Patterns In Action:

Spatial Temporal Patterns for Action-Oriented Perception in Roving Robots Paolo Arena, Luca Patanè, 2008-12-19

The basic principles guiding sensing perception and action in bio systems seem to rely on highly organised spatial temporal dynamics In fact all biological senses visual hearing tactile etc process signals coming from different parts distributed in space and also show a complex time evolution As an example mammalian retina performs a parallel representation of the visual world embodied into layers each of which represents a particular detail of the scene These results clearly state that visual perception starts at the level of the retina and is not related uniquely to the higher brain centres Although vision remains the most useful sense guiding usual actions the other senses first of all hearing but also touch become essential particularly in cluttered conditions where visual percepts are somehow obscured by environment conditions Efficient use of hearing can be learnt from acoustic perception in animals insects like crickets that use this ancient sense more than all the others to perform a vital function like mating

Action Patterns in Business Process Models Sergey Smirnov, Weidlich, Matthias, Mendling, Jan, Weske, Mathias, 2009 Business process management experiences a large uptake by the industry and process models play an important role in the analysis and improvement of processes While an increasing number of staff becomes involved in actual modeling practice it is crucial to assure model quality and homogeneity along with providing suitable aids for creating models In this paper we consider the problem of offering recommendations to the user during the act of modeling Our key contribution is a concept for defining and identifying so called action patterns chunks of actions often appearing together in business processes In particular we specify action patterns and demonstrate how they can be identified from existing process model repositories using association rule mining techniques Action patterns can then be used to suggest additional actions for a process model Our approach is challenged by applying it to the collection of process models from the SAP Reference Model

An Actological Metaphysic Malcolm Torry, 2023-12-27 An actology introduced by the first book in this series Actology Action Change and Diversity in the Western Philosophical Tradition understands reality as action in changing patterns Actological Readings in Continental Philosophy reads a number of continental philosophers through this lens and An Actology of the Given explores the concepts of the gift givenness and giving in the light of reality understood as action in changing patterns Mark's Gospel An Actological Reading is what it says it is This fifth book in the series An Actological Metaphysic is a more systematic treatment of cosmology and of such concepts as truth knowledge causality time space life and society to see what happens when they are understood actologically that is with reality understood as action in changing patterns
