Unbundled Government Christopher Pollitt,Colin Talbot,2004-07-31 Public sector bureaucracies have been subjected to harsh criticism One solution which has been widely adopted over the past two decades has been to unbundle government that is to break down monolithic departments and ministries into smaller semi autonomous agencies These are often governed by some type of performance contract are at arm s length or further from their parent ministry or department and are freed from many of the normal rules governing civil service bodies This the first book to survey the why and the how of this epidemic of agencification is essential reading for advanced students and researchers of public management It includes case studies from every continent from Japan to America and from Sweden to Tanzania these 14 case studies some covering more than one country critically examine how such agencies have been set up and managed Reinvention's Next Steps

Reinventing the Administrative State Michael E. Norris, 2000-04-26 Reinventing government is a well established political program that has been pursued in a number of forms throughout the twentieth century Many of these programs share similar goals of economy and efficacy but they have suffered largely from a persistent inability to achieve their objectives in any significant way In this timely work Michael Norris perceptively analyzes the reasons for the failure of recent programs to correct the weaknesses of government He argues that the current reinvention movement has fallen well short of its original goals and demonstrates that the disparity between the original claims of the movement and its results to date has been caused by structural political bureaucratic and internal barriers Norris meticulously examines each of these barriers providing new insights and potential solutions to the long standing problem of government inefficiency Those with an interest in political science American government and public policy will find much to their liking in this thought provoking volume
