Designs on Democracy Neal Shasore, 2022-08-22 *Designs on Democracy* examines a pivotal period in the formation of the modern profession of architecture in Britain It shows how architects sought to meet the newly articulated demands of a mass democracy in the wake of the First World War It does so by providing a vivid picture of architectural culture in interwar London the Imperial metropolis drawing on histories of design practice professionalism and representation Most accounts of this period tend to deal exclusively with the emergence of Modernism this study takes a different approach encompassing a much broader perspective on the liberal professional consensus that held sway including architecture s mainstream and its so called avant garde Readers will encounter a number of unexpected narratives episodes and projects from the British Empire Exhibition at Wembley to the rebuilding of Waterloo Bridge from the impact of the Great Slump to the passing of the first Architects Registration Act 1931 from Trystan Edwards s radical housing campaigns to the Londoners League s unorthodox preservationism Pulling in a range of evidence and sources periodicals exhibitions photographs and films alongside architecture it evokes architectural culture by listening carefully to the tenor of its discourse Architecture s public realm is thus analysed through sometimes surprising phrases manners to understand ideals of public propriety vigilance to explore public proprietorship slump to contextualise the emergence of public relations machine craft to understand the forging of public institutions The volume spans the excitable discussions about the reconstruction of the profession for a democratic age after WWI to reconstruction and planning following WWII providing an ambitious revision of how we can understand twentieth century architecture in Britain
