Beheim,G.S. Rajwar,M. Haigh,J. Krecek,2012-03-05 Headwaters are fragile environments threatened by anthropogenic actions The regeneration of headwaters calls for a practical approach through integrated environmental management This book discusses various issues concerning headwater regions of the world under wide ranging themes climate change impacts vegetal cover sub surface hydrology catchment and streamflow hydrology pollution water quality and limnology remote sensing and GIS environmental impact assessment and mitigation socio economic impacts public participation education and management and integrated watershed management This book aims to bring about an awareness in sustainable regeneration of headwater regions and particularly highlighting the problems of environmental management in highlands and headwaters These regions consist of great reserves of natural resources which need to be exploited and managed sustainably **From Headwaters to the Ocean** Makoto Taniguchi,William C. Burnett,Yoshihiro Fukushima,MARTIN HAIGH,Yu Umezawa,2008-09-11 The vulnerability of water resources due to climate change and human activities is globally increasing The phenomenon of hydrological change is complicated because of the combinations and interactions between natural climate fluctuation global warming and human activities including changes in land utilization The impact areas of hydrological changes are also not only within the basin but reach to the ocean through coastal water exchanges This book presents contributions focused on integrated water management from headwater to the ocean in a time of climate change and increasing population **The Protected Landscape Approach** Jessica Brown,Nora J. Mitchell,Michael Beresford,2005 The traditional patterns of land use that have created many of the world s cultural landscapes contribute to biodiversity support ecological processes provide important environmental services and have proven sustainable over the centuries Protected landscapes can serve as living models of sustainable use of land and resources and offer important lessons for sustainable development Examples of these landscapes and the diverse strategies

needed to maintain this essential relationship between people and the land are provided      **The Regional Travel Guide for Silesia (Czechia) ,      Regional Approaches to Water Pollution in the Environment** P.E. Rijtema,V. Eliás,2012-12-06 Regional Approaches to Water Pollution in the Environment integrates knowledge and experience on pollution problems related to industrial agricultural and municipal activities and former military sites with special emphasis on the Black Triangle the region situated at the borders between North Bohemia Polish Lower Silesia and South Saxony Here some five million inhabitants live in an area of brown coal basins having the highest emissions of sulphuric and nitrogen emission in the whole of Europe The large scale damage in this region is due to obsolete technology and insufficient equipment for monitoring emissions Health effects are severe and controlling the pollution can only be done at high cost There is thus a need to exchange knowledge and experience on methods for evaluating the expected effects of measures and purification techniques to remedy ground and surface water pollution      *The complete camper guide for The Czech Republic ,      Region Around the Jizera* Jana Scheybalová,Josef V. Scheybal,Bohumil Jakoubě,1995      **OECD Regional Development Studies Urban-Rural Linkages in Poland** OECD,2022-06-27 The OECD report Urban Rural Linkages in Poland analyses the potential of urban and rural territories for development and improved well being Urban and rural areas have different yet often complementary assets and their better integration is important for socio economic and environmental performance      **Landscapes and Landforms of the Czech Republic** Tomáš Pánek,Jan Hradecký,2016-03-08 The book aims to present the unique geomorphological landscapes of the Czech Republic The geomorphic uniqueness of this country benefits from the proximity to two distinct European geological domains the old cratonized Bohemian Massif and the relatively young Tertiary fold and thrust belt of the Western Carpathians Landscapes and Landforms of the Czech Republic introduces general physiographical characteristics of the landscape and presents the main driving factors leading to the evolution of the present landscape The book contains twenty two chapters describing the most interesting geomorphic landscapes of the Czech Republic The selection of individual landscapes was based on visual exceptionality e g sandstone landscapes of the Northern Bohemia scientific importance e g patterned grounds in the Sudetic Mountains and historical relevance e g mining of the N zk and Hrub Jesen k Mountains The final chapters of the book discuss the protection of geomorphic heritage in the Czech Republic      **Digital Soil Mapping with Limited Data** Alfred E. Hartemink,Alex B. McBratney,Maria de Lourdes Mendonça-Santos,2008-07-11 Significant technological advances have been few and far between in the past approximately one hundred years of soil survey activities Perhaps one of the most innovative techniques in the history of soil survey was the introduction of aerial photographs as base maps for land mapping which replaced the conventional base map laboriously prepared by planimeter and alidade Such a relatively simple idea by today's standards revolutionized soil surveys by vastly increasing the accuracy and efficiency Yet even this innovative approach did not gain universal acceptance immediately and was hampered by a lack of aerial coverage of the world funds to cover the costs and in

some cases a reluctance by some soil mappers and cartographers to change Digital Soil Mapping DSM which is already being used and tested by groups of dedicated and innovative pedologists is perhaps the next great advancement in delivering soil survey information. However like many new technologies it too has yet to gain universal acceptance and is hampered by ignorance on the part of some pedologists and other scientists. DSM is a spatial soil information system created by numerical models that count for the spatial and temporal variations of soil properties based on soil formation and related environmental variables (Lagacherie and McBratney 2007).

**Natural Groundwater Quality** W. Mike Edmunds, Paul Shand, 2009-01-26 This text presents a series of thematic chapters together with chapters on representative groundwater systems in Europe which illustrate the main processes and evolution of water quality. Brings together the research of a consortium of leading European scientists who have conducted detailed studies of water quality in Europe. Includes a synthesis of findings highlighting the thematic and regional results with recommendations regarding aquifer evaluation indicators monitoring and drinking water standards. Creates a key reference work on natural water quality of aquifers at a time when the Groundwater Directive (GD) will shortly be brought in to supplement The European Water Framework Directive (WFD) to ensure good status of groundwater.

**Ecosystem Services of Headwater Catchments** Josef Křeček, Martin Haigh, Thomas Hofer, Eero Kubin, Catrin Promper, 2017-07-12 This book addresses the evaluation of environmental impacts and services identified in headwaters of different eco zones around the world. It presents 24 papers selected from contributions to recent meetings of the European Forestry Commission Working Party on the Management of Mountain Watersheds which is coordinated by the FAO Food and Agriculture Organization of the United Nations. Through its biennial sessions and inter session activities the Working Party focuses on the continuous exchange of knowledge and experience between professionals in Europe and other regions of the world confronted with similar issues. The contributions have been updated and peer reviewed and the interdisciplinary team of authors includes experts from the fields of geography hydrology chemistry biology forestry ecology and socio economics. The participatory management of headwater catchments in Europe Africa America and Asia was the central theme of the articles which were divided into four sessions: 1 Headwater Environment and Natural Resources 2 Enhancing Environmental Services in Headwaters 3 Environmental Services in the Changing World and 4 New Challenges for Environmental Education and Active Citizenship. The practical applications shown in the book address the multi resource concept. The book offers a unique and valuable resource for environmentalists engineers watershed planners and policymakers alike.

**Considerations of Territorial Planning, Space, and Economic Activity in the Global Economy** Arias Gomez, Helmuth Yesid, Antošová, Gabriela, 2023-01-23 Economic activity is embedded in specific surroundings and ultimately these conditions determine productivity and efficiency. However the use of space in the formal models has been troublesome but in practical activity the territory is a crucial determinant when the agents make economic decisions. The interaction between economic activity
