*Critical Company Law* Lorraine Talbot,2007-08-03 Dr Talbot traces the history of the fundamental principles of English company law including the doctrine of separate corporate personality director s duties minority protection and the doctrine of ultra vires from both a black letter and contextual perspective Relevant aspects of the Companies Act 2006 are thoroughly examined Drawing on the influence of American law and scholarship the book considers the ideas which have informed corporate governance in England It includes a case study of mutual building societies march to the market and corporate identity The hybrid approach adopted in the text provides a contextual and critical framework in which to understand company law as well as a broad picture in black letter law terms The aim is to invigorate what many students and academics consider a dry subject by uncovering the social factors which continue to inform this area of law and the political nature of the law itself Dr Talbot maintains that modern company law is shaped by three main factors economics ideology and existing law The state of the law at any one time is determined by the constantly shifting relationship between these factors

**Intermediate Quantities** Philip Peterson,2020-07-24 This title was first published in 2000 Intermediate quantifiers express logical quantities which fall between Aristotle s two quantities of categorical propositions universal and particular Few many and most express the most commonly referred to intermediate quantifiers but this book argues that an infinite number can be understood through a deeper examination of the logical nature of all intermediate quantifiers Presenting and

analyzing the logical and linguistic features of intermediate quantifiers in a fashion typical of traditional logic Philip L Peterson presents an account integrating the logic and semantics of intermediate quantifiers with the two traditional quantities by traditional methods Having introduced the basic idea of how to approach the task in the first chapter with heavy emphasis on the linguistic meanings and ordinary uses of English intermediate quantifier expressions Peterson then undertakes the task of completely integrating the three basic intermediate quantities into traditional logic in the following chapter

Fellow Creatures Christine M. Korsgaard, 2018-06-18 Christine M Korsgaard presents a compelling new view of humans moral relationships to the other animals She defends the claim that we are obligated to treat all sentient beings as what Kant called ends in themselves Drawing on a theory of the good derived from Aristotle she offers an explanation of why animals are the sorts of beings for whom things can be good or bad She then turns to Kant's argument for the value of humanity to show that rationality commits us to claiming the standing of ends in ourselves in two senses Kant argued that as autonomous beings we claim to be ends in ourselves when we claim the standing to make laws for ourselves and each other Korsgaard argues that as beings who have a good we also claim to be ends in ourselves when we take the things that are good for us to be good absolutely and so worthy of pursuit The first claim commits us to joining with other autonomous beings in relations of moral reciprocity The second claim commits us to treating the good of every sentient creature as something of absolute importance Korsgaard argues that human beings are not more important than the other animals that our moral nature does not make us superior to the other animals and that our unique capacities do not make us better off than the other animals She criticizes the marginal cases argument and advances a new view of moral standing as attaching to the atemporal subjects of lives She criticizes Kant's own view that our duties to animals are indirect and offers a non utilitarian account of the relation between pleasure and the good She also addresses a number of directly practical questions whether we have the right to eat animals experiment on them make them work for us and fight in our wars and keep them as pets and how to understand the wrong that we do when we cause a species to go extinct
