Arendt, Levinas and a Politics of Relationality Anya Topolski, 2015-05-21 Born in Eastern Europe educated in the West under the guidance of Martin Heidegger and the phenomenological tradition and forced to flee during the Holocaust because of their Jewish identity it should come as no surprise that Emmanuel Levinas and Hannah Arendt's ideas intersect in an important way This book demonstrates for the first time the significance of a dialogue between Levinas' ethics of alterity and Arendt's politics of plurality Anya Topolski brings their respective projects into dialogue by means of the notion of relationality a concept inspired by the Judaic tradition that is prominent in both thinker's work The book explores questions relating to the relationship between ethics and politics the Judaic contribution to rethinking the meaning of the political after the Shoah and the role of relationality and responsibility for politics The result is an alternative conception of the political based on the ideas of plurality and alterity that aims to be relational inclusive and empowering *Relational and Intersubjective Perspectives in Psychoanalysis* Jon Mills, 2005-05-20 This volume is the first concentrated effort to offer a philosophical critique of relational and intersubjective perspectives in contemporary psychoanalytic thought The distinguished group of scholars and clinicians assembled here are largely preoccupied with tracing the theoretical underpinnings of relational psychoanalysis its divergence from traditional psychoanalytic paradigms implications for clinical reform and therapeutic practice and its intersection with alternative psychoanalytic approaches that are co-extensive with the relational turn Because relational and intersubjective perspectives have not been properly critiqued from within their own schools of discourse many of the contributors assembled here subject advocates of the American Middle School to a thorough critique of their theoretical assumptions limitations and practices If not for any other reason this project is of timely significance for the field of psychoanalysis and the competing psychotherapies because it attempts to address the philosophical undergirding of the relational movement *A Primer of Clinical Interpretation* Philip F. D. Rubovits-Seitz, 2002 This primer provides a guide to clinical interpretations for those in the practice of psychotherapy The book is divided into two parts Part I deals with the classical approach to clinical interpretation and Part II deals with developments since Freud including Kohut's self psychological approach Hoffman's dialectical constructivist approach Roy Schafer's multifaceted approach Donald Spence's radical narrative approach the intersubjective approach and the radical relational approach

Moments of Meeting in Psychoanalysis Susan Lord, 2017-08-09 There are moments of connection between analysts and patients during any therapeutic encounter upon which the therapy can turn Moments of Meeting in Psychoanalysis explores how analysts and therapists can experience these moments of meeting shows how this interaction can become an enlivening and creative

process and seeks to recognise how it can change both the analyst and patient in profound and fundamental ways. The theory and practice of contemporary psychoanalysis and psychoanalytic psychotherapy has reached an exciting new moment of generous and generative interaction. As psychoanalysts become more intersubjective and relational in their work it becomes increasingly critical that they develop approaches that have the capacity to harness and understand powerful moments of meeting capable of propelling change through the therapeutic relationship. Often these are surprising human moments in which both client and clinician are moved and transformed. Moments of Meeting in Psychoanalysis offers a window into the ways in which some of today's practitioners think about and work with these moments of meeting in their practices. Each chapter of the book offers theoretical material, case examples and a discussion of various therapists' reflections on and experiences with these moments of meeting. With contributions from relational psychoanalysts, psychotherapists and Jungian analysts and covering essential topics such as shame, impasse, mindfulness and group work, this book offers new theoretical thinking and practical clinical guidance on how best to work with moments of meeting in any relationally oriented therapeutic practice. Moments of Meeting in Psychoanalysis will be of great interest to psychoanalysts, psychoanalytic psychotherapists, psychologists, social workers, workers in other mental health fields, graduate students and anyone interested in change processes.

A Relational Psychoanalytic Approach to Couples Psychotherapy Philip A. Ringstrom, 2014-03-26. Winner of the 2014 Goethe Award for Psychoanalytic and Psychodynamic Scholarship. A Relational Psychoanalytic Approach to Couples Psychotherapy presents an original model of couples treatment integrating ideas from a host of authors in relational psychoanalysis. It also includes other psychoanalytic traditions as well as ideas from other social sciences. This book addresses a vacuum in contemporary psychoanalysis devoid of a comprehensively relational way to think about the practice of psychoanalytically oriented couples treatment. In this book Philip Ringstrom sets out a theory of practice that is based on three broad themes: The actualization of self-experience in an intimate relationship; The partners' capacity for mutual recognition versus mutual negation; The relationship having a mind of its own. Based on these three themes, Ringstrom's model of treatment is articulated in six non-linear, non-hierarchical steps that wed theory with practice, each powerfully illustrated with case material. These steps initially address the therapist's attunement to the partners' disparate subjectivities, including the critical importance of each one's perspective on the reality they co-habit. Their perspectives are fleshed out through the exploration of their developmental histories with focus on factors of gender and culture and more. Out of this arises the examination of how conflictual pasts manifest in dissociated self-states, the illumination of which leads to the enrichment of self-actualization, the facilitation of mutual recognition and the capacity to more genuinely renegotiate their relationship. The book concludes with a chapter that illustrates one couple treated through all six steps and a chapter on frequently asked questions (FAQs) derived from over thirty years of practice, teaching, supervision and presentations during the course of this book's development. A Relational Psychoanalytic Approach to Couples Psychotherapy balances a great range

Debating Relational Psychoanalysis

Jon Mills, 2020-06-10 In Debating Relational Psychoanalysis Jon Mills provides an historical record of the debates that had taken place for nearly two decades on his critique of the relational school including responses from his critics Since he initiated his critique relational psychoanalysis has become an international phenomenon with proponents worldwide This book hopes that further dialogue may not only lead to conciliation but more optimistically that relational theory may be inspired to improve upon its theoretical edifice both conceptually and clinically as well as develop technical parameters to praxis that help guide and train new clinicians to sharpen their own theoretical orientation and therapeutic efficacy Because of the public exchanges in writing and at professional symposiums these debates have historical significance in the development of the psychoanalytic movement as a whole simply due to their contentiousness and proclivity to question cherished assumptions both old and new In presenting this collection of his work and those responses of his critics Mills argues that psychoanalysis may only advance through critique and creative refinement and this requires a deconstructive praxis within the relational school itself Debating Relational Psychoanalysis will be of interest to psychoanalysts of all orientations psychotherapists mental health workers psychoanalytic historians philosophical psychologists and the broad disciplines of humanistic phenomenological existential and analytical psychology
