Relational Autonomy:

Relational Autonomy Catriona Mackenzie, Natalie Stoljar, 2000-01-27 This collection of original essays explores the social and relational dimensions of individual autonomy Rejecting the feminist charge that autonomy is inherently masculinist the contributors draw on feminist critiques of autonomy to challenge and enrich contemporary philosophical debates about agency identity and moral responsibility The essays analyze the complex ways in which oppression can impair an agent's capacity for autonomy and investigate connections neglected by standard accounts between autonomy and other aspects of the agent including self conception self worth memory and the imagination *Relational Theory* Christine M. Koggel, Ami Harbin, Jennifer J. Llewellyn, 2025-04-18 Relational theory starts from the ontological fact of our being in networks of relationships and draws out what this means for theories of knowledge and for moral and political theory This book uses insights from feminist relational theory to outline the ontological epistemological and moral political implications of this theoretical approach The chapters in this volume focus on relationships of power and oppression how these relationships shape who is taken to have knowledge and who is dismissed or ignored and what all of this means for theories of equality justice and moral and political theory more generally A focus on relationships of power and oppression opens up an examination into structures such as colonialism and capitalism that shape interconnected networks of relationships between humans and human and non human entities and ecosystems This volume which now includes eight additional chapters published both before and after the original special issue offers a significant step forward in the development of feminist relational theory Following early forays in identifying and criticizing mainstream liberal theory in the Western tradition chapters in this collection draw on approaches by anti oppression theorists found in critical disability critical race anti colonial decolonial and non Western theories to further broaden the descriptions and analyses of relationships and networks of relationships and to extend and advance feminist relational theory and its applications The chapters in this book were originally published in the *Journal of Global Ethics* *Inclusion and Democracy* Iris Marion Young, 2002 Democratic equality entails a principle that everyone whose basic interests are affected by policies should be included in the process of making them Yet individuals and groups often claim that decision making processes are dominated by only some of the interests and perspectives in the society What are the ideals of inclusion through which such criticisms should be made and which might guide more inclusive political practice This book considers that question from the point of view of norms of democratic communication processes of representation and association and how wide the scope of political jurisdictions should be Democratic theorists have not sufficiently attended to the ways processes of debate and decision making often marginalize individuals and groups because the norms of political discussion are biased against some forms of expression *Inclusion and Democracy* broadens our understanding of democratic communication by reflecting on the positive political functions of narrative rhetorically situated appeals and public protest It reconstructs concepts of civil society and public sphere as

enacting such plural forms of communication among debating citizens in large scale societies The book considers issues of the scope of the polity at two levels global and local The scope of a polity should extend as wide as the scope of social and economic interactions that raise issues of justice Today this implies the need for global democratic institutions At a more local level processes of residential segregation and the design of municipal jurisdictions often result in the ability for actions in one locale to affect those in other locales without those making the decisions having to include some of those affected in the decision making process Metropolitan governments which preserve significant local autonomy may therefore be necessary to promote political equality

Relational Autonomy Catriona Mackenzie, Natalie Stoljar, 2000 These essays explore the social and relational dimensions of individual autonomy Rejecting the feminist charge that autonomy is inherently masculinist the contributors draw on feminist critiques of autonomy to challenge philosophical debates about agency identity and moral responsibility

Autonomy and Equality Natalie Stoljar, Kristin Voigt, 2021-09-30 This book draws connections and explores important questions at the intersection of the debates about relational autonomy and relational equality Although these two research areas share several common assumptions and concerns their connections have not been systematically explored The essays in this volume address theoretical questions at the intersection of relational theories of autonomy and equality and also consider how these theoretical considerations play out in real world contexts Several chapters explore possible conceptual links between relational autonomy and equality by considering the role of values such as agency non domination and self respect to which both relational autonomy theorists and relational egalitarians are committed Others reflect on how debates about autonomy and equality can clarify our thinking about oppression based on race and gender and how such oppression affects interpersonal relationships

Mental Capacity, Dignity and the Power of International Human Rights Julia Duffy, 2023-08-17 Personhood in liberal philosophical and legal traditions has long been grounded in the idea of autonomy and the right to legal capacity However in this book Julia Duffy questions these assumptions and shows how such beliefs exclude and undermine the rights of adults with cognitive disability Instead she reinterprets the right to legal capacity through the principle of the interdependence and indivisibility of human rights In doing so she compellingly argues that dignity and not autonomy ought to be the basis of personhood Using illustrative case studies Duffy demonstrates that the key human rights values of autonomy dignity and equality can only be achieved by fulfilling a range of interdependent human rights With this innovative book challenging common assumptions about human rights and personhood Duffy leads the way in ensuring civil economic political social and cultural inclusion for adults with cognitive disabilities

Humane Liberality Robert A. Carleo, 2024-10-15 Can we endorse valuable rights and freedoms the cherished forms of equality and liberty we might call liberality without liberalism This book outlines such a possibility Humane liberality upholds and deliberates equality freedom and justice through the Mencian virtue of humaneness based in care and compassion In positing humaneness to be the first virtue of government Mencius directs us to formulate policies that are responsive to and promote the wellbeing of the people understood in terms of their actual lived and felt experience their feelings and their flourishing Rights and freedoms can and should be affirmed in ways that facilitate that flourishing This pushes against the usual approaches to valuing rights and liberties of both Confucians and liberals who tend to reason from abstract first principles rather than through care for people and responsiveness to their actual wants and needs In setting out this vision Humane Liberality first critically analyzes the broader problems and possibilities of affirming freedom equality and pluralism through Confucianism It then outlines and promotes an underappreciated concrete humanist account of Mencian morality and politics which has been overshadowed by more metaphysical orthodox interpretations of Mencius Concrete humanism insists we adjudicate what is right not through eternal abstractions but instead through situated assessment of human emotions In this way humaneness offers a unique and uniquely compelling approach to reasoning about

rights and liberties and humane liberality recasts how we understand and practice Confucian values liberal principles and the promise and potential of incorporating the two

Consent Alan Reed, Michael Bohlander, Nicola Wake, Emma Smith, 2016-10-14 This volume presents a leading contribution to the substantive arena relating to consent in the criminal law In broad terms the ambit of legally valid consent in extant law is contestable and opaque and reveals significant problems in adoption of consistent approaches to doctrinal and theoretical underpinnings of consent This book seeks to provide a logical template to focus the debate The overall concept addresses three specific elements within this arena embracing an overarching synergy between them This edifice engages in an examination of UK provisions with specialist contributions on Irish and Scottish law and in contrasting these provisions against alternative domestic jurisdictions as well as comparative contributions addressing a particularised research grid for consent The comparative chapters provide a wider background of how other legal systems treat a variety of specialised issues relating to consent in the context of the criminal law The debate in relation to consent principles continues for academics practitioners and within the criminal justice system Having expert descriptions of the wider issues surrounding the particular discussion and of other legal systems approaches serves to stimulate and inform that debate This collection will be a major source of reference for future discussion

Nature and Life Md. Munir Hossain Talukder, 2018-07-27 This volume explores some recent thoughts and trends in environmental philosophy and applied ethics The topics selected here are contemporary and offered in academic programs across the globe This book is an essential reference work for those who are keen to conduct detailed research within the fields of environmental philosophy

environmental humanities culture public health applied ethics bioethics and political philosophy as well as the general reader interested in the ethical and philosophical issues that are transforming and touching our lives The book uniquely focuses both western and non western approaches Bottlenecks Joseph Fishkin,2014-01-10 Equal opportunity is a powerful idea and one with extremely broad appeal in contemporary politics political theory and law But what does it mean On close examination the most attractive existing conceptions of equal opportunity turn out to be impossible to achieve in practice or even in theory As long as families are free to raise their children differently no two people s opportunities will be equal nor is it possible to disentangle someone s abilities or talents from her background advantages and disadvantages Moreover given different abilities and disabilities different people need different opportunities confounding most ways of imagining what counts as equal This book proposes an entirely new way of thinking about the project of equal opportunity Instead of focusing on the chimera of literal equalization we ought to work to broaden the range of opportunities open to people at every stage in life We can achieve this in part by loosening the bottlenecks that constrain access to opportunities the narrow places through which people must pass in order to pursue many life paths that open out on the other side A bottleneck might be a test like the SAT a credential requirement like a college degree or a skill like speaking English It might be membership in a favored caste or racial group Bottlenecks are part of the opportunity structure of every society But their severity varies By loosening them we can build a more open and pluralistic opportunity structure in which people have more of a chance throughout their lives to pursue paths they choose for themselves rather than those dictated by limited opportunities This book develops this idea and other elements of opportunity pluralism then applies this approach to several contemporary egalitarian policy problems class and access to education workplace flexibility and work family conflict and antidiscrimination law
