Reinventing Public Education:

Reinventing Public Education Paul Hill, Lawrence C. Pierce, James W. Guthrie, 1997-06 A heated debate is raging over our nation's public schools and how they should be reformed with proposals ranging from imposing national standards to replacing public education altogether with a voucher system for private schools Combining decades of experience in education the authors propose an innovative approach to solving the problems of our school system and find a middle ground between these extremes Reinventing Public Education shows how contracting would radically change the way we operate our schools while keeping them public and accessible to all and making them better able to meet standards of achievement and equity Using public funds local school boards would select private providers to operate individual schools under formal contracts specifying the type and quality of instruction In a hands on concrete fashion the authors provide a thorough explanation of the pros and cons of school contracting and how it would work in practice They show how contracting would free local school boards from operating schools so they can focus on improving educational policy how it would allow parents to choose the best school for their children and finally how it would ensure that schools are held accountable and academic standards are met While retaining a strong public role in education contracting enables schools to be more imaginative adaptable and suited to the needs of children and families In presenting an alternative vision for America's schools Reinventing Public Education is too important to be ignored Reinventing Public Education Paul Thomas Hill, 1994

comprehensive plan for revitalizing American education In *Reinventing America's Schools* David Osborne one of the world's foremost experts on public sector reform offers a comprehensive analysis of the charter school movements and presents a theory that will do for American schools what his New York Times bestseller *Reinventing Government* did for public governance in 1992 In 2005 when Hurricane Katrina devastated New Orleans the city got an unexpected opportunity to recreate their school system from scratch The state's Recovery School District RSD created to turn around failing schools gradually transformed all of its New Orleans schools into charter schools and the results are shaking the very foundations of American education Test scores school performance scores graduation and dropout rates ACT scores college going rates and independent studies all tell the same story the city's RSD schools have tripled their effectiveness in eight years Now other cities are following suit with state governments reinventing failing schools in Newark Camden Memphis Denver Indianapolis Cleveland and Oakland In this book Osborne uses compelling stories from cities like New Orleans and lays out the history and possible future of public education Ultimately he uses his extensive research to argue that in today's world we should treat every public school like a charter school and grant them autonomy accountability diversity of school designs and parental choice

Charter Schools and Accountability in Public Education Paul T. Hill, Robin J. Lake, 2004-05-13 Charter schools are among the most debated and least understood phenomena in American education today At the heart of these matters is a contested question of accountability To survive charter schools must make and keep promises about what students will experience and learn under their purview However unlike public schools charter schools do not rely exclusively on their relationship with school districts They must also look to parents teachers and donors to cooperatively establish expectations of a particular school and its mission Aimed toward elected officials school reform activists and educators this book is the result of the first national scale study of charter school accountability The authors researched one hundred fifty schools and sixty authorizing agencies in Arizona California Colorado Georgia Massachusetts and Michigan These states contain the majority of charter schools that have been operating for three years or more and represent the major differences in state charter school legislation The authors include interviews from a range of participants in the field from state legislators and administrators to principals teachers and parents In assessing the structure of accountability as it works internally to bolster external confidence Hill and Lake suggest the struggle of charter schools actually complements those of standards based reform Both seek to transform public education to make schools responsible for performance not compliance

A Democratic Constitution for Public Education Paul T. Hill, Ashley E. Jochim, 2015 This study focuses on governance of K 12 public schools Governance the work of institutions that set the rules under which schools must operate can protect children and prevent misuse of public funds but it can also prevent teachers and principals from doing their best for children There are proposals to simplify governance changing by giving control to mayors eliminating elected school boards or eliminating local oversight entirely This book approaches governance from a new angle who governs is less important than what powers government has

segregation and anti intellectualism But it is not too late for change Against both corporate school reformers and its liberal critics this book argues for the expansion of democratic pedagogies and a new common school movement that will lead to broader social renewal

Choices and Challenges Priscilla Wohlstetter, Joanna Smith, Caitlin C. Farrell, 2013-03-01 As charter schools enter their third decade research in this key sector remains overwhelmingly contradictory and confused Many studies are narrowly focused some do not meet the standards for high quality academic research In this definitive work Wohlstetter and her colleagues isolate and distill the high quality research on charter schools to identify the contextual and operational factors that influence these schools performances The authors examine the track record of the charter sector in light of the wide range of goals set for these schools in state authorizing legislation at the classroom level the level of the school community and system wide In particular they show how the evolution of the charter movement has shaped research questions and findings By highlighting what we know about the conditions for success in charter schools the authors make a significant contribution to current debates in policy and practice both within the charter sector and in the larger landscape of public education
