Coexistence in Later Sixteenth-Century Augsburg Sean Dunwoody,2022-09-19 In an age characterized by religious conflict Protestant and Catholic Augsburgers remained largely at peace How did they do this This book argues that the answer is in the emotional practices Augsburgers learned and enacted in the home in marketplaces and other sites of civic interaction in the council house and in church Augsburg's continued peace depended on how Augsburgers felt as neighbors as citizens and believers and how they negotiated the countervailing demands of these commitments Drawing on police records municipal correspondence private memoranda internal administrative documents and other records revealing everyday behavior experience and thought Sean Dunwoody shows how Augsburgers negotiated the often conflicting feelings of being a good believer and being a good citizen and neighbor *Urban Religion* Jörg Rüpke,2020-02-24 So far religion has been seen as cause for dramatic developments in the history of cities it has contributed to the monumentalisation of centres and or has given importance to ex centric places Very recently anthropologists have been discovering religion in the contemporary global city But still awaiting historical investigation is the specific urban character of religious ideas practices and institutions and the role of urban space shaping this very religion in the course of history The time span from the Hellenistic age to Late Antiquity was crucial in the establishment of concepts and institutions of religion and witnessed extended waves of urbanisation Rome being central to this In addressing this problem this book fills a significant gap in the scholarship on urban religion across time Taking seriously the proposition that space is condition medium and outcome of social relations the development of urban religion in lived urban space and urban culture or urbanity offers a lens onto processes of religious change that have been neglected for the history of religion and for the study of urbanism The key thesis is that city space engineered the major changes that revolutionised religions This stimulating book makes use of archaeology and history to address religion as an essential component of urban life in both the past and the present With a strong basis in the ancient Mediterranean as well as an insightful view of modern urban life R pke emphasizes that the practice and performance of religion at the everyday level is as essential in the creation of an urban ethos as the grand temples and institutions promulgated by the elite Monica L Smith author of *Cities The First 6 000 Years* J rg R pke offers a characteristically original and learned series of reflections on some of the many ways in which the history of religions and the history of cities might be entangled *Urban Religion* offers no single overarching thesis but it is consistently thought provoking and suggests many intriguing lines of investigation for the future Greg Woolf Institute of Classical Studies London
