The Regional Economic Impact of Technological Change A. T. Thwaites, Raymond P. Oahey, 1985 Technological change economic implications regional development Innovation location of industry research and development public sector machinery industry information technology Graphs maps references statistical tables High-Technology Development in Regional Economic Growth Byung-Rok Choi, 2019-06-04 This title was first published in 2003 Korea has had considerable success in developing its high technology industries and these have become significant employers in this region By analysing the situation in Korea this book explores the effects of dynamic externalities on the growth of regional employment in the high technology industries It puts forward innovative simultaneous equation models to test three sets of hypotheses related to so called Jacobs and MAR effects differentiated by firm size organizational type and product Clear evidence is found for endogenous technological progress marked by positive feedback especially for small firms in diversified high technology enclaves There are technological externalities associated with knowledge spillovers and local employment has indirect effects on employment growth via dynamic externalities The implications for local economic development policy are outlined in a concluding section **Knowledge Flows, Technological Change and Regional Growth in the European Union**

Małgorzata Runiewicz-Wardyn, 2013-06-14 The book provides conceptual and empirical insights into the complex relationship between knowledge flows and regional growth in the EU The author critically scrutinizes and enhances the RIS Regional Innovation System approach discussing innovation as a technological institutional and evolutionary process Moreover she advances the ongoing discourse on the role of space and technological proximity in the process of innovation and technological externalities The book closes with an investigation of the role of technological change and knowledge spillovers in the dynamic growth and catching up of EU regions *Technology, Innovation, and Regional Economic Development*

, 1984 In recent years state and local governments universities and private sector groups have become increasingly active in promoting technological innovation and technology based business development in their local economies These efforts have resulted in productive new forms of partnership and cooperation at all levels While federal programs have sometimes supported these efforts and while recent changes in federal policy have improved the climate for high technology development initiatives in most cases both the initiative and the ongoing leadership have come from imaginative state and local leaders This five chapter report provides 1 an overview of high technology development HTD 2 a definition and analysis of high technology industries 3 a discussion of entrepreneurship and venture capital in HTD 4 a discussion of state and local government university and private sector initiatives for HTD and 5 an examination of the federal role in regional HTD Three reports are appended they concern 1 the theoretical base for high technology location and regional development 2 a regional assessment of the formation and growth in high technology firms and 3 a preliminary investigation of recent evidence on high technology industries spatial tendencies One factor examined in the latter report is the nature and diversity among high

technology industries in both growth performance and locational tendencies JN

**New Technology and Regional Development** Bert Van Der Knapp, Egbert Wever, 2003-08-16 First Published in 2004 Since the second half of the seventies a period of economic recession a growing interest for technological change can be noticed in all old industrial countries The reason for this phenomenon is the conviction that the economic future of these countries will depend to a large degree on their ability to create new products and processes and to make these commercially viable Hence the stimulation and subsidising of all kinds of Research and Development R D activities by the governments of these countries Against this background it was certainly not unexpected that the IGU Commission on Industrial Change presided by Godfrey Linge decided to organise a congress on Technology and Industrial Change This congress was held in August 1985 at Nijmegen in the Netherlands In this book some of the papers presented there are published We are very happy that we were allowed to include the very interesting contributions of the representatives of Philips in Eindhoven and of the European Commission in Brussels

**Routledge Library Editions: Economic Geography** Various, 2021-06-23 The books in this set originally published between 1968 and 1992 introduce the reader to the many lines of thought in the literature on economic geography and tie these various aspects together within the concept of the economy As well as providing a comprehensive overview of the Western European economy since the Second World War and including specific studies and assessments of the Dutch and Italian economies these volumes examine the economic factors that have shaped cities and patterns of urbanization

**Regions in Recession and Resurgence** Michael Chisholm, 2015-03-27 The world economy has undergone rapid evolution in recent decades along with changes in the importance of industries and their organization and sharp changes in the fortunes of regions There are differences of opinion regarding the mainsprings of change and development and the role of governments in fostering national output In order to show the relevance of these changes to regional economies the book focuses on the different schools of economic thought from the neo classical through Keynesian to Marxist radical ideas and monetarist supply side thinking providing a brief description of their structure in non spatial terms The way these theories map into contrasting ideas regarding the mechanisms of regional economic growth is then explained The book concentrates on developed economies and explicitly seeks to confront theory with fact fact with theory Bringing together non spatial economic theory regional growth theory and relevant empirical data this book is intended for students in geography and regional economics but will also be of interest for those studying politics and government

**New Models In Geography** Richard Peet, Nigel Thrift, 2013-10-11 First published in 1989 It seems such a long time ago another age yet it is a mere twenty odd years since the original Models in Geography was published It is an even shorter time since the first tentative steps were taken towards an alternative formulation of what might constitute a geographical perspective within the social sciences What came to be called the political economy perspective has progressed with remarkable speed and energy to generate its own framework of conceptualization and analysis its own questions and debates The papers in these two

volumes are witness to the richness and range of the work which has developed over this relatively short period within the political economy approach Moreover from being a debate within an institutionally defined discipline of geography to introducing into that discipline ideas and discussions from the wider fields of philosophy and social science and the humanities more generally it has now flowered into a consistent part of enquiries that span the entire realm of social studies

**Technological Progress and the Transformation of China's Economic Development Mode** Wen Xiao,2020-10-01

This book explores how technological progress accelerates the transformation of economic development by adopting a fundamental logical approach to technological progress intensive inputs and promotion of productive efficiency to transformation of economic development It investigates the internal mechanisms and the choice of corresponding modes that initiate technological progress to accelerate the transformation of economic development at three basic research levels micro enterprise level mid industry level and macro economy level Based on the above research the book summarizes four dimensions facilitating the transformation agricultural intensification new industrialization modernization of the service industry and the advanced manufacturing industry and linkage of the modern service industry This book is especially valuable in its hierarchical categorization covering theoretical empirical industrial and strategic exploration On one hand it analyzes the mechanisms and approaches influencing the transformation of economic development driven by technological progress from both theoretical and empirical perspectives On the other hand based on the introduction of advanced international experiences it probes into the guarantee basis for the strategic implementation and the corresponding mode choices of the transformations Furthermore it offers specific policy proposals from both the macro level of how technological progress promotes the transformation of economic development and the micro level covering the agricultural industrial and service industries

**Predicting Technology: A Practical Guide For Technology Managers and Marketing Professionals To Identify Future Market Opportunities** Thomas E. Vass ,2014-02-28

Part of the theory about predicting the direction of technology in this book builds upon work done by Clayton Christensen a professor of business at Harvard University Christensen has written many books about how multinational corporations are affected by a topic called disruptive technology

**The Social and Economic Impact of New Technology 1978-84: A Select Bibliography** Leslie

Grayson,2012-12-06 Silicon chip technology microprocessor technology information technology or quite simply new technology These are some of the names representing the microelectronics revolution depending upon the audience being addressed by speaker or writer No previous new industrial development has caused such widespread publicity and discussion amongst users and researchers as the new technology Concern is being expressed about the effects of new technology on employment job satisfaction social life leisure activities and the economics of commerce and industry The late 70s saw many doom laden predictions of those effects but by 1983 both management and trade unions were taking a more objective view of the social and economic impacts and many correspondents now see the new technology as a means of opening up new

industries and overcoming the effects of world recessions The chip has involved the factory floor the office the supermarket and the home Electronic funds transfer electronic shopping microelectronic domestic appliances word processors and microprocessor controlled machinery mean that the new technology has pervaded all aspects of social and economic life and the developed countries are now coming to accept it as part of society as a whole Inevitably the flood of literature on the social and economic impacts of new technology has been overwhelming Unfortunately the quality of information and arguments propagated at conferences in journal papers and research reports has indicated that there has been little quantifiable evidence available on the effects of these impacts Rural America and the Changing Structure of

Manufacturing ,1993 **Regional Economic Impact Analysis and Project Evaluation** H. Craig Davis,1990 This book provides a non technical introduction to the fundamental principles and techniques of regional impact and evaluation analysis The book is written for readers who have a minimal background in mathematics and economics and so the materials listed in the bibliographies have been chosen for their accessibility to such readers References to relevant papers of a more technical nature are indicated in notes in each reference Unlike existing texts which usually concentrate on regional impact or evaluation analysis Regional Economic Impact Analysis and Project Evaluation offers an extensive introduction to both these subjects since both are critical to the study and practice of regional economic analysis Two case studies intended as illustrations of practical applications are included in each of the six chapters that deal with specific principles or techniques While many of the case studies and much of the literature cited in the bibliographies is Canadian a substantial portion is from the United States and Great Britain demonstrating that the principles and techniques discussed in this book are universally applicable **State and Local Initiatives on Productivity, Technology, and Innovation** Barbara J. Lipman,1990

**Climate Change and Sustainable Development** Anil Markandya,Kirsten Halsnaes,2021-05-30 Makes a substantial contribution to the practical effective analysis of climate change mitigation options in developing countries Development And Cooperation The book is an excellent exercise and a good source of detailed information and a basis for further discussions Any person interested in this major environmental problem should read it International Journal of Environment and Pollution Markandya and Halsnaes collection is thoughtfully put together and can be recommended to all the practitioners in the fields of climate change and sustainable development The Journal of Energy Literature This text argues that the policies pursued by developing countries will be crucial in determining the progress of climate change Many are industrializing rapidly and the largest particularly China and India could have an impact at least as significant as that of the already industrialized economies the reason given by President Bush for taking the US out of the Kyoto Protocol The future of sustainable development in large measure depends on developing countries This book develops a pragmatic framework for evaluating the climate change options faced by each developing country depending on their individual circumstances It assesses present methods suggests how these might be improved and proposes ways in which social and developmental aspects can be taken

into account Its discussion of the issues and the methods presented contribute to the practical analysis of climate change mitigation options in developing countries The book should be useful to professionals governments international organizations and environmental groups working on climate change issues as well as researchers academics and students in economics environmental and development studies and international affairs *Global Challenge and Local Response* Walter B. Stöhr,1990 The volume grew out of research undertaken as a part of the UN University s European Perspectives Project It addresses the consequences of the failure of large scale industrial enterprise and the inability of central government policies to cope with the results of economic restructuring in a series of comparative case studies showing how local communities throughout Europe East and West rural and industrial have responded to economic dislocation and decline and how these local initiatives have become the basis for economic regeneration Annotation copyrighted by Book News Inc Portland OR

Theories of Local Economic Development Richard D. Bingham,Robert Mier,1993-08-24 Presenting state of the art theoretical positions on important development issues such as the inner city technological innovation and rebuilding economic infrastructure are explored in this volume The contributors to this volume drawn from various social science backgrounds explore a variety of theories and examine them in relation to the practical actions of local economic development **The Geography of Innovation** M.P. Feldman,2013-06-29 This book offers a geographic dimension to the study of innovation and product commercialization Building on the literature in economics and geography this book demonstrates that product innovation clusters spatially in regions which provide concentrations of the knowledge needed for the commercialization process The book develops a conceptual model which links the location of new product innovations to the sources of these knowledge inputs The geographic concentration of this knowledge forms a technological infrastructure which promotes information transfers and lowers the risks and the costs of engaging in innovative activity Empirical estimation confirms that the location of product innovation is related to the underlying technological infrastructure and that the location of the knowledge inputs are mutually reinforcing in defining a region s competitive advantage The book concludes by considering the policy implications of these findings for both private firms and state governments This work is intended for academics policy practitioners and students in the fields of innovation and technological change geography and regional science and economic development This work is part of a larger research effort to understand why the location of innovative activity varies spatially specifically the externalities and increasing returns which accrue to location xi Acknowledgements This work has benefitted greatly from discussions with friends and colleagues I wish to specifically note the contribution of Mark Kamlet Wes Cohen Richard Florida Zoltan Acs and David Audretsch I would like to thank Gail Cohen Shaivitz for her dedication in editing the final manuscript *Impact of State Restructuring on Indonesia's Regional Economic Convergence* Adiwan Fahlan Aritenang,2017-03-09 The creation of the ASEAN Free Trade Area AFTA in 1992 and decentralization in 1999 mark the state restructuring in Indonesia This book analyses the impact of state restructuring on

regional economic development in Indonesia between 1993 and 2010 Regional economic analysis shows persistent and severe regional disparities throughout the period Particularly econometrics study found that decentralization has accelerated regional disparities whilst the AFTA effect is insignificant on regional economic growth Furthermore historical institutionalism analysis on two cities the manufacturing industry in Batam and the creative economy in Bandung shows that past and embedded local institutions provide the capacity to adapt and create new development paths The book suggests the importance of local specific policies that embrace local knowledge and institutions to develop regional specialization and competitive advantage This book fills the gap in Indonesian literature that lacks studies on the integrated impact of decentralization and trade liberalization both economically and politically

**Technology, Regions, and Policy** John Rees, 1986 Technology Regions and Policy examines the links between technological change regional development and government policy This timely book provides a synthesis of recent scholarship the results of original research projects carried out by a distinguished group of academics It explores the complex questions of how high technology areas develop the factors influencing the spread of industrial technology and the impact of technological change on labor creation and displacement
