Confronting Capitalism in the 21st Century Marc Silver, 2019-04-23 This book analyzes key aspects of Marx's Capital with an eye towards its relevance for an understanding of issues confronting us in the 21st Century The contributions to this volume suggest that while aspects of Marx's original analysis must be adjusted to take into account changes that have occurred since its initial publication in 1867 his overall perspective remains necessary for understanding the nature of crises in 21st century Part I emphasizes the central concepts Marx employed in Capital including exploitation capital accumulation commodity fetishism and his use of dialectics as a method for baring the underlying relations that define capitalism Parts II and III extend that focus by addressing the concept of value fictitious capital credit and financialization Parts IV and V offer analyses of several concrete manifestations of contemporary crises from national contexts Europe Latin America China and the United States The volume argues that we have to combat the imperatives of capitalism to move towards a more humane and egalitarian future **Marx, Marxism and the Spiritual** Anjan Chakrabarti, Anup Dhar, Serap A. Kayatekin, 2020-09-10

While Marxian theory has produced a sound and rigorous critique of capitalism has it faltered in its own practice of social transformation Has it faltered because of the Marxian insistence on the hyper secularization of political cultures The history of religions with the exception of some spiritual traditions has not been any less heartless and soulless This book sets up a much needed dialogue between a rethought Marxian praxis of the political and a rethought experience of spirituality Such rethinking within Marxism and spirituality and a resetting of their lost relationship is perhaps the only hope for a non violent future of both the Marxian reconstruction of the self and the social as also faith based life practices Building on past work in critical theory this book offers a new take on the relationship between a rethought Marxism and a rethought spirituality rethought in the life philosophy and works of Christian thinkers anti Christian thinkers Marxian thinkers those critical of Marxist Statecraft Dalit neo Buddhist thinkers thinkers drawing from Judaism as well as thinkers drawing critically from Christianity Contrary to popular belief this book does not see spirituality as a derivative of only religion This book also sees spirituality as what Marx designated the sigh of the oppressed against both social and religious orthodoxy In that sense spirituality is not just a displaced form of religion it is a displaced form of the political too This book therefore sets up the much needed dialogue between the Marxian political and the spiritual traditions The chapters in this book were originally published in *Rethinking Marxism A Journal of Economics Culture and Society* *Reinventing Modern Architecture in Greece* Marianna Charitonidou, 2025-05-30 This book examines the connection between the politics of the Marshall Plan and urban

planning and identifies the key players such as the Greek architect and urban planner Constantinos A Doxiadis and the Italian industrialist Adriano Olivetti It also explores the architects of the Mataroa mission who played a vital role in the cross fertilisation between France and Greece and the role of travel to Greece for architects during the 19th century This book delves into the work of Constantinos A Doxiadis Adriano Olivetti Alison and Peter Smithson Iannis Xenakis Takis Zenetos Henri Lefebvre Cornelius Castoriadis Aris Konstantinidis Dimitris Pikionis and others It sheds light on how Doxiadis introduced ekistics as a novel approach to understanding the science of human settlements This book proposes that the manner in which these aforementioned architects and urban planners addressed the role of technology in everyday life and the relationship between society history culture nature architecture and urban planning could enrich our ongoing methods and debates on architecture urban planning ecology social equity and democracy This book is based on extensive archival research and will be of interest to architects artists researchers and students and scholars in architecture architectural history and theory art urban sociology cultural theory science and technology studies philosophy ecology cybernetics and aesthetics

Labour Managed Firms and Post-Capitalism Bruno Jossa, 2016-11-25 This book illustrates and discusses the major points of the economic theory of producer cooperatives its evolution since the 1950s and links with Marxian theory Most importantly this book demonstrates that a system of producer cooperatives offers a wealth of advantages compared to capitalism There is general agreement that the main benefit of this form of economic democracy is that people allowed to freely pursue their interests are happier than those acting on somebody else's instruction The author argues that a system of democratic firms would eradicate classical high wage unemployment and scale down both Keynesian and structural unemployment levels

Marx in the Age of Digital Capitalism, 2015-09-29 More than 130 years after Karl Marx's death

and 150 years after the publication of his opus magnum *Capital Critique of Political Economy* capitalism keeps being haunted by period crises The most recent capitalist crisis has brought back attention to Marx's works This volume presents 16 contributions that show how Marx's analyses of capitalism the commodity class labour work exploitation surplus value dialectics crises ideology class struggles and communism help us to understand the Internet and social media in 21st century digital capitalism Marx is back This book is a key resource on the foundations of Marxist Internet and Digital Media Studies

A New Model of Socialism Bruno Jossa, 2018-04-27 Economic democracy is essential for creating a truly democratic political sphere This engaging book uses Marxist theory to hypothesise that capitalism is not a democratic system and that a modern socialist system of producer cooperatives and democratically managed enterprises is urgently needed *A New Model of Socialism* focuses on the current crisis of the political Left a result of the collapse of the Soviet model of society and the decline of statism and kingship Bruno Jossa expands on existing theories to explore Marx's notions on economic democracy in a modern setting He advocates a move away from the centralised planning form of economic socialism towards a self management system for firms that does not prioritise the interests of one class over another in order to achieve greater economic democracy It is argued that the establishment of such a system of democratic firms is the precondition for reducing intervention in the economy thus enabling the State to perform its ultimate function of serving the public interest This timely book is ideal for advanced scholars of Marxist radical and heterodox economic theory as well as academics with an interest in the rise of socialism in our modern world Indeed it will also be of value to all those seeking a viable and practical alternative to existing capitalist and socialist thinking

The Coloniality of the Secular Yountae An, 2023-12-15 In *The Coloniality of the Secular* An Yountae investigates the collusive ties between the modern concepts of the secular religion race and coloniality in the Americas Drawing on the work of douard Glissant Frantz Fanon Aim C saire Sylvia Wynter and Enrique Dussel An maps the intersections of revolutionary non Western thought with religious ideas to show how decoloniality redefines the sacred as an integral part of its liberation vision He examines these thinkers rejection of colonial religions and interrogates the narrow conception of religion that confines it within colonial power structures An explores decoloniality's conception of the sacred in relation to revolutionary violence gender creolization and racial phenomenology demonstrating its potential for reshaping religious paradigms Pointing out that the secular has been pivotal to regulating racial hierarchies under colonialism he advocates for a broader understanding of religion that captures the fundamental ideas that drive decolonial thinking By examining how decolonial theory incorporates the sacred into its vision of liberation An invites readers to rethink the transformative power of decoloniality and religion to build a hopeful future

Producer Cooperatives as a New Mode of Production Bruno Jossa, 2014-02-05 The notion that there is no alternative to capitalism emerged after the fall of the Berlin Wall and made rapid headway due to increasing economic globalisation More recently this belief that there is no viable alternative has held firm despite the financial crisis high unemployment levels and an ever increasing gap between rich and

poor However since the appearance of Benjamin Ward s seminal 1958 article economic theorists have been developing a workable alternative a system of self managed firms The core argument outlined in this book is that a well organised system of producer cooperatives would give rise to a new mode of production and ultimately a genuinely socialist society This argument is developed through three key steps First following on from Jaroslav Vanek s definition it is argued that a Labour Managed Firm a firm which strictly segregates capital incomes from labour incomes would implement a new production mode because it would reverse the pre existing relation between capital and labour Second given that a system of these Labour Managed Firm cooperatives would reverse the capital labour relationship it is suggested that this would constitute a form of market socialism Third it is argued that compared to capitalism a system of producer cooperatives offers a wealth of advantages including the potential for efficiency gains the eradication of unemployment and the end of exploitation Ultimately this book concludes that self management could take the place of central planning in Marxist visions for the future

The Handbook of Political Sociology Thomas Janoski, Robert R. Alford, Alexander M. Hicks, Mildred A.

Schwartz, 2005-05-23 This Handbook provides a complete survey of the vibrant field of political sociology Part I explores the theories of political sociology Part II focuses on the formation transitions and regime structure of the state Part III takes up various aspects of the state that respond to pressures from civil society *The Political Economy of Cooperatives and Socialism* Bruno Jossa, 2019-10-10 This book argues that capitalism cannot be said to be truly democratic and that a system of producer cooperatives or democratically managed enterprises is needed to give rise to a new mode of production which is genuinely socialist and fully consistent with the ultimate rationale underlying Marx s theoretical approach The proposition that firms should be run by the workers on their own was endorsed by John Dewey the greatest social thinker of the twentieth century but is also shared by Marxists such as Anton Pannekoek Karl Korsch Angelo Tasca Antonio Gramsci and Richard Wolff This book explores the history of this argument taking in concepts from economic and political thought including historical materialism cooperation utopianism and economic democracy The book will be of significant interest to scholars and students of political economy Marxism socialism history of economic thought and political theory **Seeing**

Through the System Gus Bagakis, 2013-06 Most people think of class as a ranking system the more you have the higher your class status In contrast to this view in this new study author Gus Bagakis demonstrates that class is a tool that explains how the capitalist system works and why the class struggle is invisible Capitalism was and is a developing system in which the working class is turned into a commodity selling its labor power to the capitalist class that owns the factories businesses and corporations While capitalism claims to promote efficiency wealth and freedom it is also a system where the rich are getting richer the earth and climate are being destroyed and the poor get more and more desperate with each passing day All of this is happening because we live in a system that stunts personality and corrupts human relations by pitting people against one another for economic gain Through class analysis Bagakis explains that we must take off the filters that we ve

been indoctrinated with so that we can see how personal social and international problems develop Primary among these false filters is the idea that we are all middle class and so there are no class conflicts in our society Seeing through the System seeks to help students workers social activists and those interested in understanding the reasons behind many of the problems in the world today You can come to understand how our society was put together how it works and how it can be transformed

that posits its roots in global capitalism with its emphasis on profit making a treadmill of production and consumption heavy reliance on fossil fuels and commitment to ongoing economic expansion It explores the systemic changes necessary to create a more socially just and sustainable world system that would possibly start to move humanity toward a safer climate and discusses the role of a burgeoning climate movement in this effort
