Regional Economic Policy H. Folmer, 2012-12-06 Impact analysis of economic policy is a subject which is gaining in creasing interest in both theoretical and applied economic research Two main reasons for the growing interest can be distinguished First the situation of the government s finances is making it more than ever necessary to assess critically the effects of the instruments used to pursue public policy goals Secondly because of the economic stagnation government will be increasingly appealed to for support Impact analysis however is hampered by three major problems methodological deficiencies lack of econometric approaches which have been adapted to the specific conditions of this kind of analysis and data availability The present book deals with these problems in the context of regional economic policy However the main findings are broadly applicable in various other fields This book is primarily oriented towards those who have a practical interest Therefore attention is mostly paid to the practical aspects of the methodology and the measurements methods Furthermore the methodologi cal and econometric parts are supplemented by two extensive case studies Three people have contributed constructive criticisms and suggestions on some chapters of the book Peter Nijkamp Theo Dijkstra and Manfred Fischer I am very grateful for their support They of course share no blame for any deficiencies in the present form of the book I also gratefully acknowledge the assistance of Harry Barkema and Marja Schuring with the computations

Regional Economic Policy and Its Analysis Harvey Armstrong, Jim Taylor, 1982 Regional Economic Growth: Theory and Policy Horst Siebert, 1969 **Regional Economic Modeling: A Systematic Approach to Economic Forecasting and Policy**

Analysis G.I. Treyz, 2014-03-14 Regional economic models are the key to predicting the effects of transportation economic development energy fiscal and environmental policies Despite this the principal regional economic policy analysis model used throughout the United States by government agencies universities and the private sector has not been presented in a book until now The approach to building understanding and using regional models presented in *Regional Economic Models A Systematic Approach to Forecasting and Policy Analysis* is progressive It begins with the simplest possible models and concludes with a full presentation of the leading model used by policy makers today The full details are presented along with facilitating software which is made available so that the reader can build a prototype model for any state or country and can perform policy simulations with full operational models for a sample area Policy studies are discussed that have been carried out with the model as well as the range of ways in which policies can be tested through policy simulations The necessary background is developed for understanding the ways in which models can be used to improve the basis upon which policies

are evaluated as well as the sensitivity of the predicted effects to the model chosen for the analysis The presentation is multifaceted and includes equations diagrams and numerical examples The professional literature is integrated with introductory materials to produce the first comprehensive book on regional modeling that extends from economic base models to modeling advances that are currently being published in economic journals Regions in Recession and Resurgence Michael Chisholm, 2015-03-27 The world economy has undergone rapid evolution in recent decades along with changes in the importance of industries and their organization and sharp changes in the fortunes of regions There are differences of opinion regarding the mainsprings of change and development and the role of governments in fostering national output In order to show the relevance of these changes to regional economies the book focuses on the different schools of economic thought from the neo classical through Keynesian to Marxist radical ideas and monetarist supply side thinking providing a brief description of their structure in non spatial terms The way these theories map into contrasting ideas regarding the mechanisms of regional economic growth is then explained The book concentrates on developed economies and explicitly seeks to confront theory with fact fact with theory Bringing together non spatial economic theory regional growth theory and relevant empirical data this book is intended for students in geography and regional economics but will also be of interest for those studying politics and government China's Policymaking for Regional Economic Cooperation Yang Jiang, HENRIETTA LEYSER, 2013-11-01 Using first hand interview data Yang Jiang reveals the key trends of China's trade and financial politics after its WTO accession In particular she highlights the influence of competing domestic interests government agencies and different ideas on China's foreign economic policy **Regional Economic Policy** Akbar Tavakoli-Qinani, 1983 Handbook of Regional Growth and Development Theories Roberta Capello, Peter Nijkamp, 2010-01-01 This Handbook is essential reading for anyone with an interest in the explanation of economic growth in the space economy The editors and the individual contributors are to be congratulated on producing such an important collection of review essays which is destined to become one of the definitive reference books on the subject John McCombie Scienze Regionali offers a valuable up to date overview of many aspects of these important theoretical developments Peter Wood Environment development theories of innovation knowledge and space and regional production factors and growth theories and space This book will be a source of reference and information for both scholars and students in the area of regional economics **High Technology Development in Regional Economic Growth** Byung-Rok Choi, 2003 Korea has had considerable success in developing its high technology industries and these have become significant employers in this region By analyzing the situation in Korea this book explores the effects of dynamic externalities on the growth of regional employment in the high technology industries It puts forward innovative simultaneous equation models to test three sets of hypotheses related to so called Jacobs and MAR effects differentiated by firm size organizational type and product Clear evidence is found for endogenous technological progress marked by positive feedback especially for small firms in diversified

high technology enclaves There are technological externalities associated with knowledge spillovers and local employment has indirect effects on employment growth via dynamic externalities The implications for local economic development policy are outlined in a concluding section *Targeting Regional Economic Development* Stephan J. Goetz, Steven Deller, Tom Harris, 2009-03-25 Targeting regional economic development TRED has a long and rich tradition among academic economists and in the world of economic development practitioners This book builds on a series of workshops and papers organized by The Northeast Regional Center for Rural Development NERCRD at the Pennsylvania State University and the Rural Policy Research Centre RUPRI at the University of Missouri Through the coordinated efforts of NERCRD and RUPRI a network of university based researchers and Extension education specialists was developed and provides the foundation of this new edited volume For the first time in a single book Goetz Deller and Harris present an innovative approach through a collection of chapters discussing industry targeting and the relevance of TRED as an important analytical tool for practical targeting purposes The papers present issues surrounding community economic development clusters in industry and rural communities and the role of agglomeration economies The book provides the reader with insights into not only the theoretical foundations of targeting as well as empirical methods but also approaches for using the community level analysis to affect policy directions **Regional Economic Policy**, 1974 **Regional Economic Development and Policy** David Pinder, 2017-09-05 Originally published in 1983 when Europe's economies were facing the worst recession since the 1930s this book reviews the outcome of a quarter of a century of research and practical experience in the field of regional economic management In the spatial context of the European Community the author explores central issues by integrating the results of his own research with those of economists geographers economic historians and psychologists It provides a wide survey of the subject demonstrates the complexity of the spatial economic systems which the regional economic planner seeks to modify analyses the strategies for regional development employed by national and international agencies and offers a substantial annotated bibliography Contradictions arising from the contrasting spatial perspectives of national governments and the European Commission are emphasised Among other things it concludes that many regional problems strongly reflect perception and behavioural factors as well as purely economic constraints **Regional Economic Policy for Developing Areas** John R.
