book engages with an emerging field of historiographical inquiry into the intellectual property law history in Vietnam and worldwide, which investigates how and why the scholarship about the history of intellectual property law has been construed.

and framed as such within a specific period and space This book is comprised of three knowledge components The first involves the reconstruction of the lost intellectual property law from 1864 to 1994 in Vietnam doctrinally Relying on newly discovered archives in Vietnam and worldwide it unravels a corpus of statutory and regulatory provisions and interesting at times contradictory juridical decisions that governed and interpreted copyright patent and trademark The second is the historiographical inquiry of the making of the intellectual property law history scholarship in Vietnam This will answer the questions of how and why the particular histories had been construed and framed as such at a particular time This involves the debate about sociopolitical ideologies underlying the meaning and application of the laws most notably colonialism and socialism Finally the third engages with the theory of legal transplantation It addresses a hypothetical question of colonial laboratory as a form of legal transplantation a new concept that this book offers to the global scholarship It demonstrates that the colonial empire had tried to use Vietnam as a laboratory for its legal reform and then transplanted the successful and feasible results back to the empire This book explains the distinctively ideological principles underlying the understanding and application of the law
