Challenging Neoliberalism Cal Clark,Evelyn A. Clark,2016-02-26 Neoliberalism which advocates free markets without government interference has become increasingly utilized and controversial over the last three and a half decades This book presents case studies of Chile and Taiwan two countries that seemingly prospered from adopting neoliberal strategies and finds that their developmental histories challenge neoliberalism in fundamental ways From one perspective the political economies of Chile and Taiwan might appear to be poster children for neoliberalism Both took aggressive policy actions

Taiwan in the 1960s and Chile in the 1970s to create market driven economies that were well integrated into the capitalist global economy. Subsequently these two countries were cited as economic miracles that opened their markets resulting in rapid economic growth and development. A closer examination of the two nations however turns up very significant differences between them. In particular Taiwan with its much more statist approach to development outperformed Chile by a considerable margin and some of the experiences of Chile departed markedly from neoliberal predictions. The authors argue that Taiwan's strategy was the more successful of the two primarily because it discarded the ideology of neoliberalism and unfettered laissez faire. Scholars, educators and students studying globalization, political economy and or economic development will find this book an irreplaceable addition to the discussion of neoliberalism.

This study will be of interest to students and professionals in the areas of communication, international telecommunications, companies and country governments in Latin America.

Searching for a Better Society John Sheahan, 2010-11-01. As in most of the rest of Latin America, Peruvian economic strategy has gone in something of a circle from long established orientation toward an open economy with minimal state intervention to a period of state led development then back again to what looks like the starting point. In the 1960s the Peruvian people had their first real chance to make a democratic choice between continuation of the country's open economy orientation or change; they chose change. Using this as his starting point, Sheahan explains how their choice was not provoked by any economic crisis but by other major influences. The majority of Peruvians he shows were seeking objectives more fundamental than economic growth. They were with conflicting visions but with many good reasons searching for a better society. While positive accomplishments have been important enough, what went wrong to lead Peru back to a more market determined economic system in 1990. Sheahan addresses the consequences of this return to the earlier economic strategy, what might be done to shape the process of development in Peru in Latin America more generally toward less unfair societies. *Searching for a Better Society* is different from the great majority of economic studies of developing countries in its emphasis on the basic role of social dissatisfaction with the country's traditional liberal economic system, on the complexity of social goals involved in evaluation of the choice, consequences of economic policies.
