**Religion and the Order of Nature** Seyyed Hossein Nasr, 1996-09-26 The current ecological crisis is a matter of urgent global concern with solutions being sought on many fronts In this book Seyyed Hossein Nasr argues that the devastation of our world has been exacerbated if not actually caused by the reductionist view of nature that has been advanced by modern secular science What is needed he believes is the recovery of the truth to which the great enduring religions all attest namely that nature is sacred Nasr traces the historical process through which Western civilization moved away from the idea of nature as sacred and embraced a world view which sees humans as alienated from nature and nature itself as a machine to be dominated and manipulated by humans His goal is to negate the totalitarian claims of modern science and to re open the way to the religious view of the order of nature developed over centuries in the cosmologies and sacred sciences of the great traditions Each tradition Nasr shows has a wealth of knowledge and experience concerning the order of nature The resuscitation of this knowledge he argues would allow religions all over the globe to enrich each other and cooperate to heal the wounds inflicted upon the Earth

**Earth at Risk** Donald B. Conroy, Rodney L. Petersen, 2000-04 No Marketing Blurb

Environmental Solidarity Pablo Martínez de Anguita, 2012-05-23 The past few decades have seen the beginnings of a convergence between religions and ecological movements The environmental crisis has called the religions of the world to respond by finding their voice within the larger Earth community At the same time a certain religiosity has started to emerge in some areas of secular ecological thinking Beyond mere religious utilitarianism rooted in an understanding of the deepest connections between human beings their worldviews and nature itself this book tries to show how religious believers can look at the world through the eyes of faith and find a broader paradigm to sustain sustainability proposing a model for transposing this paradigm into practice so as to develop long term sustainable solutions that can be tested against reality

**Nature and the Environment in Contemporary Religious Contexts** Thomas Donlin-Smith, Muhammad Shafiq, 2018-06-11 This collection of essays discusses the human relationship with and responsibilities toward the natural environment from the perspective of religions and the social sciences The chapters examine a variety of conditions that have contributed to the contemporary environmental crisis including abuse of power economic greed industrialization deforestation and unplanned waste management They then discuss concepts from several different religious texts and traditions that promote environmental protection as a sacred moral duty for all humanity Religious concepts such as dharma duty toward Mother Earth tikkun Olam repair of the world khalifa people as deputies of God on earth amanah the universe as a trust in human hands and paticca samuppada dependent co arising are employed to argue that all the components of the biosphere are integral to the cosmos each piece with its own value and role in the harmony of the whole The book makes it clear that religions can become more green and play a helpful role in raising our ecological consciousness and supporting preservation of the environment into the future
