The Silicon Valley Edge Marguerite Gong Hancock, Chong-Moon Lee, William F. Miller, Henry S. Rowen, 2022 The enormous and sustained success of Silicon Valley has excited interest around the globe Startup companies the world over are attempting to emulate its high tech businesses and many governments are changing their institutions in order to foster Silicon Valleys of their own What accounts for the Valley's leading edge in innovation and entrepreneurship This book gives an answer by insiders by prominent business leaders and academics from the heart of the Valley They argue that what distinguishes the Valley is not its scientific advances or technological breakthroughs Instead its edge derives from a habitat or environment that is tuned to turn ideas into products and take them rapidly to market by creating new firms This habitat includes supportive government regulations for new firm formation leading research universities that interact with industry an exceptionally talented and highly mobile work force and experienced support services in such areas as finance law

accounting headhunting and marketing all specializing in helping new companies form and grow Not least is a spirit of adventure and a willingness to take risks The elements of this habitat are packed into a small geographic area In it networks of specialists form communities of practice within which ideas develop and circulate and from which new products and new firms emerge Feedback processes are strongly at work the successes of Valley firms strengthen the habitat and the stronger it becomes the more new successful firms are created Among industries electronics came into the Valley first followed by semiconductors computers software and in the 1990s biotechnology networking and the Internet This extraordinary ability to keep adding new industrial sectors itself affects the prospect for the Silicon Valley's future What lies ahead From within the Valley faces serious challenges in defining a new generation of entrepreneurs addressing a growing digital divide and maintaining quality of life At the same time the Valley must redefine its global role with respect to other rising innovative regions worldwide Nevertheless the proven ability of its highly effective habitat suggests that in both innovation and entrepreneurship Silicon Valley will maintain its edge
