## **Mississippian Emergence:**

*The Mississippian Emergence* Bruce D. Smith, 2007-10-07 This collection addressing a topic of ongoing interest and debate in American archaeology examines the evolution of ranked chiefdoms in the Midwestern and Southeastern United States during the period A D 700 1200 The volume brings together a broad range of professionals engaged in the fieldwork that has vitalized the theoretical debates on the development of Mississippi Valley cultures The initial chapter provides a general discussion of various explanations for the rise of these distinctive ranked societies in the eastern United States A D 750 1050 and sets the stage for the interdisciplinary analysis from multiple viewpoints that follows The first section discusses a cluster of individual sites in the Midwest and Southeast and reveals the parallel and occasionally divergent paths followed by the inhabitants as they transitioned from Late Woodland into Mississippian lifeways The chapters in the second half discuss by region the emergence of ranked agricultural societies and examine how these networks played a role in the large scale and roughly contemporaneous socio political development Contributors C Clifford Boyd Jr James A Brown R P Stephen Davis Jr John House John E Kelly Richard A Kerber Dan F Morse Phyllis Morse Martha Ann Rolinson Gerald F Schroedl Bruce D Smith Paul D Welch Howard D Winters *The Mississippian Emergence* Bruce D. Mississippian Spread Robert A. Cook, Aaron R. Comstock, 2022-06-29 This book is the first to specifically trace the movement of Mississippian maize farmers throughout the US Midwest and Southeast By providing a backdrop of shifting climatic conditions during the period this volume also investigates the relationship between farmers and their environments Detailed regional overviews of key locations in the Mississippi Valley the Ohio Valley and the peripheries of the Mississippian culture area reveal patterns and variation in the expression of Mississippian culture and interactions between migrants and local communities Methodologically the case studies highlight the strengths of integrating a variety of data sets to identify migration The volume provides a broader case study of the links between climate change migration and the spread of agriculture that is relevant to archaeologists and anthropologists studying early agricultural societies throughout the world Key patterns of adaptation to and mitigation of the effects of droughts for example provide a framework for understanding the options available to societies in the face of climate change afforded by the time depth of an archaeological perspective

Epidemics and Enslavement Paul Kelton, 2007-01-01 Tracing the pathology of early European encounters with Native peoples of the Southeast this work concludes that while indigenous peoples suffered from an array of ailments before contact Natives had their most significant experience with new germs long after initial contacts in the sixteenth century Ancient Cahokia and the Mississippians Timothy R. Pauketat, 2004-06-17 Using a wealth of archaeological evidence this book outlines the development of Mississippian civilization Native Religions and Cultures of North America Lawrence Sullivan, 2003-03-28 This volume contains insightful essays on significant spiritual moments in eight different Native American cultures Absaroke Crow Creek Muskogee Lakota Mescalero Apache Navajo Tlingit Yup ik and Yurok **The**

**Macroevolution in Human Prehistory** Anna Prentiss, Ian Kuijt, James C. Chatters, 2009-09-18 Cultural evolution much like general evolution works from the assumption that cultures are descendent from much earlier ancestors Human culture manifests itself in forms ranging from the small bands of hunters through intermediate scale complex hunter gatherers and farmers to the high density urban settlements and complex polities that characterize much of today's world The chapters in the volume examine the dynamic interaction between the micro and macro scales of cultural evolution developing a theoretical approach to the archaeological record that has been termed evolutionary processual archaeology The contributions in this volume integrate positive elements of both evolutionary and processualist schools of thought The approach as explicated by the contributors in this work offers novel insights into topics that include the emergence stasis collapse and extinction of cultural patterns and development of social inequalities Consequently these contributions form a stepping off point for a significant new range of cultural evolutionary studies

Archaeology of Prehistoric Native America Guy E. Gibbon, 2022-01-26 First published in 1998 Did prehistoric humans walk to North America from Siberia Who were the inhabitants of the spectacular Anasazi cliff dwellings in the Southwest and why did they disappear Native Americans used acorns as a major food source but how did they get rid of the tannic acid which is toxic to humans How does radiocarbon dating work and how accurate is it Written for the informed lay person college level student and professional Archaeology of Prehistoric Native America An Encyclopedia is an important resource for the study of the earliest North Americans including facts theories descriptions and speculations on the ancient nomads and hunter gathers that populated continental North America

**The Real Mound Builders of North America** A. Martin Byers, 2018-02-02 The Real Mound Builders of North America takes the standard position that the cultural communities of the Late Woodland period hiatus when little or no transregional monumental mound building and ceremonialism existed were the linear cultural and social ancestors of the communities responsible for the monumental earthworks of the unique Mississippian ceremonial assemblage and further these Late Woodland communities were the direct linear cultural and social descendants of those communities responsible for the great Hopewellian earthwork mounds and embankments and its associated unique ceremonial assemblage Byers argues that these communities persisted largely unchanged in terms of their essential social structures and cultural traditions while varying only in terms of their ceremonial practices and their associated sodality organizations that manifested these deep structures This continuist historical trajectory view stands in contrast to the current dominant evolutionary view that emphasizes abrupt social and cultural discontinuities with the Hopewellian ceremonial assemblage and earthworks mounds and embankments

Some contributors with enormous reputations in this collection Joyce Isbell Marcus Preucel **The Global Spanish Empire** Christine Beaulieu, John G. Douglass, 2020-04-21 The Spanish Empire was a complex web of places and peoples Through an expansive range of essays that look at Africa the Americas Asia the Caribbean and the Pacific this volume brings a broad range of regions into conversation The contributors focus on nuanced comparative exploration of the processes and practices of creating maintaining and transforming cultural place making within pluralistic Spanish colonial communities The Global Spanish Empire argues that patterned variability is necessary in reconstructing Indigenous cultural persistence in colonial settings The volume's eleven case studies include regions often neglected in the archaeology of Spanish colonialism The time span under investigation is extensive as well transcending the entirety of the Spanish Empire from early impacts in West Africa to Texas during the 1800s The contributors examine the making of a social place within a social or physical landscape They discuss the appearance of hybrid material culture the incorporation of foreign goods into local material traditions the continuation of local traditions and archaeological evidence of opportunistic social climbing In some cases these changes in material culture are ways to maintain aspects of traditional culture rather than signifiers of new cultural practices The Global Spanish Empire tackles broad questions about Indigenous cultural persistence pluralism and place making using a global comparative perspective grounded in the shared experience of Spanish colonialism Contributors Stephen Acabado Grace Barretto Tesoro James M Bayman Christine D Beaulieu Christopher R DeCorse Boyd M Dixon John G Douglass William R Fowler Martin Gibbs Corinne L Hofman Hannah G Hoover Stacie M King Kevin Lane Laura Matthew Sandra Montañón Natalia Moragas Segura Michelle M Pigott Christopher B Rodning David Roe Roberto Valcárcel Rojas Steve A Tomka Jorge Ulloa Hung Juliet Wiersema **The Savannah River Chiefdoms** David G. Anderson, 1994-11-30 This volume explores political change in chiefdoms specifically how complex chiefdoms emerge and collapse and how this process called cycling can be examined using archaeological ethnohistoric paleoclimatic paleosubsistence and physical anthropological data The focus for the research is the prehistoric and initial contact era Mississippian chiefdoms of the Southeastern United States specifically the societies occupying the Savannah River basin from ca A D 1000 to 1600 This regional focus and the multidisciplinary nature of the investigation provide a solid introduction to the Southeastern Mississippian archaeological record and the study of cultural evolution in general *The Columbia Guide to American Indians of the Southeast* Theda Perdue, Michael D Green, 2005-06-22 Though they speak several different languages and organize themselves into many distinct tribes the Native American peoples of the Southeast share a complex ancient culture and a tumultuous history This volume examines and synthesizes their history through each of its integral phases the complex and elaborate societies that emerged and flourished in the Pre Columbian period the triple curse of disease economic dependency and political instability brought by the European invasion the role of Native Americans in the inter colonial struggles for control of the region the removal of the Five Civilized Tribes to Oklahoma the challenges and adaptations of the

post removal period and the creativity and persistence of those who remained in the Southeast      Mississippian Beginnings Gregory D. Wilson, 2019-09-16 Using fresh evidence and nontraditional ideas the contributing authors of Mississippian Beginnings reconsider the origins of the Mississippian culture of the North American Midwest and Southeast A D 1000 1600 Challenging the decades old opinion that this culture evolved similarly across isolated Woodland populations they discuss signs of migrations missionization pilgrimages violent conflicts long distance exchange and other far flung entanglements that now appear to have shaped the early Mississippian past Presenting recent fieldwork from a wide array of sites including Cahokia and the American Bottom archival studies and new investigations of legacy collections the contributors interpret results through contemporary perspectives that emphasize agency and historical contingency They track the various ways disparate cultures across a sizeable swath of the continent experienced Mississippianization and came to share similar architecture pottery subsistence strategies sociopolitical organization iconography and religion Together these essays provide the most comprehensive examination of early Mississippian culture in over thirty years A volume in the Florida Museum of Natural History Ripley P Bullen Series      *The Archaeology of Events* Zackary I. Gilmore, Jason M. O'Donoghue, 2015-03-31 These perspectives are applied to a broad range of archeological contexts stretching across the Southeast and spanning more than 7 000 years of the region's pre Columbian history New data suggest that several of this region's most pivotal historical developments such as the founding of Cahokia the transformation of Moundville from urban center to vacated necropolis and the construction of Poverty Point's Mound A were not protracted incremental processes but rather watershed moments that significantly altered the long term trajectories of indigenous Southeastern societies In addition to exceptional occurrences that impacted entire communities or peoples Southeastern archaeologists are increasingly recognizing the historical importance of localized everyday events such as building a house crafting a pot or depositing shell      **Agency in Archaeology** Marcia-Anne Dobres, John Robb, 2014-06-11 Agency in Archaeology is the first critical volume to scrutinise the concept of agency and to examine in depth its potential to inform our understanding of the past Theories of agency recognise that human beings make choices hold intentions and take action This offers archaeologists scope to move beyond looking at broad structural or environmental change and instead to consider the individual and the group Agency in Archaeology brings together nineteen internationally renowned scholars who have very different and often conflicting stances on the meaning and use of agency theory to archaeology The volume is composed of five theoretically based discussions and nine case studies drawing on regions from North America and Mesoamerica to Western and central Europe and ranging in subject from the late Pleistocene hunter gatherers to the restructuring of gender relations in the north eastern US      **Common Fields** Andrew Hurley, 1997 In these pages geographers archaeologists and historians come together to consider the enduring ties between a city's diverse residents and the physical environment on which their well being depends      **An Archaeology of the Cosmos** Timothy R. Pauketat, 2013 An Archaeology of the Cosmos seeks answers

to two fundamental questions of humanity and human history The first question concerns that which some use as a defining element of humanity religious beliefs Why do so many people believe in supreme beings and holy spirits The second question concerns changes in those beliefs What causes beliefs to change Using archaeological evidence gathered from ancient America especially case material from the Great Plains and the pre Columbian American Indian city of Cahokia Timothy Pauketat explores the logical consequences of these two fundamental questions Religious beliefs are not more resilient than other aspects of culture and society and people are not the only causes of historical change An Archaeology of the Cosmos examines the intimate association of agency and religion by studying how relationships between people places and things were bundled together and positioned in ways that constituted the fields of human experience This rethinking theories of agency and religion provides readers with challenging and thought provoking conclusions that will lead them to reassess the way they approach the past

**Archaeology in America** Linda S. Cordell, Kent Lightfoot, Francis McManamon, George Milner, 2008-12-30 The greatness of America is right under our feet The American past the people battles industry and homes can be found not only in libraries and museums but also in hundreds of archaeological sites that scientists investigate with great care These sites are not in distant lands accessible only by research scientists but nearby almost every locale possesses a parcel of land worthy of archaeological exploration Archaeology in America is the first resource that provides students researchers and anyone interested in their local history with a survey of the most important archaeological discoveries in North America Leading scholars most with an intimate knowledge of the area have written in depth essays on over 300 of the most important archaeological sites that explain the importance of the site the history of the people who left the artifacts and the nature of the ongoing research Archaeology in America divides its coverage into 8 regions the Arctic and Subarctic the Great Basin and Plateau the Great Plains and Rocky Mountains the Midwest the Northeast the Southeast the Southwest and the West Coast Each entry provides readers with an accessible overview of the archaeological site as well as books and articles for further research
