## Saar Struggle:

*The Saar Struggle* Michael T. Florinsky, 1934 This book deals with a question which is of primary importance in the political and economic history of post war post First World War Europe It describes the birth of the new state at the Peace Conference of Versailles and follows its development under the international government up to the autumn of 1934 The peculiar and complicated economic history of this tormented region is set up against the background of the Franco German conflict Dr Florinsky describes fully the labor conditions in the Saar Basin which present some unusual features and are largely responsible for whatever degree of success the international government has achieved The struggle for the Saar has entered into a new phase with the establishment of the Hitler regime in Germany and the approach of the plebiscite which in January 1935 is to decide the future of the territory The nature and character of this struggle are described by Dr Florinsky from personal observations He spent the summer of 1934 in the Saar Basin and had ample opportunities of discussing the situation with the members of the international government leaders of the political parties representatives of religious organizations industry trade unions as well as the rank and file of the people The book examines the probable economic and political consequences of the alternative solutions of the plebiscite from the point of view of the Saar Franco German relations and the peace of Europe and the world

**Prologue to Annihilation** Stephen H. Norwood, 2021-08-03 American and British appeasement of Nazism during the early years of the Third Reich went far beyond territorial concessions In *Prologue to Annihilation* Ordinary American and British Jews Challenge the Third Reich Stephen H Norwood examines the numerous ways that the two nations official position of tacit acceptance of Jewish persecution enabled the policies that ultimately led to the Final Solution and how Nazi annihilationist intentions were clearly discernible even during the earliest years of Hitler's rule Further Norwood looks at the nature and impact of American and British Jewish resistance to Nazi persecution and the efforts of Jews at the grassroots level to press Jewish organizations to respond more forcefully to the Nazi menace He examines the worldwide protest and boycott movements against Germany and German goods as well as mass demonstrations by working class and lower middle class Jews in many American and British cities *Prologue to Annihilation* details how the events of 1930 1936 tested American and British societies willingness to accept Nazism and its anti Jewish philosophy and illuminates the divisions that existed even within the Jewish community about how best to challenge Nazi antisemitic policies and atrocities

*Statehood and the Law of Self-Determination* David Raic, 2002-09-01 Although most international lawyers assumed that the distribution of the land surface of the earth between States was more or less final after the end of decolonization recent practice has disproved this assumption Eritrea separated from Ethiopia and new States were created out of the former Soviet Union the former Yugoslavia and the former Czechoslovakia There is no reason to believe that these events form the end of the creation of new States Numerous communities within existing States claim a right to full separate statehood on the basis of their entitlement to an alleged right to self determination

However in most cases the international community rejected such claims to statehood even if the territorial entity satisfied the traditional criteria for statehood On the other hand in other cases including some of those mentioned above the international community acknowledged the statehood of entities which clearly failed to meet these criteria In the light of the above mentioned developments this book examines the modern law of statehood and in particular the role of the law of self determination in the process of the formation of States in international law The study shows that the law of statehood has changed considerably since the establishment of the United Nations It is argued that the law of self determination is particularly relevant for explaining the international community's position regarding the general recognition or the general denial of statehood of different territorial entities under contemporary international law Weimar in Exile Jean-Michel Palmier, 2017-01-31 In 1933 thousands of intellectuals artists writers militants and other opponents of the Nazi regime fled Germany They were in the words of Heinrich Mann the best of Germany refusing to remain citizens in this new state that legalized terror and brutality Exiled across the world they continued the fight against Nazism in prose poetry painting architecture film and theater *Weimar in Exile* follows these lives from the rise of national socialism to their return to a ruined homeland retracing their stories struggles setbacks and rare victories The dignity in exile of Walter Benjamin Ernst Bloch Bertolt Brecht Alfred Döblin Hanns Eisler Heinrich Mann Thomas Mann Anna Seghers Ernst Toller Stefan Zweig and many others provides a counterpoint to the story of Germany under the Nazis *Antifascist Humanism and the Politics of Cultural Renewal in Germany* Andreas Agocs, 2017-07-14 A study of German traditions of cultural renewal from their origins in antifascist activism in German exile communities in Europe and Latin America during World War II to their failure during the emerging Cold War in occupied Germany and the early German Democratic Republic **History vs. Apologetics** David Cymet, 2012-07-10 Set within the context of the political and ideological developments of the time *History vs Apologetics* examines the role played by the Catholic Church in the rise and consolidation of the Third Reich and in particular with regard to the Nazi persecution of the Jews Distanced in the beginning the Catholic Church and the Nazi party drew closer as Hitler's popularity increased At the ratification of the Concordat in Rome a commitment not to interfere with the Nazis Final Solution to the Jewish Question was traded for a verbal promise from Berlin to exclude the baptized converts While the Nazi government violated the Concordat at every turn the Church kept zealously its promise Pope Pius XII never mentioned the persecuted Jews by name and denied any knowledge of the annihilation of the Jews Even after the war Pius XII refused to condemn anti-Semitism and Germany's role in the Holocaust Instead the Vatican engaged in the protection of genocide perpetrators and assisted in their mass escape David Cymet's comprehensive critical analysis of the polemical literature on the topic makes it possible to separate legitimate history from apologetic allegations and misrepresentations bringing to light key elements of Church policy that is intentionally misinterpreted by apologists By surveying the Church's policy from just before the rise of Nazism to the present Cymet demonstrates how the Nazis were able to turn the Catholic Church into their

ally in their war against the Jews      *Bibliography of European Economic and Social History* Derek Howard Aldcroft, Richard Rodger, 1993 This bibliographical guide contains 10 000 references to the economic and social history of 30 European countries during the period 1700 1939 More than 3000 periodicals have been consulted to obtain references as well as books edited collections and conference proceedings The information is listed in categories such as industry agriculture finance migration labour conditions urban communities and organizations Full publication details are included so that references may be located easily      *Opinion; a Journal of Jewish Life and Letters* , 1933      *Hearings* United States. Gold, 2023-06-08 35th Modern Language Association Prize for Contingent Faculty and Independent Scholars Honorable Mention *The Collaborative Artist's Book* offers a rare glimpse into collaborations between poets and painters from 1945 to the present and highlights how the artist's book became a critical form for experimental American artists in the twentieth and twenty first centuries Alexandra Gold provides a broad overview of the artist's book form and the many ongoing debates and challenges from the disciplinary to the institutional that these forms continue to pose Gold presents five case studies and details not only how each individual collaboration came to be but how all five together engage and challenge conventional ideals about art subjectivity poetry and interpersonal relations as well as complex social questions related to gender and race Taking several of these books out of special

collections libraries and museum archives and making them available to a broad readership Gold brings to light a whole genre that has been largely forgotten or neglected

**The Unmaking of Adolf Hitler** Eugene Davidson, 2004 The Unmaking of Adolf Hitler which includes dozens of photos from German collections covers literally every aspect of Hitler's life from his success after he came to power in 1933 to his self destruction Renowned author Eugene Davidson describes in detail Hitler's stratagems in reviving morale and undoing the inequitable treaties imposed on Germany after World War I and his shrewd moves to take advantage of the fatal miscalculations of the coalition that had been aligned against the Reich Once Hitler had brutally improved Germany's desperate state there followed mortal errors and fateful mistakes of judgment arising from his own inadequacies Compelling well researched and eminently readable The Unmaking of Adolf Hitler strives to explain how and why Hitler's empire collapsed from his own actions Available only in the USA and Canada
