Mission To Mars:

Mission to Mars James E. Oberg, 2017-09-15 How feasible is a manned Mars flight How soon will it be possible How long will it take What kind of spacecraft will make the journey What kind of data will be collected What are the advantages of a manned flight over an unmanned Mission to Mars discusses these questions and more in this serious documented treatment of the not too distant manned expedition to Mars The shuttle has proved successful and an enthusiastic boost to American interest in space But while many laypeople wonder what's next scientists are planning what they feel is the next logical step Drawing on the vast amount of data sent back by Viking orbiters and probes and existing developments in propulsion and space technology space experts all over have been speculating analyzing and exchanging ideas relative to the long awaited mission to Mars Other factors critical to an intelligent discussion of such an undertaking are included here spaceship design and assembly propulsion systems navigation principles life support systems selecting a landing site scientific activities on Mars cost factors political and social issues

Mission to Mars IntroBooks, 2018-02-21 Mars has always signaled to the mankind when it would travel high in the night sky The ancient people have assumed that this rust red planet was the god of war and therefore they christened it with the name Mars The early explorers were armed with newly forms of invented telescopes discovered that Mars exhibited seasonal color changes and were subjected to dust storms that used to encircle the globe and might even have had several channels that could have crisscrossed the surface The recent explorers make use of the advanced technology and the robotic surrogates to extend their reach out to the planet Mars With the use of the advanced technology they have discovered that Mars is much more interesting and the complex planet in the Solar System As per the claims of the present explorers that pieces of Mars have even arrived on the Earth as meteorites and these particles are pointing out to the possible existence of life on Mars This has resulted in the growth of the active interests of the explorers to gain impetus about the living conditions on Mars
