Regional Convergence in the European Union Juan R. Cuadrado-Roura, Marti Parellada, 2013-03-14 The introduction of the single currency in the European economic space constitutes without doubt the most visible step towards monetary and economic integration in the EU Those who boosted the birth of the Common Market in 1957 dreamt that this would one day come about as a logical consequence of the integration process However things have gone much more slowly than possibly imagined although if taken in an adequate historic perspective it is undeniable that the agreements that have led to European Monetary Union signify a really formidable jump in the process of political and economic integration in Europe This is something many doubted would ever happen but which is already a reality although still in need

of a period of consolidation The most general economic consequences of the EMU have already been analysed in considerable depth Proof of this is the literature already available In general there is coincidence in affirming that the balance of the results expected is clearly positive Firstly as a result of the anticipated gains in efficiency a consequence of reduction of transaction costs associated to the previous existence of different currencies and of the elimination of exchange rate uncertainties

Developments in Latin American Political Economy J. Buxton, N. Phillips, 1999-08-20 The first part of the volume addresses the changing nature and interaction of the state and the market in Latin American countries as well as the principal challenges of consolidating political and economic reform in a period of profound change The second part of the book examines a variety of traditional and non traditional political roles ranging from the military to women and from the environmental lobby to human rights It explores the ways in which the changing composition of the political debate is shaping the political arena Forward looking in its approach to volume provides readers with an indication of factors which will be of key significance in the immediate future the tensions which have yet to be resolved and the prospects ahead

Regional Economic Integration and Dispute Settlement in East Asia Anna G Tevini, 2018-06-28 The accession of the People's Republic of China to the World Trade Organization WTO in 2001 significantly transformed the global economy both de facto and de jure At the regional level China's WTO accession served as an important catalyst for the establishment of Regional Trade Agreements RTAs in East Asia This was a novel development for the region since East Asian States had previously followed a largely informal market driven approach to regional economic integration By contrast rules based economic integration involving East Asian States was traditionally limited to multilateral integration under the GATT WTO framework This book systematically analyses and explains the development nature and challenges of rules based regional economic integration in East Asia with particular attention to the region's first four RTAs While also addressing the socio economic historical and political factors influencing the development of RTAs in East Asia the book focuses on the legal institutions governing economic integration in the Association of Southeast Asian Nations ASEAN as well as under the ASEAN China Comprehensive Economic Co Operation Agreement ACFTA the Japan Singapore New Age Economic Partnership Agreement JSEPA and the Mainland China Hong Kong Closer Economic Partnership Arrangement CEPA The book provides a systematic comparative account of the scope depth and hard law versus soft law quality of rules based economic integration achieved under these four RTAs in the areas of trade in goods and services investment liberalisation and protection labour mobility and dispute settlement

Regionalism in Africa Daniel C Bach, 2015-12-22 Africa which was not long ago discarded as a hopeless and irrelevant region has become a new frontier for global trade investment and the conduct of international relations This book surveys the socio economic intellectual and security related dimensions of African regionalisms since the turn of the 20th century It argues that the continent deserves to be considered as a crucible for conceptualizing and contextualizing the ongoing influence of colonial policies the emergence of specific integration and security cultures the spread of cross border regionalisation processes at the expense of region building the interplay between territory space and trans state networks and the intrinsic ambivalence of global frontier narratives This is emphasized through the identification of distinctive threads of regionalism which by focusing on genealogies trajectories and ideals transcend the binary divide between old and new regionalisms In doing so the book opens new perspectives not only on Africa in international relations but also Africa's own international relations This text will be of key interest to students and scholars of African politics African history regionalism comparative regionalism and more broadly to international political economy international relations and global and regional governance

The Political Importance of Regional Trading Blocs Bart Kerremans, Bob Switky, 2018-02-06 This title was first published in 2000 This text addresses concerns about regional trade agreements From a variety of political and economic angles it explains the emergence of trade blocs their internal policies and politics and their effects on global trade It does not provide sequential descriptions and analyses of each of the world's major trading blocs The focus here is on a number of causal factors that help explain the emergence of trading

blocs and the development of their relations to and effects on the multilateral trading system In each chapter attempts have been made to draw theoretical and case based generalizations that may apply to other trade blocs than the used in the empirical analyses West African Studies Cross-border Co-operation and Policy Networks in West Africa OECD,Sahel and West Africa Club,2017-01-13 This report examines the co operation potential of West African regions the structure of cross border policy networks and the spatial vision that policy makers have of cross border co operation **Between Compliance and Conflict** Jorge Dominguez,Byung Kook Kim,2013-01-11 This book examines the responses to U S power in the two areas of the world where U S primacy was first successfully consolidated East Asia and Latin America The U S has faced no comparably powerful challengers to the exercise of its power in Latin America for much of the past century It established its primacy over much of East Asia in the aftermath of WW II and extended its influence in the late 1970 s and after the end of the Vietnam War through its entente with China to balance the Soviet Union By contrast the U S has always encountered rivals and challengers in Europe has attempted unsuccessfully thus far to impose its primacy in the Middle East and has paid only intermittent attention to South Asia and Africa The essays in this volume will explore three important themes 1 How do region wide economic trends and arrangements sustain or modify U S influence in the region 2 How do rising powers in these regions Japan China Brazil reshape their policies to cope with the U S and 3 How do new South Korea and old Cuba challengers to U S power shape their policies to account for the unrivaled exercise of U S power This collection will place the United States at the hub of relations with countries in East Asia and Latin America and examine the new policies and new styles of engagement that are employed to address the prolonged U S interest in these areas approaches from which the rest of the world might learn **World Financial Orders** Paul Langley,2003-08-27 World Financial Orders challenges the predominance of neo liberalism as a mode of knowledge about contemporary world finance and claims that it neglects the social and political bases as well as the malign consequences of change He looks to the field of International Political Economy IPE to construct an alternative mode one that critically restores society and politics An historical approach to IPE is advanced that accounts for modern world finance since the seventeenth century as a succession of structurally distinct hierarchical social orders This book will be of interest to those working in the field of IPE and to those scholars researchers and students from across the social sciences who seek to challenge the common sense neo liberal explanation of contemporary world finance **The Social Construction of Europe** Thomas Christiansen,Knud Erik Jørgensen,Antje Wiener,2001-06-01 This book is the first to systematically introduce and apply a social constructivist perspective to the study of European integration Social constructivism is carefully located in terms of its philosophical and methodological origins The wider debates and contribution of constructivist approaches to international relations are reviewed and the insights that might then be afforded to European studies fully explored Highlights include new theoretical contributions to the debate by Ernst B Haas Andrew Moravcsik and Steve Smith research on key aspects of European integration and EU governance

applying a variety of constructivist approaches The Social Construction of Europe provides new and important in Africa and Asia in Comparative Economic Perspective P. Lawrence, C. Thirtle, 2001-05-14 This invaluable collection compares the relatively unsuccessful economic development of Sub-Saharan Africa with that of the successful Asian economies especially the Asian tigers It covers three main areas of comparison the lessons for Africa from the Asian experience secondly the comparisons of various aspects of economic development in Africa and Asia and finally convergence how far the laggard economies are catching up with or diverging away from each other

Rethinking Free Trade, Economic Integration and Human Rights in the Americas María Belén Olmos Giupponi, 2017-01-26 This monograph offers the first systematic overview of the protection of human rights in trade agreements in the Americas Traditionally trade agreements in the Americas were concerned with economic questions and paid little attention to human

rights However in the wake of the new regionalism which emerged at the end of the last century more clauses addressing social issues such as labour rights and environmental standards were inserted in trade agreements As economic integration increased a framework for the protection of human rights evolved This book argues that this framework allows for human rights protection on a transnational level while constructing regional identities Looking at the four key regional integration processes namely the Caribbean Community the Central American Integration System the Andean Community of Nations and the Southern Common Market and also at the North American Free Trade Agreement it shows how the integration process has reached a considerable degree of consolidation Writing on key sources in English for the first time this book will be essential reading for all free trade and human rights scholars *The Southern Cone Model* Nicola Phillips, 2004-08-02 This book provides an innovative and in depth account of the contemporary political economy of capitalist development in the Southern Cone countries of Latin America Argentina Brazil Chile Paraguay and Uruguay
