Making a Living in the Middle Ages Christopher Dyer,2002-01-01 In this book Christopher Dyer reviews our thinking about the economy of Britain in the Middle Ages In analysing economic development and change he allows us to reconstruct the daily lives and experiences of people in the past **Making Money in the Early Middle Ages** Rory Naismith,2023-07-11 An examination of coined money and its significance to rulers aristocrats and peasants in early medieval Europe Between the end of the Roman Empire in the fifth century and the economic transformations of the twelfth century coined money in western Europe was scarce and high in value difficult for the majority of the population to make use of And yet as Rory Naismith shows in this illuminating study coined money was made and used throughout early medieval Europe It was he argues a powerful tool for articulating people's place in economic and social structures and an important gauge for levels of economic complexity Working from the premise that using coined money carried special significance when there was less of it around Naismith uses detailed case studies from the Mediterranean and northern Europe to propose a new reading of early medieval money as a point of contact between economic social and institutional history Naismith examines structural issues including the mining and circulation of metal and the use of bullion and other commodities as money and then offers a chronological account of monetary development discussing the post Roman period of gold coinage the rise of the silver penny in the seventh century and the reconfiguration of elite power in relation to coinage in the tenth and eleventh centuries In the process he counters the conventional view of early medieval currency as the domain only of elite gift givers

and intrepid long distance traders Even when there were few coins in circulation Naismith argues the ways they were used to give gifts to pay rents to spend at markets have much to tell us **The Making of the Middle Ages** Marios

Costambeys,Andrew J. Hamer,Martin Heale,2007-01-01 Liverpool was founded in the Middle Ages and as the city approaches its eight hundredth anniversary this book takes stock of Liverpool s scholarly contributions to modern understanding of the period From the eighteenth century to the twenty first scholars from Liverpool have made pioneering advances in fields as diverse as Celtic philology and manuscript collecting By focusing on a local perspective this volume presents a microcosmic view of the different building blocks of the modern construction of the Middle Ages while offering fresh insights into more universal elements of medieval culture such as pageantry and mystery plays *Merovingian Mortuary Archaeology and the Making of the Early Middle Ages* Bonnie Effros,2003-03-03

Clothing jewelry animal remains ceramics coins and weaponry are among the artifacts that have been discovered in graves in Gaul dating from the fifth to eighth century Those who have unearthed them from the middle ages to the present have speculated widely on their meaning This authoritative book makes a major contribution to the study of death and burial in late antique and early medieval society with its long overdue systematic discussion of this mortuary evidence Tracing the history of Merovingian archaeology within its cultural and intellectual context for the first time Effros exposes biases and prejudices that have colored previous interpretations of these burial sites and assesses what contemporary archaeology can tell us about the Frankish kingdoms Working at the intersection of history and archaeology and drawing from anthropology and art history Effros emphasizes in particular the effects of historical events and intellectual movements on French and German antiquarian and archaeological studies of these grave goods Her discussion traces the evolution of concepts of nationhood race and culture and shows how these concepts helped shape an understanding of the past Effros then turns to contemporary multidisciplinary methodologies and finds that we are still limited by the types of information that can be readily gleaned from physical and written sources of Merovingian graves For example since material evidence found in the graves of elite families and particularly elite men is more plentiful and noteworthy mortuary goods do not speak as directly to the conditions in which women and the poor lived The clarity and sophistication with which Effros discusses the methods and results of European archaeology is a compelling demonstration of the impact of nationalist ideologies on a single discipline and of the struggle toward the more pluralistic vision that has developed in the post war years *Inventing the Middle Ages* Norman Cantor,2023-01-01

The Middle Ages in our cultural imagination are besieged with ideas of wars tournaments plagues saints and kings knights lords and ladies In his era defining work *Inventing the Middle Ages* Norman Cantor shows that these presuppositions are in fact constructs of the twentieth century Through close study of the lives and works of twenty of the twentieth century s most prominent medievalists Cantor examines how the genesis of this fantasy arose in the scholars spiritual and emotional outlooks which influenced their portrayals of the Middle Ages In the course of this vigorous scrutiny of their scholarship he navigates the

strong personalities and creative minds involved with deft skill Written with both students and the general public in mind Inventing the Middle Ages provided an alternative framework for the teaching of the humanities Revealing the interconnection between medieval civilisation the culture of the twentieth century and our own assumptions Cantor provides a unique standpoint both forwards and backwards As lively and engaging today as when it was first published in 1991 his analysis offers readers the core essentials of the subject in an entertaining and humorous fashion **The Making of Middle English, 1765-1910** David Matthews, 1999 Before the 1760s with the major exception of Chaucer nearly all of Middle English literature lay undiscovered and ignored Because established scholars regarded later medieval literature as primitive and barbaric the study of this rich literary heritage was relegated to antiquarians and dilettantes In The Making of Middle English 1765 1910 David Matthews chronicles the gradual rediscovery of this literature and the formation of Middle English as a scholarly pursuit Matthews details how the careers class positions and ambitions of only a few men gave shape and direction to the discipline Mostly from the lower middle class they worked in the church or in law and hoped to exploit medieval literature for financial success and social advancement Where Middle English was concerned Matthews notes these scholars were self taught and their amateurism came at the price of inaccurately edited and often deliberately improved texts intended for a general public that sought appealing rather than authentic reading material This study emphasizes the material history of the discipline examining individual books and analyzing introductions notes glossaries promotional materials lists of subscribers and owners annotations to assess the changing methodological approaches of the scholars and the shifts in readership Matthews explores the influence of aristocratic patronage and the societies formed to further the editing and publication of texts And he examines the ideological uses of Middle English and the often contentious debates between these scholars and organizations about the definition of Englishness itself A thorough work of scholarship The Making of MiddleEnglish presents for the first time a detailed account of the formative phase of Middle English studies and provides new perspectives on the emergence of medieval studies canon formation the politics of editing and the history of the book The Making Af the Middle Ages ,1965 **The Modern Making of the Middle Ages** Walter Kudrycz, 1997
