State launches comprehensive job matching Web site

Thanks to the efforts of Missouri Enterprise, job seekers now have a comprehensive online job matching Web site.

Missouri Enterprise, the state's workforce development agency, has created a comprehensive online job matching Web site, GreatHires.org. The site is a free resource for job seekers and employers, providing a comprehensive database of job openings and a platform for job seekers to apply for positions.

Job seekers can quickly identify positions

that match their skills and interests. The site also provides a comprehensive database of job openings, including positions in various industries and sectors. Job seekers can search for positions by location, industry, and job type. The site also provides a platform for job seekers to apply for positions, making it easier for employers to find qualified candidates.

The Opportunities for and Constraints to Organizational Development in the Information Society Adam Stabryła,2012

An Ethics Beyond Kevin Richard Kaiser,2019-07-22 This study examines the fiction of contemporary American author George Saunders in terms of how it presents situations applicable to the chief notions of posthumanist ethics and how these conceptions concern nonhuman animals which are prevalent in his writing Posthumanist ethics can help us understand what is at play in Saunders s fiction Meanwhile his texts can help us understand what is at stake in posthumanist ethics This interdisciplinary project may be beneficial both to conceiving new notions of ethics that are more

inclusive and more implicitly to understanding the relevance of Saunders's fiction to the current American sociocultural climate

Machine Learning for Neurodegenerative Disorders Biswajit Jena, Sanjay Saxena, Sudip Paul, 2025-03-31 This book explores the application of machine learning to the understanding, early diagnosis and management of neurodegenerative disorders. With a specific focus on its role in ongoing clinical trials, the book covers essential topics such as data collection, pre-processing, feature extraction, model development and validation techniques. It delves into the applications of neuroimaging techniques like magnetic resonance imaging (MRI), computed tomography (CT) and positron emission tomography (PET) in the diagnosis and understanding of neurodegenerative disorders. Additionally, the book examines various machine learning algorithms employed for biomarker discovery in neurodegenerative disorders. It highlights the role of neuroinformatics and big data analysis in advancing the understanding and management of neurodegenerative disorders. Furthermore, the book reviews future prospects and presents the ethical considerations and regulatory challenges associated with implementing machine learning approaches in the diagnosis, treatment and prevention of neurodegenerative disorders. This comprehensive resource is intended for neuroscientists, students, researchers and neurologists to understand the emerging scope of machine learning in neurodegenerative disorders.

Digital Activism in Zimbabwe Tenford Chitanana, 2024-10-21 This book investigates the role of the internet and social media in political processes in non-western and non-democratic contexts. Using Zimbabwe as a case study, the book demonstrates how activists and ordinary people deploy social media, particularly Facebook, to subvert an enduring hegemonic state. However, the book also highlights how authoritarian regimes are in turn learning and adapting to the information age, challenging the impact of digital activism. Studies of digital activism in the Global South are often centred around democracy, but this book paints a more complex picture, examining the role and effect of digital activism in challenging state hegemony in authoritarian contexts. The book notes that while communication technologies help mediate activism, they are also simultaneously constrained by pre-existing and emergent challenges tied to the social and political context and the inherent limitations of those technologies. The book investigates the tactics used by digital activists, the contextual factors and restrictive political environment they operate in, including the role of pro-government activists and ultimately the impact of digital activism given these constraints. From the case of Zimbabwe, the book builds out a broader theoretical analysis of the evolution of third-world protest in the digital age, examining the limitations of activists' actions and the ideological deficit in online activism to ferment a virulent counter-hegemony.

High-performance Construction Materials: Science And Applications Caijun Shi, Yi-lung Mo, 2008-06-11 This book describes a number of high-performance construction materials including concrete, steel fiber reinforced cement fiber reinforced plastics, polymeric materials, geosynthetics, masonry materials and coatings. It discusses the scientific bases for the manufacture and use of these high-performance materials. Testing and application examples are also included, in particular the application of relatively new high-performance construction materials to design practice. Most books dealing with

construction materials typically address traditional materials only rather than high performance materials and as a consequence do not satisfy the increasing demands of today's society. On the other hand, books dealing with materials science are not engineering oriented with limited coverage of the application to engineering practice. This book is thus unique in reflecting the great advances made on high performance construction materials in recent years. This book is appropriate for use as a textbook for courses in engineering materials, structural materials and civil engineering materials at the senior undergraduate and graduate levels. It is also suitable for use by practice engineers including construction materials, mechanical and civil engineers.

Plaque Imaging Jasjit S. Suri, 2005. This publication starts off with a review of plaque imaging techniques with an introduction of the segmentation techniques for plaque classification and quantification. Many aspects of plaque imaging techniques are presented in this publication such as medical image retrieval and database management, MRI techniques to differentiate stable versus high risk atherosclerosis, composition and morphology of atherosclerotic plaque, analysis of the soft tissue based on computer vision techniques, modelling of coronary artery biomechanics, Cardiac CT for the assessment of cardiovascular pathology with an emphasis on the detection of coronary atherosclerosis, technical and practical issues regarding coronary atherosclerotic plaque imaging by CT, focussing on coronary calcium imaging, feasibility of a non-invasive in vivo determination of the IBS of arterial wall tissue, high resolution ultrasound images of carotid plaques, the problem of reliable features extraction and classification process and a discussion on advanced mathematical techniques to extract spectral information from the RF data to determine the plaque composition.

AMMTIAC Quarterly, 2010 **Everything You Need to Know About Lyme Disease and Other Tick-Borne Disorders** Karen Vanderhoof-Forschner, 2004-01-16. Keep your family safe from tick-borne infections. With millions around the world infected and millions more at risk, Lyme and other tick-related disorders are today's fastest growing infectious diseases. And while there has been much progress in combating these illnesses, we are a long way from eliminating them. Early treatment is crucial and there's no better way to get informed and be prepared to deal with these diseases than to read this book. This comprehensive guide tells you everything you need to know to protect yourself and your family from the pain of Lyme, including vital information about the new Lyme disease vaccines. Written by Lyme disease pioneer Karen Vanderhoof-Forschner, cofounder of the Lyme Disease Foundation and a Lyme sufferer herself, this updated and expanded edition provides the latest on the multiple diseases that can be transmitted in a single tick bite and the symptoms that indicate you've been infected. In easy-to-understand language, the author discusses the often controversial issues of diagnosis and treatment of Lyme while reviewing the other tick-borne diseases in North America such as Rocky Mountain Spotted Fever, tularemia, the emerging ehrlichioses, and some that are considered potential biowarfare agents. She offers expert advice on protecting yourself from disease-carrying ticks and what to do if you find one on your skin. Obtaining the best medical treatment. Accessing online information on vaccines, repellents and the latest research. Finding self-help and support.
