The Regional Multinationals Alan M. Rugman, 2005-01-06 Although many firms label themselves global very few can back this up with truly global sales and operations In *The Regional Multinationals* Alan Rugman examines first hand data from multinationals and finds that most multinationals are strongly regional with international operations in their home regions of North America the US or Asia Only a tiny proportion of the world s top 500 companies actually sell the same product and deliver the same services around the world Rugman exposes the facts behind the popular myths of doing business globally explores a variety of regional models and offers an authoritative agenda for future business strategy *The Regional Multinationals* is the essential resource for all academics and students in International Business Organization and Strategic Management as well as those with an interest in finding out how multinationals really work in practice and how future strategy must respond

Global Innovation Leadership Marc-Michael H. Bergfeld,2009 *Securing the Global Economy* Andreas Freytag,Paolo Savona,2016-04-01

Securing the Global Economy explores how and why the G8 and other institutions of global governance deal with increasingly comprehensive and complex economic security connections These connections are explored from an interdisciplinary perspective with economists political scientists and those in the policy world bringing their insights to bear Moreover this volume explores this economic security connection from a constitutional or institutional perspective In a classical liberal spirit it is concerned with the organizing principles of a liberal international economic order and the framework of rules that enables it to survive and flourish Security issues national trade policies the multilateral trade system and the detailed technical issues they subsume are analysed from this higher vantage point This is thus a work about global governance as a whole and at its core rather than a problem solving manual for a few of the issues now at centre stage Furthermore it applies this larger vision to the current G8 and global economic security agenda to generate a set of policy recommendations about how the global community through and outside the G8 can better cope with the complex interconnected challenges it now confronts Its innovative policy recommendations are especially timely when the recent global financial crisis economic recession and fragile recovery place great strains on the liberal economic order while new challenges from Iran ongoing terrorist threats and corruption make this security economic connection critically important

Location of International Business Activities Academy of International Business .,2014-12-02

In recent years an extensive range of new research has been revisiting the topic of the location of international business activities from a variety of different perspectives and background interests This work has been inspired in part by two apparently quite different but actually related contemporary trends on the one hand an emergence or revitalization of clusters of activities co located in or around selected global city regions or fast growing metropolitan areas and on the other hand an increased global dispersion of activities conducted within the value chains managed or coordinated by many large multinational enterprises and their business partners The former trend has given rise to discussions of how the elite of the cultural cognitive economy of the 21st century in Allen Scott s terminology or the creative class Richard Florida s term are now being drawn or brought back to major urban centers while the latter trend is associated with debates over outsourcing and the economic and social consequences of shifts in the ownership and location of distinct nodes of value chains once production systems become more fragmented and the component parts of such systems become more geographically dispersed An increased interest in the subject of international business location has been shown by scholars in Strategic Management in Economic Geography and in Regional Science as well as in our own interdisciplinary field of International Business Studies However as is often the

case in academic research communities these bodies of scholarship have tended to develop at something of a distance from one another each conversing internally more than they have with one another

Location of International Business Activities aims to promote a greater conversation between those interested in the topic of Location from various different backgrounds or starting points The articles are taken from a special issue on the theme of the Multinational in Geographic Space which was published by The Journal of International Business Studies in 2013

Firm-Level Internationalization, Regionalism and Globalization J. Berrill, E. Hutson, R. Sinkovics, 2011-03-04 The current international business environment is characterized by two contradictory but at times mutually supplementary trends Regionalization is part of the process of globalization but it can also be a counter force to globalization as stakeholders act to protect their perceived interests This book expands the debate on this interesting topic
