Creative Ship Model Making Gerhard O.W. Fischer, It is often annoying that every kit model built from the same kit of the same company is like one egg from the other This is what creative ship modelling aims to change Using prefabricated hulls it is mainly a matter of the superstructure which must be redesigned sawn out and further processed and further processed without the need for a construction template The conversion of kit models shows how to convert ready built models to a completely new model by converting them to jet propulsion Finally the author presents four examples how larger display models can be converted into real driving models to properly running RC ship models by installing a remote control system From the content Construction of models according to own designs Building description of two creative models Building a police boat according to own ideas Two creative construction models The MULTIBOAT A speedboat and a mega luxury yacht Conversion of kit models The FLORIDA as a jet model The RAPIDO 600 as a jet model A customs cruiser and a fishery protection boat Conversion of display models to RC models Cruise ship QUEEN MARY 2 Sea rescue cruiser HERMANN MARWEDE German submarine class VII C American submarine GATO class REVELL RC ship model already at the end of the 50s

Cardboard model making Dr. Ulrich Böhme, Cardboard model making is probably one of the first types of model making for which kits or building sheets were offered in series For the first time many people were able to build models of real or fictitious buildings and vehicles It is interesting to note that cardboard model making even though nowadays there is an almost unlimited variety of materials available for model making is experiencing a great renaissance and an active community of cardboard model makers has developed Nowadays there is almost nothing that is not available as cardboard model building sheets whether from professional publishers or from idealistic suppliers In this book Ulrich Böhme looks at cardboard modelling from two perspectives On the one hand he describes the history of this form of model making in all its facets On the other hand he gives practical tips based on examples from the most diverse areas of cardboard model making He shows how to create a simple model and how to improve it He creates entire dioramas and restores aging historical models In short In this book he takes you into the fascinating world of cardboard model making From the content Models are contemporary witnesses Paper as a working material Early cut out and model sheets Publishing houses Which scale is the right one for me Working with paper Tools Adhesives Rounding Architectural models Aircraft Land vehicles Ships Special models Self build models Building an old shipyard hall Dioramas Restoration and storage

Building Models for Marketing Decisions Peter S.H. Leeftang, Dick R. Wittink, Michel Wedel, Philippe A. Naert, 2013-06-29 This book is about marketing models and the process of model building Our primary focus is on models that can be used by managers to support marketing decisions It has long been known that simple models usually outperform judgments in predicting outcomes in a

wide variety of contexts For example models of judgments tend to provide better forecasts of the outcomes than the judgments themselves because the model eliminates the noise in judgments And since judgments never fully reflect the complexities of the many forces that influence outcomes it is easy to see why models of actual outcomes should be very attractive to marketing decision makers Thus appropriately constructed models can provide insights about structural relations between marketing variables Since models explicate the relations both the process of model building and the model that ultimately results can improve the quality of marketing decisions Managers often use rules of thumb for decisions For example a brand manager will have defined a specific set of alternative brands as the competitive set within a product category Usually this set is based on perceived similarities in brand characteristics advertising messages etc If a new marketing initiative occurs for one of the other brands the brand manager will have a strong inclination to react The reaction is partly based on the manager's desire to maintain some competitive parity in the marketing variables

Architectural Modelmaking Second Edition Nick Dunn, 2014-09-08 The physical model is an important communication tool for architects Although the proliferation of CAD programs has enabled the creation of increasingly complex computer models and virtual environments there is also a growing need to address the three dimensional qualities of architecture that may be lost when using such media This book focuses on the inspiring possibilities for modelling the built environment with all the different media and techniques available In describing the use of different models in different contexts the book provides a practical guide to how and why models are used and what they are used for This second edition includes more detailed step by step exercises expanded discussion of materials and techniques updated coverage of digital techniques and new case studies

A History of Architectural Modelmaking in Britain David Lund, 2022-12-16 Architectural modelmakers have long carried out their work hidden behind the scenes of architectural design and in presenting a history of architectural modelmaking in Britain for the first time this book casts a new light on their remarkable skills and achievements By telling the story of the modelmakers who make architectural models rather than architects who commission and use them this book seeks to celebrate their often overlooked contribution to the success and endurance of the architectural model in Britain over the past one hundred and forty years Drawing from extensive archival research and interviews with practicing and retired modelmakers this book traces the complete history of architectural modelmaking in Britain from its initial emergence as a specialist occupation at the end of the nineteenth century through to the present day It reveals the legacy of John Thorp the first professional architectural modelmaker in Britain who opened his business in London in 1883 and charts the lives and careers of the innovative and creative modelmakers who followed him It examines the continually evolving materials tools and processes of architectural modelmaking and outlines the profound ideological economic and technological influences that have shaped the profession's development Illustrated with over one hundred photographs of architectural models from previously undocumented archives this book will be of great interest to architectural modelmakers academics and historians
