Regional Frequency Analysis An Approach Based On L Moments:

Regional Frequency Analysis J. R. M. Hosking, James R. Wallis, 1997-04-28 Extreme environmental events such as floods droughts rainstorms and high winds have severe consequences for human society Regional frequency analysis helps to solve the problem of estimating the frequency of these rare events at one site by using data from several sites This book is the first complete account of the L moment approach to regional frequency analysis Regional Frequency Analysis comprehensively describes the theoretical background to the subject is rich in practical advice for users and contains detailed examples that illustrate the approach This book will be of great value to hydrologists atmospheric scientists and civil engineers concerned with environmental extremes **Regional Frequency Analysis** Jonathan Richard Morley Hosking, 1997 **Regional**

Impacts of Climate Change on Rainfall Extremes and Urban Drainage Systems Patrick Willems, Jonas Olsson, Karsten Arnbjerg-Nielsen, Simon Beecham, Assela Pathirana, Ida Bulow Gregersen, Henrik Madsen, Van-Thanh-Van Nguyen, 2012-09-14 *Impacts of Climate Change on Rainfall Extremes and Urban Drainage Systems* provides a state of the art overview of existing methodologies and relevant results related to the assessment of the climate change impacts on urban rainfall extremes as well as on urban hydrology and hydraulics This overview focuses mainly on several difficulties and limitations regarding the current methods and discusses various issues and challenges facing the research community in dealing with the climate change impact assessment and adaptation for urban drainage infrastructure design and management Authors Patrick Willems University of Leuven Hydraulics division Jonas Olsson Swedish Meteorological and Hydrological Institute Karsten Arnbjerg Nielsen Technical University of Denmark Department of Environmental Engineering Simon Beecham University of South Australia School of Natural and Built Environments Assela Pathirana UNESCO IHE Institute for Water Education Ida Bulow Gregersen Technical University of Denmark Department of Environmental Engineering Henrik Madsen DHI Water Van Thanh Van Nguyen McGill University Department of Civil Engineering and Applied Mechanics *Fundamentals of Statistical Hydrology* Mauro Naghettini, 2016-10-26 This textbook covers the main applications of statistical methods in hydrology It is written for upper undergraduate and graduate students but can be used as a helpful guide for hydrologists geographers meteorologists and engineers The book is very useful for teaching as it covers the main topics of the subject and

contains many worked out examples and proposed exercises Starting from simple notions of the essential graphical examination of hydrological data the book gives a complete account of the role that probability considerations must play during modelling diagnosis of model fit prediction and evaluating the uncertainty in model predictions including the essence of Bayesian application in hydrology and statistical methods under nonstationarity The book also offers a comprehensive and useful discussion on subjective topics such as the selection of probability distributions suitable for hydrological variables On a practical level it explains MS Excel charting and computing capabilities demonstrates the use of Winbugs free software to solve Monte Carlo Markov Chain MCMC simulations and gives examples of free R code to solve nonstationary models with nonlinear link functions with climate covariates New Developments in Quantitative Psychology Roger E. Millsap, L. Andries van der Ark, Daniel M. Bolt, Carol M. Woods, 2014-02-04 The 77th Annual International Meeting of the Psychometric Society IMPS brought together quantitative researchers who focus on methods relevant to psychology The conference included workshops invited talks by well known scholars and presentations of submitted papers and posters It was hosted by the University of Nebraska Lincoln and took place between the 9th and 12th of July 2012 The chapters of this volume are based on presentations from the meeting and reflect the latest work in the field Topics with a primarily measurement focus include studies of item response theory computerized adaptive testing cognitive diagnostic modeling and psychological scaling Additional psychometric topics relate to structural equation modeling factor analysis causal modeling mediation missing data methods and longitudinal data analysis among others The papers in this volume will be especially useful for researchers graduate students and other quantitative researchers in the social sciences who use quantitative methods particularly psychologists Most readers will benefit from some prior knowledge of statistical methods in reading the chapters

Progress in Renewable Energies Offshore C. Guedes Soares, 2016-11-18 Progress in Renewable Energies Offshore includes the papers presented in the 2nd International Conference on Renewable Energies Offshore RENEW2016 Lisbon Portugal 24-26 October 2016 The scope of the book is broad covering all aspects of renewable energies offshore activities such as resource assessment wind energy wave energy tidal energy ocean energy devices multiuse platforms PTO design grid connection economic assessment installation and maintenance planning The contents of the present book are organized in these main subject areas corresponding to the sessions in the Conference The conference reflects the importance of the renewable energies offshore worldwide and is an opportunity to contribute to the exchange of information on the developments and experience obtained in concept development design and operation of these devices Progress in Renewable Energies Offshore has as main target academics and professionals working in the related areas of renewable energies

Extreme Hydrology and Climate Variability Assefa Melesse, Wossenu Abtey, Gabriel Senay, 2019-07-03 Extreme Hydrology and Climate Variability Monitoring Modelling Adaptation and Mitigation is a compilation of contributions by experts from around the world who discuss extreme hydrology topics from monitoring to modeling and management With

extreme climatic and hydrologic events becoming so frequent this book is a critical source adding knowledge to the science of extreme hydrology Topics covered include hydrometeorology monitoring climate variability and trends hydrological variability and trends landscape dynamics droughts flood processes and extreme events management adaptation and mitigation Each of the book's chapters provide background and theoretical foundations followed by approaches used and results of the applied studies This book will be highly used by water resource managers and extreme event researchers who are interested in understanding the processes and teleconnectivity of large scale climate dynamics and extreme events predictability simulation and intervention measures Presents datasets used and methods followed to support the findings included allowing readers to follow these steps in their own research Provides variable methodological approaches thus giving the reader multiple hydrological modeling information to use in their work Includes a variety of case studies thus making the context of the book relatable to everyday working situations for those studying extreme hydrology Discusses extreme event management including adaption and mitigation **In Extremis** Jürgen Kropp,Hans-Joachim

Schellnhuber,2010-11-03 The book addresses a weakness of current methodologies used in extreme value assessment i.e the assumption of stationarity which is not given in reality With respect to this issue a lot of new developed technologies are presented i.e influence of trends vs internal correlations quantitative uncertainty assessments etc The book not only focuses on artificial time series data but has a close link to empirical measurements in order to make the suggested methodologies applicable for practitioners in water management and meteorology *Advanced Tools for Studying Soil Erosion Processes*

Hamid Reza Pourghasemi,Narges Kariminejad,2024-08-17 *Advanced Tools for Studying Soil Erosion Processes* Erosion Modelling Soil Redistribution Rates Advanced Analysis and Artificial Intelligence presents the most recent technologies and methods in quantifying soil erosion focusing on quantitative geomorphological assessment soil erosion interaction with natural and man made hazards using new methods and technologies that employ GIS remote sensing RS spatial modeling and machine learning tools as an effective plan for decision makers and land users Organized into three parts 1 Erosion processes and impacts 2 Advanced computing techniques to quantify soil erosion and 3 Methods of Soil Erosion this book will be an invaluable source material for researchers academicians graduate and undergraduate students and professionals in the field of geology specifically focused on geographic information systems and remote sensing Provides an overview of soil erosion and its interaction with natural hazards i.e geological hydrological meteorological and biological Introduces advanced tools and technologies in soil erosion management Presents future soil erosion opportunities and challenges

Drought Policies: Case Studies on Mega-droughts for the High Level Experts and Leaders Panel on Water and Disasters (HELP) Jerome Delli Priscolli ,Kenzo Hiroki ,2019-11-15 This book focuses on mega droughts of the past 20 years Twelve cases from both developed and developing countries are elaborated in the book Its intention is to draw lessons from the cases of extremely severe water shortages so that countries and stakeholders can be better prepared for extreme drought events in

the future Several recurrent themes emerge from the diverse case studies and descriptions of programs For example most chapters discuss the necessity to move from reactive compensatory to preventive policies This theme has implications for use of insurance in developing countries e g is insurance encouraging investments to help countries avoid disasters or is it acting mostly in a humanitarian way to compensate for losses to help people Several authors point to the importance of risk assessment and to developing risk based policies for drought This raises statistical issues of how such assessments of uncertainty and risks are done and how they relate to actual occurrence of events Most chapters call for more inter sectoral policies policies which integrate water resources management approaches and to the necessity of raising public awareness of droughts in times of no drought The issue of structural versus nonstructural is clear in most cases While often cast as either or the message that emerges is more one of how do you integrate these approaches Finally a few chapters bring to light how prevention is needed for national security as well as water security In Focus a book series that showcases the latest accomplishments in water research Each book focuses on a specialist area with papers from top experts in the field It aims to be a vehicle for in depth understanding and inspire further conversations in the sector
