improvements in productivity regional variations social responses to agricultural technology and those common trends that unite the Northwest European region The volume integrates material derived from the great advances made in medieval archaeology and the historical study of landscapes during the past 30 years and has a supranational character It will be of interest to all those working on the social economic and political history of Northwest Europe in the medieval and early modern periods as well as to those undertaking research in the specific field of the history of technology **Medieval Farming and Technology : the Impact of Agricultural Change in Northwest Europe** John Langdon,1997

Agriculture in the Middle Ages Del Sweeney,2016-11-11 Explores the cultural framework within which changes in agricultural technology and economic organization occur and the ways in which changes in the social fabric influence attitudes toward rural work and the peasantry **Medieval Science, Technology, and Medicine** Thomas F. Glick,Steven Livesey,Faith Wallis,2014-01-27 Medieval Science Technology and Medicine details the whole scope of scientific knowledge in the medieval period in more than 300 A to Z entries This resource discusses the research application of knowledge cultural and technology exchanges experimentation and achievements in the many disciplines related to science and technology Coverage includes inventions discoveries concepts places and fields of study regions and significant contributors to various fields of science There are also entries on South Central and East Asian science This reference work provides an examination of medieval scientific tradition as well as an appreciation for the relationship between medieval science and the traditions it supplanted and those that replaced it For a full list of entries contributors and more visit the Routledge Encyclopedias of the Middle Ages website **Routledge Revivals: Medieval Science, Technology and Medicine (2006)** Thomas Glick,Steven J. Livesey,Faith Wallis,2017-07-05 First published in 2005 this encyclopedia demonstrates that the millennium from the fall of the Roman Empire to the Renaissance was a period of great intellectual and practical achievement and innovation In Europe the Islamic world South and East Asia and the Americas individuals built on earlier achievements introduced sometimes radical refinements and laid the foundations for modern development Medieval Science Technology and Medicine details the whole scope of scientific knowledge in the medieval period in more than 300 A to Z entries This comprehensive resource discusses the research application of knowledge cultural and technology exchanges experimentation and achievements in the many disciplines related to science and technology It also looks at the relationship between medieval science and the traditions it supplanted Written by a select group of international scholars this reference work will be of great use to scholars students and general readers researching topics in many fields including medieval studies world history history of science history of technology history of medicine and cultural studies *Field Systems and Farming Systems in Late Medieval England* Bruce M.S. Campbell,2023-05-31 The later Middle Ages was an overwhelmingly rural world with probably three out of four households reliant upon farming for a living Yet conventional accounts of the period rarely do justice to the variety of ways in which the land was managed and worked The thirteen essays collected in this

volume draw upon the abundant documentary evidence of the period to explore that diversity In the process they engage with the issue of classification without which effective generalisation is impossible and offer a series of solutions to that particularly thorny methodological challenge Only through systematic and objective classification is it possible to differentiate between and map different field systems husbandry types and land use categories That in turn makes it possible to consider and evaluate the relative roles of soils and topography institutional structures and commercialised market demand in shaping farm enterprise both during the period of mounting population before the Black Death and the long era of demographic decline that followed it What emerges is an agrarian world more commercialised differentiated and complex than is usually appreciated whose institutional and agronomic contours shaped the course of agricultural development for centuries to come

A Cultural History of Work in the Medieval Age Valerie L. Garver, 2020-09-17 Winner of the 2020 PROSE Award for Multivolume Reference Humanities Work was central to medieval life Religious and secular authorities generally expected almost everyone to work Artistic and literary depictions underlined work s cultural value The vast majority of medieval people engaged in agriculture because it was the only way they could obtain food Yet their work led to innovations in technology and production and allowed others to engage in specialized labor helping to drive the growth of cities Many workers moved to seek employment and to improve their living conditions For those who could not work charity was often available and many individuals and institutions provided forms of social welfare Guilds protected their members and created means for the transmission of skills When they were not at work medieval Christians were to meet their religious obligations yet many also enjoyed various pastimes A consideration of medieval work is therefore one of medieval society in all its creativity and complexity and that is precisely what this volume provides A Cultural History of Work in the Medieval Age presents an overview of the period with essays on economies representations of work workplaces work cultures technology mobility society politics and leisure

Technology in Mediterranean and European Lands, 600-1600 Pamela O. Long, 2025-04-15 How medieval and Renaissance technology shaped Mediterranean and European society across a millennium In Technology in Mediterranean and European Lands 600 1600 Pamela O Long explores the intricate web of technological advancements that shaped Mediterranean and European societies during the medieval and early modern periods From the essential crafts of ploughing and tailoring to the sophisticated hydraulic systems and monumental building constructions Long illuminates how ordinary people harnessed and transformed their world Drawing on recent scholarship on environmental history and the history of technology as well as materials object biographies and the circulation of objects Long examines the circulation of ideas and technologies in Europe and the Mediterranean The book covers the evolution of food production transportation and communication as well as the crafting of pottery weapons and machines This in depth historical analysis shows how these technological advancements had profound social and economic impacts on everyday life Long s meticulous research and engaging narrative bring to light the interconnectedness of various crafts and their

contributions to the broader tapestry of human history By integrating archaeological findings historical texts and modern scientific methods the book offers an interdisciplinary perspective on the technological practices of the pre modern world Perfect for scholars students and history enthusiasts Technology in Mediterranean and European Lands 600 1600 emphasizes the ingenuity and resilience of past civilizations and the enduring legacy of technological innovation [The Rise and Decline of Dutch Technological Leadership \(2 Vols\)](#) Karel Davids,2008-09-17 This book provides a wide ranging overview of Dutch technological leadership in the early modern Europe it explains whence this leadership came about and why it ended and it explores to what extent the Dutch case illuminates the evolution of technological leadership in general **An Environmental History of the Middle Ages** John Aberth,2013 The Middle Ages was a critical and formative time for Western approaches to our natural surroundings eeAn Environmental History of the Middle Ages is a unique and unprecedented cultural survey of attitudes towards the environment during this period Humankind e tm s relationship with the environment shifted gradually over time from a predominantly adversarial approach to something more overtly collaborative until a series of ecological crises in the late Middle Ages With the advent of shattering events such as the Great Famine and the Black Death considered efflorescences of the climate downturn known as the Little Ice Age that is comparable to our present global warming predicament medieval people began to think of and relate to their natural environment in new and more nuanced ways They now were made to be acutely aware of the consequences of human impacts upon the environment anticipating the cyclical new ecology approach of the modern world Exploring the entire medieval period from 500 to 1500 and ranging across the whole of Europe from England and Spain to the Baltic and Eastern Europe John Aberth focuses his study on three key areas the natural elements of air water and earth the forest and wild and domestic animals Through this multi faceted lens An Environmental History of the Middle Ages sheds fascinating new light on the medieval environmental mindset It will be essential reading for students scholars and all those interested in the Middle Ages *Social complexity in early medieval rural communities* Juan Antonio Quirós Castillo,2016-12-31 This book presents an overview of the results of the research project DESPAMED funded by the Spanish Minister of Economy and Competitiveness The aim of the book is to discuss the theoretical challenges posed by the study of social inequality and social complexity in early medieval peasant communities in North western Iberia **Science and Technology in Medieval European Life** Jeffrey R. Wigelsworth,2006-09-30 Despite the popular view of medieval Europe as a Dark Age of intellectual stagnation scientific and technological achievement thrived during this time As any vacationer to Europe knows churches and castles remain lasting testaments to the ingenuity of that period in history Through carefully chosen examples which are presented in easily accessible thematic chapters Science and Technology in Medieval European Life demonstrates how these two aspects of human achievement far from being ivory tower enterprises impacted the daily life of people in medieval Europe These topics will also resonate with modern readers in their own daily lives This reference work begins with an

historical introduction that situates medieval science and technology into its social intellectual and religious context Among the varied topics found in the chapters are armor making waterwheels and waterpower chimneys stained glass communication technology ship building medicine both academic and village mechanical clocks calendar creation and astrology For those interested in pursuing further research into this area of history the book concludes with a chronology of events a suggested list of further reading and a glossary

The Crisis of the 14th Century Martin Bauch, Gerrit Jasper Schenk, 2019-12-16 Pre modern critical interactions of nature and society can best be studied during the so called Crisis of the 14th Century While historiography has long ignored the environmental framing of historical processes and scientists have over emphasized nature's impact on the course of human history this volume tries to describe the at times complex modes of the late medieval relationship of man and nature The idea of teleconnection borrowed from the geosciences describes the influence of atmospheric circulation patterns often over long distances It seems that there were teleconnections in society too So this volume aims to examine man environment interactions mainly in the 14th century from all over Europe and beyond It integrates contributions from different disciplines on impact perception and reaction of environmental change and natural extreme events on late Medieval societies For humanists from all historical disciplines it offers an approach how to integrate written and even scientific evidence on environmental change in established and new fields of historical research For scientists it demonstrates the contributions scholars from the humanities can provide for discussion on past environmental changes

The Great Warming Brian Fagan, 2010-08-01 In this New York Times bestseller Brian Fagan shows how climate transformed and sometimes destroyed human societies during the earth's last global warming phase From the 10th to 15th centuries the earth experienced a rise in surface temperature that changed climate worldwide a preview of today's global warming In some areas including much of Western Europe longer summers brought bountiful crops and population growth that led to cultural flowering In others drought shook long established societies such as the Maya and the Indians of the American Southwest whose monumental buildings were left deserted as elaborate social structures collapsed Brian Fagan examines how subtle changes in the environment had far reaching effects on human life in a narrative that sweeps from the Arctic ice cap to the Sahara to the Indian Ocean The lessons of history suggest we may be yet be underestimating the power of climate change to disrupt our lives today

Mills in the Medieval Economy John Langdon, 2004-07-01 The late medieval English milling industry epitomizes one of the most important technical achievements of early societies the exploitation of wind water and muscle power for augmenting human endeavours Through a computerized analysis of the number and variety of mills in England from 1300 to 1540 as well as the technology practices and personnel sustaining them Langdon reveals the structural evolution of the milling industry highlighting both its accomplishments and its limitations Although it focuses on England during the later middle ages the book's innovative methodologies and original findings will furnish useful comparative material for all scholars investigating pre industrial

societies It also offers a challenging new perspective on the later middle ages as a time of change in addition to providing enthusiasts of old technologies generally with a wealth of detail about one of the most recognizable and enduring features of medieval society

The Cambridge World History: Volume 5, Expanding Webs of Exchange and Conflict, 500CE-1500CE Benjamin Z. Kedar, Merry E. Wiesner-Hanks, 2015-04-09 Volume 5 of the Cambridge World History series uncovers the cross cultural exchange and conquest and the accompanying growth of regional and trans regional states religions and economic systems during the period 500 to 1500 CE The volume begins by outlining a series of core issues and processes across the world including human relations with nature gender and family social hierarchies education and warfare Further essays examine maritime and land based networks of long distance trade and migration in agricultural and nomadic societies and the transmission and exchange of cultural forms scientific knowledge technologies and text based religious systems that accompanied these The final section surveys the development of centralized regional states and empires in both the eastern and western hemispheres Together these essays by an international team of leading authors show how processes furthering cultural commercial and political integration within and between various regions of the world made this millennium a proto global era

The Cambridge World History Merry E. Wiesner-Hanks, David Christian, Graeme Barker, Benjamin Z. Kedar, Norman Yoffee, Craig Benjamin, Jerry H. Bentley, John Robert McNeill, 2015 The most comprehensive account yet of the human past from prehistory to the present

A Social History of England, 900-1200 Julia Crick, Elisabeth van Houts, 2011-04-21 The years between 900 and 1200 saw transformative social change in Europe including the creation of extensive town dwelling populations and the proliferation of feudalised elites and bureaucratic monarchies In England these developments were complicated and accelerated by repeated episodes of invasion migration and changes of regime In this book scholars from disciplines including history archaeology and literature reflect on the major trends which shaped English society in these years of transition and select key themes which encapsulate the period The authors explore the landscape of England its mineral wealth its towns and rural life the health behaviour and obligations of its inhabitants patterns of spiritual and intellectual life and the polyglot nature of its population and culture What emerges is an insight into the complexity diversity and richness of this formative period of English history

A Companion to the Archaeology of the Roman Empire, 2 Volume Set Barbara Burrell, 2024-03-13 A one of a kind exploration of archaeological evidence from the Roman Empire between 44 BCE and 337 CE In *A Companion to the Archaeology of the Roman Empire* distinguished scholar and archaeologist Professor Barbara Burrell delivers an illuminating and wide ranging discussion of peoples institutions and their material remains across the Roman Empire Divided into two parts the book begins by focusing on the unifying factors institutions and processes that affected the entire empire This ends with a chapter by Professor Greg Woolf Ronald J Mellor Professor of Ancient History at UCLA which summarizes and enlarges upon the themes and contributions of the volume Meanwhile the second part brings out local patterns and peculiarities within the archaeological

remains of the City of Rome as well as almost every province of its empire Each chapter is written by a noted scholar whose career has focused on the subject Chronological coverage for each chapter is formally 44 BCE to 337 CE but since material remains are not always so closely datable most chapters center on the first three centuries of the Common Era plus or minus 50 years In addition the book is amply illustrated and includes new and little known finds from oft ignored provinces Readers will also find A thorough introduction to the peoples and operations of the Roman Empire including not just how the center affected the periphery Romanization but how peripheral provinces operated on their own and among their neighbors Comprehensive explorations of local patterns within individual provinces Contributions from a diverse panel of leading scholars in the field A unique form of organization that brings out systems across the empire such as transport across sea rivers and roads monetary systems pottery and foodways the military construction and technology Perfect for graduate and advanced undergraduate students of archaeology and the history of the Roman Empire A Companion to the Archaeology of the Roman Empire will also earn a place in the libraries of professional archaeologists in other fields including Mayanists medievalists and Far Eastern scholars seeking comparanda and bibliography on other imperial structures
