**Religious Liberty in Transitional Societies** John Anderson, 2003-08-14 It is commonly assumed that the issue of religion declines in political significance as societies modernise However the upheaval associated with the shift from authoritarian to more open regimes can be accompanied by a revitalisation of religion Individuals within these societies are struggling to find meaning in the seeming chaos of political change religious elites are seeking to define their own role within the new order and political elites are looking for new ways of ensuring legitimacy and building national unity In this book John Anderson constructs a theoretical framework where he compares and contrasts the politics of religious liberty in two Southern European countries two Central Eastern European countries and the evolution of the former USSR particularly Russia Exploring these issues of religious recognition and religious diversity Anderson attempts to expose the wider problem of creating a democratic mentality in such transitional societies through extensive original research and interviews

**Asian Cities in an Era of Decentralisation** Michelle Ann

Miller, Tim Bunnell, 2016-03-16 This book critically engages with the idea of decentralization as empowering cities and their residents to act innovatively and creatively. The contributions thus highlight how the term empowerment in the context of decentralization regimes masks a competing array of intentions and agendas. Who and what are empowered given a voice and allowed to participate via the processes and structures of decentralization and to what ends are too frequently assumed in normative conversations about bringing government closer to the people and community driven development. Creating an illusion of a shared language and common set of priorities therefore obscures more complex realities particularly when there is a disconnect between the official goals of decentralization and civil society aspirations that reinforces politics of exclusion at the grassroots. Equally official processes of decentralization can and often are accompanied by less visible processes of recentralization through the reassertion of central state control over putatively autonomous jurisdictions. Through studies in six Asian countries India the Philippines Indonesia Bangladesh Thailand and Japan the essays in this book examine cases whereby a range of urban actors and institutions have been empowered via decentralization and how this realignment of local power relations impacts upon the dynamics of urban governance albeit not always in socially progressive ways. This book was published as a special issue of Space and Polity.
