Greek professor to research the Dead Sea Scrolls This research changed my life my belief about time and the books of the Bible While researching the Dead Sea Scrolls I found two historical books that were in the Bible during Jesus time on this Earth So I ask this question Why did man remove these books The deeper I studied I discovered that our Bible should have seventy books instead of sixty six Six is the number of man and a number representing incompleteness Sixty six doubles its meaning and the number 666 needs no explanations Men do resist God's will today 2 Peter 3:9 While researching the subject I encountered extreme opposition The books of the Bible should be divisible by seven So we are missing one New Testament book and three Old Testament books to make a seventy book Bible Have we been deceived by our religious leaders and science community Does all time truly consist in a 7 007 year window This book is written from the complete seventy book Bible which was revealed in the Dead Sea Scrolls Do the scrolls reveal angels mating with the daughters of Adam Where did the giant human originate Have we all been lied to about Genesis 6 and the events during the days of Noah Are angels and demons masquerading as aliens and UFOs in a great end of time deception Will the dollar collapse by 2022 Will the U S be destroyed in one day by 2028 However when He the Spirit of truth has come He will guide you into all truth for He will not speak on His own authority but whatever He hears He will speak and He will tell you things to come John 16:13-14

as a precedent for Mars The second one focuses on the creation and management of a new society on Mars and includes topics such as human reproduction and childbirth the protection of human rights in privately funded settlements legal aspects of a Martian power grid and criminal justice on the red planet With multiple national space agencies and commercial enterprises focusing on Mars it is more than likely that a human presence will be established on the red planet in the coming decades While the foundation of international space law laid primarily by the Outer Space Treaty remains the framework within which humans will engage with Mars new and unforeseen challenges have arisen driven particularly by the rapid pace of technological advancement in recent years To ensure that space law can keep up with these developments a new scholarly work such as the present one is critical By bringing together a number of fresh international perspectives on the topic the book is of interest to all scholars and professionals working in the space field
