Traditional Processing Methods in Ethnopharmacology: Enhancing Therapeutic Effects and Unveiling

Mechanisms of Action Lingyun Zhong, José Carlos Tavares Carvalho ,Bey Hing Goh, 2025-03-10 Ethnopharmacology investigates traditional medicines derived from diverse plants animals and minerals used by cultures worldwide Traditional processing methods may play a vital role in optimizing therapeutic effects reducing toxicity and improving overall properties of medicinal resources However the contrary may also be the case if for example toxic metabolites are extracted at a higher concentration These time honored techniques have been employed for centuries in traditional medicine to create effective and safe remedies Specialized processing techniques can even alter drug action sites or enhance the functional capabilities of medicinal substances As interest in TCM and other traditional medicines continues to grow researchers are striving to comprehend the scientific principles behind these processing methods and refine them for contemporary applications At the

same time with our increasing understanding of medicinal plants chemical profiles therapeutic benefits and potential safety risks including interactions with other medications and direct toxicity there is a need to improve extraction techniques Optimized techniques may also reduce the environmental impact of such processing methods e g through reduced periods of decocting
