Globalizing World Christopher C. White,2015-10-08 In Immigration and Regional Integration in a Globalizing World Christopher White makes an important contribution to the immigration debate by investigating the relationship between two of the most important forces shaping the current international system international migration and regional integration The ability to manage the movement of people across national borders is considered one of the primary responsibilities of the nation state but international migration always involves more than one country The world has become increasingly globalized

and international migration has followed suit. The vast majority of states have come to realize that successful and effective migration policies involve cooperation and coordination with other states sometimes by choice and sometimes by necessity. However, these efforts both regionally and globally are often highly contentious and result in conflict internally and externally. Managing migration and integration are key concerns for governments in nearly every region of the world and will take on even greater importance as globalization and technological advances shrink distances and bring us closer together. White uses an evidence-based approach to understanding immigration and economic integration to debunk the migration myth that sees a strong connection between these two factors. Contrary to prevailing assumptions, the main argument is that there is no substantial relationship between the international migration and regional integration despite the political rhetoric that generates enormous fear and anxiety surrounding these issues. Instead of conflating them, countries can consider the benefits of integration policies without worrying about migration and can consider migration policies without concern for integration. This book is for anyone concerned about the issue of immigration and its relationship to trade liberalization and regional integration.

**International Remittance Payments and the Global Economy** Bharati Basu, James T. Bang, 2014-08-07

International Remittance Payments are described mainly as money sent by immigrants to their families and friends in their home countries. These payments provide an important source of income that is mostly used to provide for a variety of basic needs of the non-migrating members of immigrant families and thus remittance payments can be considered as a tool to reduce the poverty level of the labor-sending countries. However, remittances are also used for asset accumulation by some families and for some countries they constitute a good part of foreign funds coming into the country. In spite of their increasing volume over the last few decades, a lot of things about remittances are not known and studies estimate that about half of these money transfers are not even recorded. Since these payments are shown to reduce poverty and help economic progress in the remittance-receiving countries, a better knowledge about remittances would help the debates surrounding immigration, remittances, and their relation to the global economy. This book provides an overview of remittances in different parts of the world over the last thirty years. It looks at the labor-sending and labor-receiving countries separately. The text examines the trends, uses, motivations behind sending remittances, cost of sending them, and how they are affected by the nature and the development level of different institutional factors. The remittance flows are growing over time and they are used mostly for reducing the uncertainty of life in the less developed parts of the world. However, motivation for sending remittances could be improved and thus remittances could be more conducive to economic development if 1) the relation between the remittance decision and the migration decision is better understood and 2) the costs of international money transfers are reduced. More studies about those issues would benefit the international community. Efforts should be made in all fronts to encourage such international flow of funds not only to have a redistribution of income all over the world but also to synchronize the efforts towards global economic development and a better integration of the world economy. This book is
