Religion And Medicine:

Religion and Medicine Jeff Levin, 2020-04-15 Though the current political climate might lead one to suspect that religion and medicine make for uncomfortable bedfellows the two institutions have a long history of alliance From religious healers and religious hospitals to religiously informed bioethics and research studies on the impact of religious and spiritual beliefs on physical and mental well being religion and medicine have encountered one another from antiquity through the present day In *Religion and Medicine* Dr Jeff Levin outlines this longstanding history and the multifaceted interconnections between these two institutions The first book to cover the full breadth of this subject it documents religion medicine alliances across religious traditions throughout the world and over the course of history Levin summarizes a wide range of material in the most comprehensive introduction to this emerging field of scholarship to date *Religion and Medicine in the Middle Ages* Peter Biller, Joseph Ziegler, 2001 Medicine and religion were intertwined in the middle ages here are studies of specific instances The sheer extent of crossover medics as religious men religious men as medics medical language at the service of preaching and moral theological language deployed in medical writings is the driving force behind these studies The book reflects the extraordinary advances which pure history of medicine has made in the last twenty years there is medicine at the levels of midwife and village practitioner the sweep of the learned Greek and Latin tradition of over a millennium there is control of midwifery by the priest therapy through liturgy medicine as an expression of religious life for heretics medicine invading theologians discussion of earthly paradise and so on Professor PETER BILLER is Senior Lecturer in History at the University of York Dr JOSEPH ZIEGLER teaches in the Department of History at the University of Haifa Contributors JOSEPH ZIEGLER PEREGRINE HORDEN KATHRYNTAGLIA JESSALYN BIRD PETER BILLER DANIELLE JACQUART MICHAEL McVAUGH MAAIKE VAN DER LUGT WILLIAM COURTENAY VIVIAN NUTTON **Prescribing Faith** Claire Badaracco, 2007 Looks at the relationship between medicine religion and mass media in the United States **Blind Faith** Richard P. Sloan, 2006-10-31 Taking on faith healers this hard hitting book by a Columbia University professor looks at the dangers to society when medicine turns to religion *Religion in Medicine Volume I* John B. Dawson, 2011-12-20 The purpose of this treatise is 1 to draw attention to the presence of situations arising within medical practice in which religious beliefs play an important role 2 to emphasize the fact that most students and many doctors are given insufficient training in such matters which are of considerable import to a fair percentage of the public 3 to provide a few examples of what is meant by a religio medical situation and a bibliography for further exploration by the initiate in such matters The stimulus to think along these lines stemmed from the examples set me by my erstwhile chiefs Sir James Patterson Ross Professor Sir E F Scowen and Sir Stanley Davidson Further encouragement came while I was in Edinburgh from the Reverend Dr H C Whitley of St Giles and his brother counterparts Msgr Quill and the Reverend A Brysh White In Australia Bishop E H Burgmann of Canberra gave me the benefit of his legendary experience and passed me on to Father Michael Scott of Newman College

Professor D McCaughey of Ormond College and Mr Ben Gurewicz in Melbourne The Reverend Granger Westberg of the Lutheran ministry in the United States infused his enthusiasm into the venture and this with an intellectual commentary from Professor B Hamnett of the State University of New York along with the constructive critique volunteered by members of the local Baha i community tidied up many loose ends In respect to the actual page by page construction I must mention my wife and Professor G Bolton of the University of Western Australia who turned my thoughts into reality My gratitude to these and many other people of distinction and industry can never be satisfactorily expressed I hope they will accept my efforts to interpret or to pass on their humane counsel as part payment

Modern Medicine - The New World Religion Olivier Clerc, 2004 Put forth in this book is the assertion that medicine is actually ruled by a set of beliefs myths and rites of Christianity it has never freed itself from Supporting this claim are discussions about the ways in which physicians have taken the place of priests vaccination plays the same role as baptism the search for health has replaced the quest for salvation and the hope of physical immortality cloning and genetic engineering takes priority over eternal life This book argues that the medical establishment has become the government's ally as the Catholic Church has in the past Charlatans are prosecuted today as heretics were in the past and dogmatism rules out promising medical theories It contends that only by becoming aware of how religious beliefs and primitive fears unconsciously influence one's relationships with medicine can people start walking on the path of freedom personal responsibility and individual sovereignty Religion and Medicine no. 1, 1908 **Religion and Illness** Annette Weissenrieder, Gregor Etzelmüller, 2016 What are the relevant conceptualities and terminologies marking the coupling of religion and medical interpretations of illness in different religions such as Judaism Islam Buddhism and Christianity How do religious orientations influence courses of a disease How do experiences of illness change images of the divine in late modernity This collection of essays from a symposium held at the International Research Institute of the University of Heidelberg examines connections between religious and medical interpretations of illness in different cultures in order to suggest criteria for coupling religion and medicine in ways that enhance rather than diminish life By discerning which relationships between religion and medicine appear to be beneficial and which harmful the book as a whole proposes criteria that are not limited to a single scientific approach cultural tradition or time period such as the present The book has four parts which deal with Islamic medicine Chinese medicine and the relationship between religion and medicine in both Jewish and Christian traditions All chapters cover from antiquity to the present Finally a cross disciplinary scholarly compendium on religion and illness in a breathtakingly rich selection of texts contexts and topics Invaluable as a resource for all interested in a more integrative approach towards medicine at the intersection of health and the holy body and spirit healing and theology Brigitte Kahl Professor of New Testament Union Theological Seminary New York Illness is a pressing topic of today and of the past too This book gives valuable insights into different religions and their ways of interpreting and coping with illness The contributors write in a hermeneutic reflecting and transdisciplinary way so they research understandings of illness

transcending the limits of the scientific worldview Christian Grethlein Faculty of Protestant Theology University of Munster Weissenrieder and Etzelmuller tell us about the concept of illness ancient and modern to be sure But more than that they and their contributors tell us how to think about our body Actually if we are our body then they aid us in thinking about our self A must for the serious student of historical and self understanding Ted Peters Distinguished Research Professor Emeritus of Theology and Ethics Pacific Lutheran Theological Seminary and the Graduate Theological Union Annette Weissenrieder is Professor of New Testament at San Francisco Theological Seminary and the Graduate Theological Union She is author of Images of Illness in the Gospel of Luke Insights of Ancient Medical Texts 2003 Gregor Etzelmuller is Professor of Systematic Theology at Osnabruck University Germany He is author of Was geschieht beim Gottesdienst 2014

Medicine and Religion in Enlightenment Europe Andrew Cunningham, 2017-03-02 The Enlightenment period here understood as covering the years 1650 to 1789 is usually considered to be a period when religion was obliged to give way to rationality With respect to medicine this means that the religious elements in the treatment and interpretation of diseases to all intents and purposes disappeared However there are growing indications in recent scholarship that this may well be an overstatement Indeed it appears that religion retained many of its customary relations with medicine This volume explores how far and the ways in which this was still the case It looks at this multi faceted relationship with respect to among others medical care and death in hospitals religious vocation and nursing chemical medicine and religion the clergy and medicine the continued significance of popular medicine faith healing dissection and religion and religious dissent and medical innovation Within these significant areas the volume provides a European perspective which will make it possible to draw comparisons and determine differences
