**Space Entrepreneurship** The New York Times Editorial Staff, 2018-07-15 Space flight used to be something that only governments participated in often in conjunction with military defense However today space is a new wide open frontier for entrepreneurs and corporations to develop and implement new kinds of space travel and habitats What was once done just for exploration and advancing science is now a competition for companies such as SpaceX and Virgin Galactic who seek to develop products that not only bring humans into space and allow them to live there but also generate

profits for the entrepreneurs who create them These articles explore this phenomenon including its advances and setbacks

**Final Frontier** Brian

Clegg,2014-08-19 Star Trek was right there is only one final frontier and that is space Human beings are natural explorers and nowhere is this frontier spirit stronger than in the United States of America It almost defines the character of the US But the Earth is running out of frontiers fast In Brian Clegg s *The Final Frontier* we discover the massive challenges that face explorers both human and robotic to uncover the current and future technologies that could take us out into the galaxy and take a voyage of discovery where no one has gone before but one day someone will In 2003 General Wesley Clark set the nation a challenge to produce the technology that would enable new pioneers to explore the galaxy That challenge is tough the greatest we ve ever faced But taking on the final frontier does not have to be a fantasy In a time of recession escapism is always popular and what greater escape from the everyday can there be than the chance of leaving Earth s bounds and exploring the universe With a rich popular culture heritage in science fiction movies books and TV shows this is a subject that entertains and informs in equal measure

*Yearbook of Astronomy 2021* Brian Jones,2020-10-31 The annual treasury for sky watchers and stargazers including references and a variety of fascinating articles The Yearbook of Astronomy series is renowned for its comprehensive jargon free monthly sky notes and authoritative sky charts that enable backyard astronomers and sky gazers everywhere to plan their viewing of the year s eclipses comets meteor showers and minor planets as well as detailing the phases of the moon and visibility and locations of the planets throughout the year Every annual edition also includes a variety of entertaining and informative articles Among the wide ranging articles in this 2021 edition are Male Family Mentors for Women in Astronomy Henrietta Swan Leavitt and Her Work Solar Observing Obsolete Constellations Lunar Volcanism Pages From the Past Collecting Vintage Astronomy Books Maori Astronomy in Aotearoa New Zealand and more In addition you ll find the first in a series entitled Mission to Mars Countdown to Building a Brave New World scheduled to appear in the Yearbook throughout the 2020s to keep you fully up to date with the ongoing investigations research and preparations that are already underway as well as those in the planning phase geared towards sending a manned mission to Mars around the end of the decade We are at the start of what promises to be an exciting journey and the Yearbook of Astronomy continues to be an essential companion

On the 20th anniversary of the first human landing on the Moon President George H W Bush stood atop the steps of the National Air and Space Museum in Washington D C and proposed a long range human exploration plan that included the successful construction of an orbital space station a permanent return to the Moon and a mission to Mars This enterprise became known as the Space Exploration Initiative SEI The president charged the newly reestablished National Space Council with providing concrete alternatives for meeting these objectives To provide overall focus for the new initiative Bush later set a thirty year goal for a crewed landing on Mars Within a few short years after this Kennedyesque announcement however the initiative had faded into history the victim of a flawed policy process and a political war fought on several different fronts The story of this failed initiative was a tale of organizational cultural and personal confrontation by key protagonists and critical battles Some commentators have argued that SEI was doomed to fail due primarily to the immense budgetary pressures facing the nation during the early 1990s The central thesis of *Mars Wars The Rise and Fall of the Space Exploration Initiative* suggests however that failure was not predetermined Instead it was the result of a deeply flawed decision making process that failed to develop or even consider policy options that may have been politically acceptable given the existing political environment      **Congressional Record** United States.
