

CLASSIC LIBERALISM

This ideology started in 1776 through Adam Smith. He advocated laissez-faire system, under which the government lets the economy alone. The motto of liberalism is: "That government is best that governs less," as stated by Thomas Jefferson.

CLASSIC CONSERVATISM

The best practices and institutions in history should be conserved, and change must be gradual. Our society needs standards of morality in order to contain the irrational passions of men.

MARXIST SOCIALISM

The advocate of this was Karl Marx. There are two classes: bourgeoisie or the capitalists, who owns the means of production and the proletariat are the majority who work for the elite class.

MODERN LIBERALISM

The government should step into the marketplace to guarantee the freedom to live an adequate level.

MODERN CONSERVATISM

This is the ideology that continues its allegiance to Adam Smith's original doctrine of minimal government.

SOCIAL DEMOCRACY

The social democrats use "welfare" to improve the living conditions of the people. However, welfare states have to impose high taxes in order to pay for welfare measures.

COMMUNISM

This is also known as Marxism-Leninism. It is focused on the proletariat rising up against the bourgeoisie.

NEOCONSERVATISM

A protest against the alleged excesses of the welfare state, which is perceived to encourage a class of poor people dependent on welfare, with little incentive to work.

FEMINISM

The ideology that the law should guarantee equality of treatment regardless of gender.

ENVIRONMENTALISM

The ideology that the people should live in balance with nature, rather than destroy it. The environmentalists call themselves "Green".

NATIONALISM

It has been described as exaggerated belief in the greatness and unity of one's country. The engine of nationalism is the passionate feeling that it is wrong to be ruled by others.

RELIGIOUS FUNDAMENTALISM

Political and social lives should be based on the original religious principles, which are supported by a belief in the literal truth of sacred texts.

COMMUNITARIANISM

It advocates the need to revive communities, as institutions between the state and the individual.

Paul's Letter to the Romans and Roman Imperialism Ian E Rock, 2017-05-25 Ian E Rock demonstrates that the Letter to the Romans may be seen as an attempt by a subordinate group to redress actual and potential issues of confrontation with the Empire and to offer hope even in the face of death Paul demonstrates that it is God s peace and not Rome s peace that is important that loyalty to the exalted Jesus as Lord and to the kingdom of God not Jupiter and Rome leads to salvation that grace flows from Jesus as Christ and Lord and not from the benefactions of the Emperor If the resurrection of Jesus the

crucified criminal of the Roman Empire demonstrates God's power over the universe and death the very instrument of Roman control then the Christ believer is encouraged to face suffering and death in the hope of salvation through this power Paul's theology emerges from and is inextricably bound to the politics of his day the Scriptures of his people and to the critical fact that the God who is One and Lord of all is still in charge of the world

A General Theory of Institutional Change

Shiping Tang, 2017-07-05 Institutional change is a central driving force behind social changes and thus a central topic in all major fields of social sciences Yet no general theory of institutional change exists Drawing from a diverse literature this book develops a general theory of institutional change based on a social evolutionary synthesis of the conflict approach and the harmony approach The book argues that because the whole process of institutional change can be understood as a process of selecting a few ideas and turning them into institutions competition of ideas and struggle for power to make rules are often at the heart of institutional change The general theory not only integrates more specific theories and insights on institutional change that have been scattered in different fields into a coherent general theory but also provides fundamental new insights and points to new directions for future research This book makes a fundamental contribution to all major fields of social sciences sociology sociological theory political sciences institutional economics and political theory It should be of general interest to scholars and students in all major fields of social science

Leverage of the Weak Hwa-Jen Liu, 2015-07-21

Comparing Taiwan and South Korea strategically Hwa Jen Liu seeks an answer to a deceptively simple question Why do social movements appear at different times in a nation's development Despite their apparent resemblance a colonial heritage authoritarian rule rapid industrialization and structural similarities Taiwan and South Korea were opposites in their experiences with two key social movements South Korea followed a conventional capitalist route labor movements challenged the system long before environmental movements did In Taiwan pro environment struggles gained strength before labor activism Liu argues that part of the explanation lies in an analysis of how movements advance their causes by utilizing different types of power Whereas labor movements have the power of economic leverage environmental movements depend on the power of ideology Therefore examining material factors versus ideational factors is crucial to understanding the successes or failures of social movements *Leverage of the Weak* is a significant contribution to the literature on social movements to the study of East Asian political economies and to the progress of the comparative historical method It enhances knowledge of movement emergence investigates the possibilities and obstacles involved in forging labor environment alliances and offers the first systematic multilayered comparisons across movements and nations in East Asia

Culture of Crisis and Extinction Kim Thu Le, 2024-10-14

Culture of Crisis and Extinction Idealism and Ideology Expressed in Arts and Architectural Forms explores the mythology of cultures in crisis tracing the symptoms that lead to their destruction and eventual extinction Through a comprehensive range of research methods and strategies tailored to each fieldwork project this book investigates cultural phenomena across various environments It uncovers significant historical

meanings that are often hidden or absent from mainstream publications. By analyzing cultural transitions through economic, political, and ethnic lenses across Europe and Asia, the book provides an in-depth examination of collective action and the root causes of cultural crises. Spanning six chapters, it identifies the myths surrounding cultural conflicts and crises of extinction, challenging the assumption that poverty and suffering are definitive indicators of such crises. Instead, it presents cultural extinction as a gradual process stemming from a culture's failure to adapt to its changing environment. The book considers how injustice, economic misalignment, and systemic inequalities such as unnecessary poverty, illness, and religious discrimination contribute to cultural collapse. When these injustices become ingrained within a society's institutions, the eventual disappearance of the culture becomes inevitable unless transformative change is initiated.
