archaeology of art at a disadvantage as an understanding of iconography and meaning requires a detailed knowledge of historical or ethnographic context unavailable to many archaeologists Rather than playing to archaeology s weaknesses the authors argue that an archaeology of art should instead play to archaeology s strength the material character of archaeological evidence Using case studies examining rock art figurines beadwork murals coffin decorations sculpture and architecture from Europe the Americas Asia Australia and north Africa the authors develop an understanding of the affective and effective nature of ancient art and imagery An analysis of a series of material based practices from gesture and improvisation to miniaturisation and gigantism assembly and disassembly and the use of distinctions in colour enable key concepts such as style and meaning to be re imagined as affective practices Recasting the archaeology of art as the study of affects offers a new prospectus for the study of ancient art and imagery **The Encyclopedia Americana** Grolier Educational Staff,2001-04
