Miracle Medic Male:

Medical Miracles Jacalyn Duffin, 2009 Modern culture tends to separate medicine and miracles but their histories are closely intertwined The Roman Catholic Church recognizes saints through canonization based on evidence that they worked miracles as signs of their proximity to God Physician-historian Jacalyn Duffin has examined Vatican sources on 1400 miracles from six continents and spanning four centuries Overwhelmingly the miracles cited in canonizations between 1588 and 1999 are healings and the majority entail medical care and physician testimony These remarkable records contain intimate stories of illness prayer and treatment as told by people who rarely leave traces peasants and illiterates men and women old and young A woman's breast tumor melts away a man's wounds knit a lame girl suddenly walks a dead baby revives Suspicious of wishful thinking or naive enthusiasm skeptical clergy shaped the inquiries to identify recoveries that remain unexplained by the best doctors of the era The tales of healing are supplemented with substantial testimony from these physicians Some elements of the miracles change through time Duffin shows that doctors increase in number new technologies are embraced quickly diagnoses shift with altered capabilities But other aspects of the miracles are stable The narratives follow a dramatic structure shaped by the formal questions asked of each witness and by perennial reactions to illness and healing In this history medicine and religion emerge as parallel endeavors aimed at deriving meaningful signs from particular instances of human distress signs to explain alleviate and console in confrontation with suffering and mortality A lively sweeping analysis of a fascinating set of records this book also poses an exciting methodological challenge to historians miracle stories are a vital source not only on the thoughts and feelings of ordinary people but also on medical science and its practitioners

Recognizing Miracles in Antiquity and Beyond Maria Gerolemou,2018-04-23 In recent years scholars have extensively explored the function of the miraculous and wondrous in ancient narratives mostly pondering on how ancient authors view wondrous accounts i e the treatment of the descriptions of wondrous occurrences as true events or their use More precisely these narratives investigate whether the wondrous pursues a display of erudition or merely provides stylistic variety sometimes such narratives even represent the wish of the author to grant a rational explanation to extraordinary actions At present however two aspects of the topic have not been fully examined a the ability of the wondrous miraculous to set cognitive mechanisms in motion and b the power of the wondrous miraculous to contribute to the construction of an authorial identity that of kings gods or narrators To this extent the volume approaches miracles and wonders as counter intuitive phenomena beyond cognitive grasp which challenge the authenticity of human experience and knowledge and push forward the frontiers of intellectual and aesthetic experience Some of the articles of the volume examine miracles on the basis of

bewilderment that could lead to new factual knowledge the supernatural is here registered as something natural although strange the rest of the articles treat miracles as an endpoint where human knowledge stops and the unknown divine begins here the supernatural is confirmed Thence questions like whether the experience of a miracle or wonder as a counter intuitive phenomenon could be part of long term memory i e if miracles could be transformed into solid knowledge and what mental functions are encompassed in this process are central in the discussion **The Medical Pickwick** ,1918

The Rationalization of Miracles Paolo Parigi,2012-05-14 During the Counter Reformation in southern Europe Catholic Church officials developed rules to legitimize miracles performed by candidates to sainthood The Rationalization of Miracles uncovers a tacit understanding between central religious officials and local religious activists Each group had a vested interest in declaring miracles Catholic Church leaders sought legitimacy in the wake of the crisis of faith created by the Protestant Schism and religious acolytes needed Church approval to secure a flow of resources to their movements The Church s new procedure of deeming miracles true when there were witnesses of different statuses and the acts occurred in the presence of a candidate s acolyte served the needs of both parties And by developing rules and procedures for evaluating miracles the Church rationalized the magic at the root of the miracles thereby propelling the institution out of a period of

institutional political and social uncertainty and forming the basis of modern sainthood
