## **Reign Of Ets The Corporation That Makes Up Minds:**

**Summary of The Reign of ETS** Allan Nairn, Ralph Nader, 1980      Regulatory Policy and the Social Sciences Roger G. Noll, 2023-04-28 This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1985      **Thing Knowledge** Davis Baird, 2004-02-10 Western philosophers have traditionally concentrated on theory as the means for expressing knowledge about a variety of phenomena This absorbing book challenges this fundamental notion by showing how objects themselves specifically scientific instruments can express knowledge As he considers numerous intriguing examples Davis Baird gives us the tools to read the material products of science and technology and to understand their place in culture Making a provocative and original challenge to our conception of knowledge itself Thing Knowledge demands that we take a new look at theories of science and technology knowledge progress and change Baird considers a wide range of instruments including Faraday's first electric motor eighteenth century mechanical models of the solar system the cyclotron various instruments developed by analytical chemists between 1930 and 1960 spectrometers and more      Objectifying Measures Amanda Walker Johnson, 2009-04-15 Examining the political economy of high stakes educational testing      *The Qualified Student* Harold S. Wechsler, 2017-09-29 In *The Qualified Student* Harold S. Wechsler focuses on methods of student selection used by institutions of higher education in the United States More specifically he discusses the way that college and university reformers employed those methods to introduce higher education into a broader cross section of America by extending access to an increased number of students from nontraditional backgrounds Implicit in much of this book is an underlying social and ethical question How legitimate was and is higher education's regulation of social mobility Public concern over colleges and universities practices became inevitable once they became regulators between social classes The challenging of colleges admissions policies in the courts augments similar concerns that have been present in legislatures for decades The volume is divided into three main sections Prerequisites Columbia and the Selective Function and Implications It focuses mainly on four universities The University of Michigan Columbia University the University of Chicago and the City University of New York Wechsler maintains that unlike other universities these institutions were pacesetters they did not adopt a new policy simply because some other college had already adopted it A new introduction brings the book originally published in 1977 up to date and demonstrates its continuing importance in today's academic world of selective admissions      Handbook of Understanding and Measuring Intelligence Oliver Wilhelm, Randall W. Engle, 2005 it is extremely useful and contemporary covering among its five hundred pages genetics neuro imaging and emotional intelligence It also provides a good indicator of current psychological work in the area with empirical evidence and theory sitting alongside each other The material on meta cognition would I suspect be

of most interest to philosophers along with the more basic questions concerning the nature of memory and intelligence

Subcommittee on Elementary, Secondary, and Vocational Education,1980 **Ivy and Industry** Christopher Newfield,2003 Table of contents **College Choice in America** Charles F. Manski,David A. Wise,1983 The most crucial choice a high school graduate makes is whether to attend college or to go to work Here is the most sophisticated study of the complexities behind that decision Based on a unique data set of nearly 23 000 seniors from more than 1 300 high schools who were tracked over several years the book treats the following questions in detail Who goes to college Does low family income prevent some young people from enrolling or does scholarship aid offset financial need How important are scholastic aptitude scores high school class rank race and socioeconomic background in determining college applications and admissions Do test scores predict success in higher education Using the data from the National Longitudinal Study of the Class of 1972 the authors present a set of interrelated analyses of student and institutional behavior each focused on a particular aspect of the process of choosing and being chosen by a college Among their interesting findings most high school graduates would be admitted to some four year college of average quality were they to apply applicants do not necessarily prefer the highest quality school high school class rank and SAT scores are equally important in college admissions federal scholarship aid has had only a small effect on enrollments at four year colleges but a much stronger effect on attendance at two year colleges the attention paid to SAT scores in admissions is commensurate with the power of the scores in predicting persistence to a degree This clearly written book is an important source of information on a perpetually interesting topic **Handbook of College Reading and Study Strategy Research** Rona F. Chingos,Michael McPherson,2009-09-08 Why so many of America s public university students are not graduating and what to do about it The United States has long been a model for accessible affordable education as exemplified by the country s public universities And yet less than 60 percent of the students entering American universities today are graduating Why is this happening and what can be done Crossing the Finish Line provides the most detailed exploration ever of college completion at America s public universities This groundbreaking book sheds light on such serious issues as dropout rates linked to race gender and socioeconomic status Probing graduation rates at twenty one flagship public universities and four statewide systems of public higher education the authors focus on the progress of students in the entering class of 1999 from entry to graduation transfer or withdrawal They examine the effects of parental education family income race and gender high school grades test scores financial aid and characteristics of universities attended especially their selectivity The conclusions are compelling minority students and students from poor families have markedly lower graduation rates and take longer to earn degrees even when other variables are taken into account Noting the strong performance of transfer students and the effects of financial constraints on student retention the authors call for improved transfer and financial aid policies and suggest ways of improving the sorting processes that match students to institutions An outstanding combination of evidence and analysis Crossing the Finish Line should be read by everyone who cares about the nation s higher education system **The School Reform Landscape** Christopher H. Tienken,Donald C. Orlich,2013-02-22 In The School Reform Landscape Fear Mythologies and Lies the authors take an in depth and controversial look at school reform since the launch of Sputnik They scrutinize school reform events proposals and policies from the last 60 years through the lens of critical social theory and examine the ongoing tensions between the need to keep a vibrant unitary system of public education and the ongoing assault by corporate and elite interests in creating a dual system Some of events proposals and policies critiqued include the Sputnik myth A Nation At Risk No Child Left Behind the lies of the Common Core State Standards Initiative and other common reform schemes The authors provide an evidence based contrarian view of the free market reform ideas and pierce the veil of the new reform policies to find that they are built not upon empirical evidence but instead rest solidly on foundations of myth fear and lies Ideas for a new set of reform policies based on empirical evidence and supportive of a unitary democratic system of education are presented **Stakeholders in the Law School** Fiona Cownie,2010-01-28 This collection brings together a distinguished group of researchers to examine the power relations which are played out in university law schools as a result of the different pressures exerted upon them by a range of different stakeholders From students to governments from lawyers to universities a host of institutions and actors believe that law schools should take account of a vast number of often conflicting considerations when teaching their students designing

curricula carrying out research and so on How do law schools deal with these pressures What should their response be to the stakeholders who urge them to follow agendas emanating from outside the law school itself To what extent should some of these agendas play a greater role in the thinking of law schools
