Relays Bernhard Siegert, 1999 This book examines how one aspect of the social and technological situation of literature namely the postal system determined how literature was produced and what was produced within literature Language itself has the structure of a relay where what is transmitted depends on a prior withholding The social arrangements and technologies for achieving this transmission thus have had a particularly powerful impact on the imagination of literature as a medium The book has three parts The first part reconstructs the postal conditions of classic and Romantic literature the invention of postage in the seventeenth century which transformed the postal system into a service meant to be used by the population instead of by the prince alone the sexualization of letter writing which was introduced in the middle of the eighteenth century and changed the reading of a letter into an interpretation of intimate confessions of the soul and Goethe's turning of this new ontology of the letter into a logistics of literature whereby literary authorship was constructed by means of postal logistics with the precision of engineering The second part analyzes nineteenth century postal innovations that facilitated communication through letters and examines how literary works were able to live off such communication These innovations included the reform of the post office the invention of the postage stamp the Universal Postal Union which subjected letter writing to an economy of materials and uniform standards and the telegraph and the telephone which surpassed literature in terms of speed economy and analog signal processing In the third part on the basis of a close reading of Franz Kafka's letters to his typist fiance the author demonstrates how postal logistics of love and authorship have worked in the era of modern postal systems and technical media Kafka's correspondence is deciphered as a war of nerves waged by means of all available techniques and conditions of transmission Miscommunications Timothy Barker, Maria Korolkova, 2021-01-14 What happens when communication breaks down Is it the condition for mistakes and errors that is characteristic of digital culture And if mistakes and errors have a certain power what stands behind it To address these questions this collection assembles a range of cutting edge philosophical socio political art historical and media theoretical inquiries that address contemporary culture as a terrain of miscommunication If the period since the industrial revolution can be thought of as marked by the realisation of the possibilities for global communication in terms of the telephone telegraph television and finally the internet Miscommunications shows that to think about the contemporary historical moment a new history and theory of these devices needs to be written one which illustrates the emergence of the current cultures of miscommunication and the powers of the false The essays in the book chart the new conditions for discourse in the 21st century and collectively show how studies of communication can be refigured when we focus on the capacity for errors accidents mistakes malfunctions and both intentional and non intentional miscommunications **Book Presence in** a Digital Age Kiene Brillenburg Wurth, Kári Driscoll, Jessica Pressman, 2018-06-28 Contrary to the apocalyptic pronouncements of paper media s imminent demise in the digital age there has been a veritable surge of creative

reimaginings of books as bearers of the literary From typographic experiments Mark Z Danielewski s House of Leaves Steven Hall s The Raw Shark Texts to accordion books Anne Carson s Nox from cut ups Jonathan Safran Foer s Tree of Codes to collages Graham Rawle s Woman s World from erasures Mary Ruefle s A Little White Shadow to mixups Simon Morris s The Interpretations of Dreams print literature has gone through anything but a slow inevitable death In fact it has re invented itself materially Starting from this idea of media plurality Book Presence in a Digital Age explores the resilience of print literatures book art and zines in the late age of print from a contemporary perspective while incorporating longer term views on media archeology and media change Even as it focuses on the materiality of books and literary writing in the present Book Presence also takes into consideration earlier 20th century moments of media transition developing the concepts of presence and materiality as analytical tools to perform literary criticism in a digital age Bringing together leading scholars artists and publishers Book Presence in a Digital Age offers a variety of perspectives on the past present and future of the book as medium the complex relationship of materiality to virtuality and of the analog to the digital Strange Cocktail Adriana X. Jacobs, 2018-07-23 For centuries poets have turned to translation for creative inspiration Through and in translation poets have introduced new poetic styles languages and forms into their own writing sometimes changing the course of literary history in the process Strange Cocktail is the first comprehensive study of this phenomenon in modern Hebrew literature of the late nineteenth century to the present day Its chapters on Esther Raab Leah Goldberg Avot Yeshurun and Harold Schimmel offer close readings that examine the distinct poetics of translation that emerge from reciprocal practices of writing and translating Working in a minor literary vernacular the translation strategies that these poets employed allowed them to create and participate in transnational and multilingual poetic networks Strange Cocktail thereby advances a comparative and multilingual reframing of modern Hebrew literature that considers how canons change and are undone when translation occupies a central position how lines of influence and affiliation are redrawn and literary historiographies are revised when the work of translation occupies the same status as an original text when translating and writing go hand in **Deirdre Madden** Anne Fogarty, Marisol Morales-Ladrón, 2022-06-28 The Irish writer Deirdre Madden has written hand key novels about the Northern Irish Troubles and about contemporary Ireland In these works she weighs up the aftermath of violence and the impact of the shift to a more open but materialist society in the country overall Memory trauma and the abiding but elusive links between the past and the present are central concerns of her fiction. This pioneering set of essays by leading experts in Irish Studies explores the many dimensions of her novels from a wide variety of perspectives Madden s skill at interweaving novels of ideas with artist novels that draw out the complex inner predicaments of her characters is highlighted States of dislocation are concentrated on in her texts but also the quest for a home in the world and a lasting set of values that allows for personal integrity and authenticity These multifaceted explorations bear out the compelling and enduring aspects of Madden's highly regarded novels Harun Farocki Thomas Elsaesser, 2004 Filmmaker film essayist

installation artist writer the Berlin artist Harun Farocki has devoted his life to the power of images Over the thirty plus years of his career Farocki has explored not the images of life but rather the life of images that surrounds us in newspapers cinema books television and advertising Harun Farocki examines from different critical perspectives his vast oeuvre which includes three feature films critical media pieces children's television features learning films in the tradition of Brecht and installation pieces Interviews a selection of Farocki s own writings and an annotated filmography complete a valuable biography of this pioneering artist and his legendary career The Program Era Mark McGurl, 2011-11-30 McGurl offers a fundamental reinterpretation of postwar American fiction asserting that it can be properly understood only in relation to the rise of mass higher education and the creative writing program The Program Era will be at the center of debates about postwar literature and culture for years to come Wastepaper Modernism Joseph Elkanah Rosenberg, 2021 Wastepaper Modernism traces how 20th century writers imagined the fate of paper at the dawn of a new media age Book Destruction from the Medieval to the Contemporary G. Partington, A. Smyth, 2014-09-09 This rich and varied collection of essays by scholars and interviews with artists approaches the fraught topic of book destruction from a new angle setting out an alternative history of the cutting burning pulping defacing and tearing of books from the medieval period to our own age Networks Jonathan H. Grossman, 2012-03-01 The same week in February 1836 that Charles Dickens was hired to write his first novel The Pickwick Papers the first railway line in London opened Charles Dickens s Networks explores the rise of the global high speed passenger transport network in the nineteenth century and the indelible impact it made on Dickens s work The advent first of stage coaches then of railways and transoceanic steam ships made unprecedented round trip journeys across once seemingly far distances seem ordinary and systematic Time itself was changed The Victorians overran the separate local times kept in each town establishing instead the synchronized standard time which now ticks on our clocks Jonathan Grossman examines the history of public transport s systematic networking of people and how this revolutionized perceptions of time space and community and how the art form of the novel played a special role in synthesizing and understanding it all Focusing on a trio of road novels by Charles Dickens he looks first at a key historical moment in the networked community s coming together then at a subsequent recognition of its tragic limits and finally at the construction of a revised view that expressed the precarious limited omniscient perspective by which passengers came to imagine their Telegraphic Realism Richard Menke, 2008 Telegraphic Realism demonstrates the connections journeying in the network between British nineteenth century fiction media technologies and developing ideas about information from the postage Crime Culture Bran Nicol, Eugene McNulty, Patricia Pulham, 2010-11-03 By broadening the focus stamp to wireless beyond classic English detective fiction the American hard boiled crime novel and the gangster movie Crime Culture breathes new life into staple themes of crime fiction and cinema Leading international scholars from the fields of literary and cultural studies analyze a range of literature and film from neglected examples of film noir and true crime crime fiction by

female African American writers to reality TV recent films such as Elephant Collateral and The Departed and contemporary fiction by I G Ballard Kazuo Ishiguro and Margaret Atwood They offer groundbreaking interpretations of new elements such as the mythology of the hitman technology and the image and the cultural impact of senseless murders and reveal why crime is a powerful way of making sense of the broader concerns shaping modern culture and society Letters, Postcards, Email Esther Milne, 2012-02-27 In this original study Milne moves between close readings of letters postcards and emails and investigations of the material technological infrastructures of these forms to answer the question How does presence function as an aesthetic and rhetorical strategy within networked communication practices As her work reveals the relation between old and new communication systems is more complex than allowed in much contemporary media theory Although the correspondents of letters postcards and emails are not usually present to one another as they write and read their exchanges this does not necessarily inhibit affective communication Indeed this study demonstrates how physical absence may in some instances provide correspondents with intense intimacy and a spiritual almost telepathic sense of the other s presence While corresponding by letter postcard or email readers construe an imaginary incorporeal body for their correspondents that in turn reworks their interlocutor's self presentation. In this regard the fantasy of presence reveals a key paradox of cultural communication namely that material signifiers can be used to produce the experience of incorporeal Bootstrapping Thierry Bardini, 2000-12-01 Bootstrapping analyzes the genesis of personal computing from both presence technological and social perspectives through a close study of the pathbreaking work of one researcher Douglas Engelbart In his lab at the Stanford Research Institute in the 1960s Engelbart along with a small team of researchers developed some of the cornerstones of personal computing as we know it including the mouse the windowed user interface and hypertext Today all these technologies are well known even taken for granted but the assumptions and motivations behind their invention are not Bootstrapping establishes Douglas Engelbart's contribution through a detailed history of both the material and the symbolic constitution of his system's human computer interface in the context of the computer research community in the United States in the 1960s and 1970s Engelbart felt that the complexity of many of the world's problems was becoming overwhelming and the time for solving these problems was becoming shorter and shorter What was needed he determined was a system that would augment human intelligence co transforming or co evolving both humans and the machines they use He sought a systematic way to think and organize this coevolution in an effort to discover a path on which a radical technological improvement could lead to a radical improvement in how to make people work effectively What was involved in Engelbart's project was not just the invention of a computerized system that would enable humans acting together to manage complexity but the invention of a new kind of human the user What he ultimately envisioned was a bootstrapping process by which those who actually invented the hardware and software of this new system would simultaneously reinvent the human in a new form The book also offers a careful narrative of the collapse of Engelbart's laboratory at Stanford Research Institute

and the further translation of Engelbart's vision It shows that Engelbart's ultimate goal of coevolution came to be translated in terms of technological progress and human adaptation to supposedly user friendly technologies At a time of the massive diffusion of the World Wide Web Bootstrapping recalls the early experiments and original ideals that led to today s This Is Enlightenment Clifford Siskin, William Warner, 2010-06-15 Debates about the nature of information revolution the Enlightenment date to the eighteenth century when Imanual Kant himself addressed the guestion What is Enlightenment The contributors to this ambitious book offer a paradigm shifting answer to that now famous guery Enlightenment is an event in the history of mediation Enlightenment they argue needs to be engaged within the newly broad sense of mediation introduced here not only oral visual written and printed media but everything that intervenes enables supplements or is simply in between With essays addressing infrastructure and genres associational practices and protocols this volume establishes mediation as the condition of possibility for enlightenment In so doing it not only answers Kant's query it also poses its own broader question how would foregrounding mediation change the kinds and areas of inquiry in our own epoch This Is Enlightenment is a landmark volume with the polemical force and archival depth to start a conversation that extends across the disciplines that the Enlightenment itself first configured Novel Sounds Florence Dore, 2018-06-12 The 1950s witnessed both the birth of both rock and roll and the creation of Southern literature as we know it Around the time that Chuck Berry and Elvis Presley put their electric spin on Southern vernacular ballads a canonical group of white American authors native to rock s birthplace began to write fiction about the electrification of those ballads translating into literary form key cultural changes that gave rise to the infectious music coming out of their region In Novel Sounds Florence Dore tells the story of how these forms of expression became intertwined and shows how Southern writers turned to rock music and its technologies tape radio vinyl to develop the rock novel Dore considers the work of Southern writers like William Faulkner Flannery O Connor and William Styron alongside the music of Bessie Smith Lead Belly and Bob Dylan to uncover deep historical links between rock and Southern literature Along with rock pioneers Southern authors drew from blues country jazz and other forms to create a new brand of realism that redefined the Southern vernacular as global electric and notably white Resurrecting this Southern literary tradition at the birth of rock Dore clarifies the surprising but unmistakable influence of rock and roll on the American novel Along the way she explains how literature came to resemble rock and roll an anti institutional art form if there ever was one at the very moment academics claimed literature for the institution Law and Disciplinarity R. Beck, 2016-06-10 Traditional legal borders are increasingly contested in the present day This book explores the nature implications and future of legal borders geographic and intellectual in the twenty first century s dramatically changing global context Epistolarity in a Post-Letter World Sindija Franzetti, 2024-11-18 The study intervenes in a field hitherto dominated by formal and historical analyses of the literary letter Across the five case studies the method of reading epistolarity as a motif is applied to a selection of American novels published after 1990 Nick Bantock s

Griffin Lish and Dunn test the limitations of letters for conveying individual experience to a distant other Robinson and Erdrich envision epistolarity as an address to a future Exploring the employment of epistolarity as a motif the study offers an interpretation of the messages these fictions extend for readers in a post letter world Communication technologies and practices may change but epistolarity as a motif a reprise of a scene of encounter that depends on keeping a distance between addresser and addressee remains a deeply compelling site of inquiry in twenty first century literature Official World Mark Seltzer, 2016-03-31 In his virtuosic new book noted cultural critic Mark Seltzer shows how suspense as art form and form of life depicts and shapes the social systems that organize our modern world Modernity's predicament Seltzer writes is a society so hungry for reality that it cannot stop describing itself and that makes for a world that continuously establishes itself by staging its own conditions Employing the social theories of Georg Simmel Erving Goffman Niklas Luhmann and Peter Sloterdijk Seltzer shows how suspense novels films and performance art by Patricia Highsmith Tom McCarthy Cormac McCarthy J G Ballard Karl Ove Knausgaard and others outline how we currently live and reveal the stress points and mood systems of the modern epoch In its focus on social games depictions of violent and explosive persons along with its cast of artists reporters detectives and others who observe and report and reenact the suspense mode creates and recreates modern systems of action and autonomy and defines the self turned world's practices and aesthetics By epitomizing a reflexive self legislating and autonomous world a suspense art with humans in the systems epoch provides the models and sets the rules for our modern official world Feminist Perspectives on Contract Law Linda Mulcahy, Sally Wheeler, 2017-01-27 The law of contract is ripe for feminist analysis Despite increasing calls for the re conceptualisation of neo classical ways of thinking feminist perspectives on contract tend to be marginalised in mainstream textbooks This edited collection questions the assumptions made in such works and the ideologies that underpin them drawing attention to the ways in which the law of contract has facilitated the virtual exclusion of women the feminine and the private sphere from legal discourse Contributors to this volume offer a range of ways of thinking about the subject and cover topics such as the feminine offeree feminist perspectives on contracts in cyberspace the forgotten world of women and contracts restitution and feminist economic theory the gendered power dynamics of undue influence and the feminisation of dispute resolution
