The Adopted Child Comes of Age Lois Raynor, 2021-11-07 How do adoptions really turn out How do adopted children feel about the family they were given and the opportunities they were offered To what extent do they fulfil their new parents expectations of them And does it matter whether their adoption grew out of a fostering relationship or was considered right from the start as a permanent arrangement Originally published in 1980 the major follow up study on which this book is based sought to answer these questions The research involved 160 sets of parents and over 100 of their adopted children now young adults This was in fact the largest group of adult adoptees anywhere in the world to be interviewed and studied in a systematic way As they look back over their life together the parents and the young people explain what adopting or being adopted was like for them This title offers glimpses of adoptive family life over a period of more than twenty years compares the views of the young people with those of their adopters and measures the factors which influenced the various outcomes Particular attention is paid to the basis on which the child was originally placed in order to shed light on the controversial subject at the time of whether a preliminary fostering period represents a useful safeguard The information gathered by Lois Raynor and her colleagues provided the feedback so long sought by social work teachers and by those practising social workers who had the responsibility for making long term plans for children and for approving foster home or adoption applications at the time Readers with personal experience of adoption will be interested in making their

own comparisons while prospective adopters will learn to avoid some pitfalls and to enjoy an adopted child as their own

Single Mothers and the State's Embrace Harriet M. Phinney, 2022-02-01 In the mid 1980s after the Indochina Wars a shortage of men meant that many single women in Vietnam found themselves without suitable marital prospects A number of these women chose to pursue single motherhood by asking for a child xin con asking men to get them pregnant out of wedlock Xin con appeared to be a radical departure from traditional Vietnamese kinship values and practices which were based in Confucian patriarchal and patrilineal reproductive interests However this innovative solution was rooted in both pre and postwar values practices and notions of gender kinship love and sexuality This ethnography explores the practice of xin con among single mothers in the postwar era and today and considers the ways their reproductive agency was embraced rather than rejected by the Vietnamese state as it entered the global market economy Rather than condemning or trying to restrict older single women's reproductive agency government officials enacted policies that would accommodate both the women and the state a strategy that represents an intriguing alignment of Confucian heritage Communist ideology and governing tactics and demonstrates the social power of women
