## **Missile Defense:**

*The Missile Defense Controversy* Ernest Yanarella, 1977-01-01 This revised and updated edition identifies the cultural factors and specific administrative agendas that have shaped the way we view ballistic missile technology Three new sections connect our recent sudden shifts in foreign policy to ongoing historical patterns Whether cautioning against the almost neurotic pursuit of absolute security or examining the powerful influence of religion on military buildup Ernest J Yanarella uncovers the deeply ingrained attitudes that will determine the future of American missile defense

**History of Strategic and Ballistic Missile Defense: Volume I** Barry Leonard, 2010-11 As part of a larger study of the strategic arms competition which developed after World War II between the U S and the U S S R this study of the two countries strategies for air and ballistic missile defense addresses two broad subjects 1 How did each country approach the problem of defense against the threat from the air 2 Why did each country accent particular elements of an air defense strategy at various periods between 1945 and 1972 The first question concerns the means that leaders chose for defense against an increasingly sophisticated offensive threat Includes several appendices of chronologies tables charts maps and notes

**Ballistic Missile Defense In The Post-cold War Era** David B H Denoon, 2021-11-28 With the end of the Cold War and the visibility of U S Patriot missile defenses during the 1991 Gulf War the cost and benefits of ballistic missile defense systems BMD need to be re evaluated In this detailed and balanced study David Denoon assesses new types of short range and intercontinental missile defenses In the post Cold War era two fundamental changes have made missile defense for the United States and its military forces more compelling The United States and Russia no longer see each other as direct threats and there has been a dramatic proliferation of ballistic missile capability in the Third World Consequently U S forces deployed overseas are more likely to be at risk and eventually the United States itself could become vulnerable to missile threats With these changes in mind David Denoon analyzes the current BMD dilemma arguing that active defenses against missiles should be seen as a form of insurance against catastrophe He assesses the likelihood of missile attacks and the appropriate level of investment for the United States to defend against such attacks The book provides an assessment of deterrence and the performance of the Patriot missiles during the 1991 Gulf War critiques the Strategic Defense Initiative and analyzes the prospects for new types of short range and intercontinental missile defenses

*National Missile Defense* Erin V. Causewell, 2002 Missiles came of age after World War II and the United States has pursued missile defences ever since The issue has turned out to be one of the most divisive of the past generation taking into account the Russian position and their threat or perceived threat and the technical difficulties of actually implementing any missile defence The Bush Administration claims that for the first time an effective missile defence is technically possible and that the threat of weapons of mass destruction has spread to many nations and groups other than Russia The two factors according to them make missile defence an urgent priority justifying the breaking of the widely revered ABM Treaties Their argument rests partially on a bet that the Russians have

now fallen so far behind since the Yeltsin government took over that they cannot keep up technologically Although terrorism groups will not be deterred by the missile defence being planned countries like China North Korea etc might well be This book frames the current debate and also presents the legal considerations for withdrawal from the ABM Treaties **Shield of Dreams** Stephen J. Cimbala,2008 This book examines the implications of deploying missile defences by the United States and Russia within the current and next decades Noting that U S plans to locate parts of the global ballistic missile defence system in eastern Europe contributed to a deterioration in U S Russian relations Cimbala discusses how a post Bush post Putin era could open the door either to improved detente or increased acrimony over such issues as missile defences and NATO enlargement the fate of the CFE and INF treaties and U S hegemony in world politics *Missile Defense* Steven A. Hildreth,2004 The United States has pursued missile defenses since the dawn of the missile age shortly after World War II The development and deployment of missile defenses has not only been elusive but has proven to be one of the most divisive issues of the past generation The Bush Administration substantially altered the debate over missile defenses The Administration requested significant funding increases for missile defense programs eliminated the distinction between national and theater missile defense restructured the missile defense program to focus more directly on developing deployment options for a layered capability to intercept missiles aimed at U S territory across the whole spectrum of their flight path adopted a new untried development and acquisition strategy announced U S withdrawal from the 1972 Anti ballistic Missile Treaty and is deploying an initial national missile defense capability Critics however take issue with assertions that the threat is increasing citing evidence that the number of nations seeking or possessing nuclear weapons has actually declined over the past twenty years Moreover they argue that the technology for effective missile defense remains immature that deployment is provocative to allies friends and adversaries and it is a budget buster that reduces the availability of funds to modernize and operate U S conventional military forces They argue especially that some major powers view U S missile defense as an attempt at strategic domination and that other such as China will expand their missile capabilities in response History of Strategic Air and Ballistic Missile Defense ,2009 From the book s Foreword In the early 1970s the U S Army Center of Military History contracted with BDM Corporation for a history of U S efforts to counter Soviet air and missile threats during the Cold War The resulting two volume History of Strategic Air and Ballistic Missile Defense covers the years 1945 1972 when the strategic arms competition between the United States and the Soviet Union was at its height The study was first published for limited distribution in 1975 and recently declassified with minimal redaction These volumes address the passive and active defense strategies technologies and techniques adopted by both U S and Soviet defense planners Much of their actions centered around three common questions How might we be attacked How shall we defend our country What can technology do to solve the basic problems of defending against this new intercontinental threat **Missile Defense 2020** Thomas Karako,Ian Williams,2017-04-18 In policy pronouncements over

the last two administrations the protection of the American homeland was regularly identified as the first priority of U S missile defense efforts Homeland missile defense today is provided by the Ground based Midcourse Defense program and other elements of the larger Ballistic Missile Defense System The limited defenses fielded today have advanced considerably since limited defensive operations began in late 2004 but nevertheless they remain too limited and too modest relative to emerging threats The Missile Defense Agency s path to improve the system may require additional effort to stay ahead of even limited missile threats This report explains how the current system works as well as current and potential plans to modernize the system and the authors offer recommendations for future evolution of the system **Ballistic Missile**

**Defense** John H. Pendleton, 2008-12 In 2002 the DoD established the Missile Defense Agency MDA to develop and deploy globally integrated ballistic missile defenses to protect the U S homeland deployed forces friends and allies To deliver an operational capability as quickly as possible the agency was not subject to traditional DoD requirements and oversight processes While directed to work closely with the combatant commands the agency was not required to build missile defenses to meet specific operational requirements This report assesses the extent to which DoD has developed a process that identifies prioritizes and addresses overall combatant command priorities as the MDA develops ballistic missile defense capabilities Includes recommend Illus **Making Sense of Ballistic Missile Defense** National Research Council, Division on Engineering and Physical Sciences, Committee on an Assessment of Concepts and Systems for U.S. Boost-Phase Missile Defense in Comparison to Other Alternatives, 2013-01-28 The Committee on an Assessment of Concepts and Systems for U S Boost Phase Missile Defense in Comparison to Other Alternatives set forth to provide an assessment of the feasibility practicality and affordability of U S boost phase missile defense compared with that of the U S non boost missile defense when countering short medium and intermediate range ballistic missile threats from rogue states to deployed forces of the United States and its allies and defending the territory of the United States against limited ballistic missile attack To provide a context for this analysis of present and proposed U S boost phase and non boost missile defense concepts and systems the committee considered the following to be the missions for ballistic missile defense BMD protecting of the U S homeland against nuclear weapons and other weapons of mass destruction WMD or conventional ballistic missile attacks protection of U S forces including military bases logistics command and control facilities and deployed forces including military bases logistics and command and control facilities They also considered deployed forces themselves in theaters of operation against ballistic missile attacks armed with WMD or conventional munitions and protection of U S allies partners and host nations against ballistic missile delivered WMD and conventional weapons Consistent with U S policy and the congressional tasking the committee conducted its analysis on the basis that it is not a mission of U S BMD systems to defend against large scale deliberate nuclear attacks by Russia or China Making Sense of Ballistic Missile Defense An Assessment of Concepts and Systems for U S Boost Phase Missile Defense in Comparison to Other Alternatives suggests that great care should be taken

by the U S in ensuring that negotiations on space agreements not adversely impact missile defense effectiveness This report also explains in further detail the findings of the committee makes recommendations and sets guidelines for the future of ballistic missile defense research

**Hit To Kill** Bradley Graham,2003-11-06 Even as America faces a world of difficult to detect low tech unconventional threats the Bush administration has put its faith in a missile defense system or shield to keep us all safe
