## **Regulatory Politics And Electric Utilities A Case Study In Political Economy:**

*Regulatory Politics and Electric Utilities* Douglas D. Anderson, 1981-03-30 Traditional theories hold that regulatory agencies act mainly as champions of the interest they are meant to oversee Anderson looks at regulation within the fast changing environment By adding the external political and internal bureaucratic variables he evaluates the capture theory

*Regulatory Politics and Electric Utilities* Douglas D. Anderson, 1981-03-30 Traditional theories hold that regulatory agencies act mainly as champions of the interest they are meant to oversee Anderson looks at regulation within the fast changing environment By adding the external political and internal bureaucratic variables he evaluates the capture theory

*Energy Abstracts for Policy Analysis* , 1989-07      *Prophets of Regulation* Thomas K. McCraw, 1986-10-15 There is properly no history only biography Emerson remarked and in this ingenious book Thomas McGraw unfolds the history of four powerful men Charles Francis Adams Louis D Brandeis James M Landis and Alfred E Kahn The absorbing stories he tells make this a book that will appeal across a wide spectrum of academic disciplines and to all readers interested in history biography and Americana      **Technology and Transformation in the American Electric Utility Industry** Richard F. Hirsh, 2003-11-20 This book illuminates the role of technological stagnation in the decline of the American electric utility industry in the late 1960s and 1970s Unlike other interpreters of the industry s woes Professor Hirsh argues that a long and successful history of managing a conventional technology set the stage for the industry s deterioration After improving steadily for decades the technology that brought unequalled productivity growth to the industry appeared to stall in the late 1960s making it impossible to mitigate the economic and regulatory assaults of the 1970s Unfortunately most managers did not recognize or did not want to believe the severity of the technological problems they faced and they chose to focus instead on issues usually financial or public relations that appeared more manageable Partly as a result of this lack of attention to technological issues the industry found itself in the 1980s challenged by the prospects of deregulation and restructuring

**Dreams of disconnection** Fanny Lopez, 2021-06-24 Why do we live in homes and communities built around the century old industrial model of large service networks that use polluting resources For more than a century creative architects and planners have dreamed of decentralisation and self sufficient living not to cut themselves off from society but to invent new modes of consumption and to rethink collective public services around common environmental values In a time of climate crisis changing society means changing energy infrastructures Dreams of disconnection tells the story of this strand of design and planning from its pioneers in the late nineteenth century to those applying similar ideas to tomorrow s technology two hundred years later Lopez takes in many a utopian visionary in her tour of dreamers of disconnection from theorists and architects to industrialists and engineers Technology and design are the centrepieces for these projects and their complexity particularly around sustainable supplies of energy food and water so often find solutions in aesthetics Whether these models were based around single homes or whole cities Dreams of disconnection reveals that there is much to be learnt and

marvelled at in the history of self sufficient design      *The Governance of Large Technical Systems* Olivier Coutard, 2002-01-04 This work examines the governance of large technical systems LTS at firm industry and state levels and the interactions between the systems and society In particular international contributors explore the implications of major technological economic and social changes during the last twenty years for traditional forms of LTS governance Their research is centred around the following themes traditional forms of governance new regulatory challenges the governability of complex technologies conceptual issues related to the governance of inter organizational networks      **The Politics of Telecommunications Regulation: The States and the Divestiture of AT&T** Jeffrey E. Cohen, 2019-07-26 Originally published in 1992 This text is a work from a series entitled Bureaucracies Public Administration and Public Policy The Politics of Telecommunication regulation The States and the Divestiture of AT T is an example of high quality policy analysis conducted at state level It substitutes for simple theories of public policy more complex and interesting explanations and relies on massive and time consuming data gathering that gives careful attention to measurement issues providing a sophisticated empirical analysis to evaluate the utility of public policy theories      **Jimmy Carter's Economy** W. Carl Biven, 2002 A sober objective analysis of the Carter Administration s economic policy separates truth from rhetoric revealing policies that evolved in the wake of the dual economic crises of the late 1970s inflation and the oil crisis Economics      The Political Economy of Local Regulation Alberto Asquer, Franco Becchis, Daniele Russolillo, 2016-10-26 This book offers theoretical and methodological guidelines for researching the complex regulation of local infrastructure utilities and public services in the context of rapid urbanisation technological change and climate change It examines the interactions between regulators public officers infrastructure and utilities firms public service providers citizens and civil society organisations It contains contributions from academics and practitioners from various disciplinary perspectives and from many regions of the world illustrated with case studies from several sectors including water natural gas and electricity distribution local public transport district heating urban waste and environmental services      **The Grid** Julie A Cohn, 2018-02-02 The history of the grid the world s largest interconnected power machine that is North America s electricity infrastructure The North American power grid has been called the world s largest machine The grid connects nearly every living soul on the continent Americans rely utterly on the miracle of electrification In this book Julie Cohn tells the history of the grid from early linkages in the 1890s through the grid s maturity as a networked infrastructure in the 1980s She focuses on the strategies and technologies used to control power on the grid in fact made up of four major networks of interconnected power systems paying particular attention to the work of engineers and system operators who handled the everyday operations To do so she consulted sources that range from the pages of historical trade journals to corporate archives to the papers of her father Nathan Cohn who worked in the industry from 1927 to 1989 roughly the period of key power control innovations across North America Cohn investigates major challenges and major breakthroughs but also the hidden aspects of our electricity

infrastructure both technical and human She describes the origins of the grid and the growth of interconnection emerging control issues including difficulties in matching generation and demand on linked systems collaboration and competition against the backdrop of economic depression and government infrastructure investment the effects of World War II on electrification postwar plans for a coast to coast grid the northeast blackout of 1965 and the East West closure of 1967 and renewed efforts at achieving stability and reliability after those two events *Bulletin of the Public Affairs Information Service* Public Affairs Information Service,1915 *State and Local Politics* David Berman,1999-09-28 Politics at the state and local level has never been more interesting than in our devolutionary age This popular text is the most concise readable and current introduction to the field Now in its ninth edition the book keeps its focus on the varied and changing political and economic environments in which state and local governments function and their strengths and weaknesses in key areas of public policy The text is enlivened by boxed sections that relate individual experiences or highlight particular issues and developments Topics covered in this edition include the drive toward devolution in the federal system taxation and budgeting the death penalty tort reform and changing approaches to welfare education land use and waste management **Housing and Planning References** ,1982 **Power Structure** John E. Kwoka Jr.,2007-08-28 Power Structure examines the effects on economic performance of several key features of the U S electric power industry Paramount among these are public versus private ownership vertical integration versus deintegration and retail competition versus monopoly distribution Each of these as well as other structural characteristics of utilities and their markets are analyzed for their effects on costs and price These issues are important for a number of reasons The U S electric power industry is presently embarking on a fundamental restructuring in terms of integration and competition In other countries privatization of state owned enterprises is being viewed as the answer to unsatisfactory performance From a longer perspective the question of the relative performance of publicly owned versus privately owned utilities in the U S has never been resolved And despite much speculation there is little reliable evidence as to the importance of either vertical integration or competition Operation and Control of Electric Energy Processing Systems James A. Momoh,Lamine Mili,2010-10-26 The purpose of this book is to provide a working knowledge and an exposure to cutting edge developments in operation and control of electric energy processing systems The book focuses on the modeling and control of interdependent communications and electric energy systems Micro Electro Mechanical Systems MEMS and the interdisciplinary education component of the EPNES initiative Municipal Ownership in the Electric Utility Industry David Schap,1986 Praeger special studies Praeger scientific Includes index Bibliography p 117 126 Nuclear Politics James M. Jasper,2014-07-14 Why did nuclear energy policies in France Sweden and the United States very similar at the time of the oil crisis of 1973 and 1974 diverge so greatly in the following years In answering this question James Jasper challenges one of the most popular trends in political analysis explanations relying exclusively on political and economic structures to account for public policies Jasper proposes a new cultural and

state centered approach one heeding not only structural factors but cultural meanings individual biographies and elite discretion Surveying the period from the successful commercialization of light water reactor technology in the early 1960s to the present he explains the events that occurred after 1973 France built even more reactors than it needed the United States canceled most reactor orders and Sweden completed planned nuclear plants but decided to phase out nuclear energy by 2010 This work is based on one hundred interviews with managers policymakers and activists in the three countries In addition to providing a unique theoretical perspective it broadens our understanding of nuclear policy by looking at three countries in depth and over a long historical span Originally published in 1990 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Taking Stock Morton Keller, R. Shep Melnick, 1999-09-13 What is American government like today How has it changed and how has it remained the same over the course of the century now coming to a close Taking Stock seeks to provide the fullest and most thoughtful answers yet offered to these questions It brings together eminent historians and political scientists to examine the past experience current state and future prospects of five major American public issues trade and tariff policy immigration and aliens conservation and environmentalism civil rights and social welfare

**Transforming Power** Aynsley Kellow, 1996 Originally published in 1996 this book is an exploration and analysis of the electricity industry in the context of uncertainty following the energy crisis of the 1970s and concern over the greenhouse effect Few industries demand a similar level of foresight and planning or such vast amounts of capital The book examines five well known Australian Canadian and New Zealand cases and closely analyses the ways in which various agencies have sought ends to serve the means at their disposal Electricity has long been regarded as a natural monopoly but questions of privatisation regulation and government control are increasingly prevalent The book explores these issues and also notes the experiences of other countries in its analysis of institutional reform Aynsley Kellow argues for different approaches to electricity planning which offer much by way of economic savings and minimisation of environmental problems
