(1868-1952),1925 *Learning Empire* Erik Grimmer-Solem,2019-09-26 The First World War marked the end point of a

process of German globalization that began in the 1870s *Learning Empire* looks at German worldwide entanglements to recast how we interpret German imperialism the origins of the First World War and the rise of Nazism **A Handful of**

Prayers Peter Lilly,2024-09-26 *A Handful of Prayers* is a collection of politically engaged and theologically searching poems that bring together provocations and reflections from a broad set of important and revolutionary thinkers often overlooked within the Christian subcultures These are poems of change challenge and unity that seek to explore and imagine hope life and honest community in a world of isolation *The Converging World* John Pontin,2010-03-04 THE CONVERGING WORLD

tells the incredible story of one community s attempt to change their world for the better Faced with the challenge of making the English village of Chew Magna a zero waste society Pontin developed a groundbreaking non profit scheme that twinned them with Tamil Nadu a poor rural community in southern India He helped set up a system of wind turbines for Tamil Nadu that would not only reduce the community s reliance on fossil fuels but also provided a local source of sustainable income The carbon credits produced through this scheme were then sold in Chew Magna to individuals and businesses to offset emissions they cannot yet reduce all part of a larger local zero waste effort The effects of this scheme have been dramatic and exhilarating while Chew Magna gets closer to zero waste Tamil Nadu s carbon emissions and poverty levels are diminishing accordingly Pontin s story presents a model of action for any individual or community concerned about climate change environmental damage social inequality and the plight of the third world The Selected Works of Arne Naess Arne Naess,2007-11-17 Arne Naess is considered one of the most important philosophers of the twentieth century He has been a tremendously prolific author yet his works as a whole have remained largely unavailable until now Springer made available for the first time a definitive 10 volume collection of Arne Naess s life s works *The Selected Works of Arne Naess* The

Selected Works of Arne Naess SWAN presents a major overview of Arne Naess's thinking and provides an extensive collection of this prolific philosopher's principal writings. Some of Naess's most important publications have never before been available in English. Many others are out of print. Often his papers were published in obscure and inaccessible journals. And because Naess has been so prolific, many of his most important papers still remain unpublished. The publication of SWAN makes Naess's work more fully accessible to scholars, students, and critics alike. *An Evolutionary Leap* Colin Stanley, 2018-03-26. When the existential philosopher Colin Wilson died in December 2013, it was suggested by one perceptive obituary writer that despite the seemingly diverse subject matter of his books, his true legacy lay in the field of Consciousness Studies. This is particularly apparent when studying his many essays and books on psychology and taking into consideration his close association with the celebrated American psychologist Abraham Maslow, whose concept of Peak Experiences (PEs) became for Wilson an important link to experiencing enhanced consciousness. Maslow, however, felt that PEs could not be induced at will. Wilson thought otherwise and through his work sought to encourage his readers and students to live more vital and appreciative lives, thereby paving the way toward an evolutionary leap for mankind in consciousness, indeed a change in consciousness that would potentially change everything. In this study, Colin Stanley, Wilson's bibliographer and author of *Colin Wilson's Outsider Cycle: A Guide for Students* and *Colin Wilson's Occult Trilogy: A Guide for Students*, provides an illuminating essay on each of Wilson's nine major books on psychology. [Register of the University of California](#) University of California (1868-1952), 1927. **The Politics of Nature** Andrew Dobson, Paul Lucardie, 2002-11. A balanced and comprehensive survey of current green political ideas, their varying responses to fundamental problems in political theory, and their relationships with other ideological traditions. **Cultivating an Ecological Conscience** Frederick L. Kirschenmann, 2010-04-14. Theologian, academic, and third-generation organic farmer, Frederick L. Kirschenmann is a celebrated agricultural thinker. In the last thirty years, he has tirelessly promoted the principles of sustainability and has become a legend in his own right. *Cultivating an Ecological Conscience: Essays from a Farmer Philosopher* documents Kirschenmann's evolution and his lifelong contributions to the new agrarianism in a collection of his greatest writings on farming philosophy and sustainability. Working closely with agricultural economist and editor Constance L. Falk, Kirschenmann recounts his intellectual and spiritual journey. In a unique blend of personal history, philosophical discourse, spiritual ruminations, and practical advice, Kirschenmann interweaves his insights with discussion of contemporary agrarian topics. This collection serves as an invaluable resource to agrarian scholars and introduces readers to an agricultural pioneer whose work has profoundly influenced modern thinking about food. **Water Stewardship** Pernille Ingildsen, 2020-06-15. Achieving true wholesome sustainability requires a change of heart. Hence, this book starts in the heart. It asks the timely question of how do we become true water stewards? The transformation to a new sustainable practice will be made through a new connection with our heart, a more holistic type of analysis, brains, and the right actions based on personal integrity and hand.

A water steward should be similar to the shepherds of olden days They were given the responsibility to guard the sheep The village trusted they would take care of the flock make sure it would be well fed protected from storms and kept together The shepherd learned to take a long term perspective for the flock ensuring that the pastures were not overgrazed that the flock was not led too far away from access to water and that shelter was in reach in the event of storms and dangerous predators Over time the shepherds became increasingly skilled in caring for the flock They integrated the responsibility of the well being of the flock into their identity In a similar way we can take the responsibility for human water consumption and our interaction with the natural world We need to understand and work according to the big picture and the very long term perspective Being a water steward requires deep reflection of how water should be treated and our relationship with water Water utility professionals have the knowledge and have been trusted with the role of managing human water consumption This is a great responsibility and requires deep reflection of how this should be done The book will present ideas and concepts for the new role as well as questions for personal reflection

The Energy of Slaves Andrew Nikiforuk, 2012-08-17 A robustly researched and smoothly written overview of the many challenges confronting our devotion to fossil fuels from the author of Tar Sands Quill Quire Ancient civilizations relied on shackled human muscle It took the energy of slaves to plant crops clothe emperors and build cities Nineteenth century slaveholders viewed critics as hostilely as oil companies and governments now regard environmentalists Yet the abolition movement had an invisible ally coal and oil As the world s most versatile workers fossil fuels replenished slavery s ranks with combustion engines and other labor saving tools Since then cheap oil has transformed politics economics science agriculture and even our concept of happiness Many North Americans today live as extravagantly as Caribbean plantation owners We feel entitled to surplus energy and rationalize inequality even barbarity to get it But endless growth is an illusion In this provocative book Andrew Nikiforuk winner of the Rachel Carson Environment Book Award argues that what we need is a radical emancipation movement that ends our master and slave approach to energy We must learn to use energy on a moral just and truly human scale Published in Partnership with the David Suzuki Institute In his cautionary tale about the evils of oil Nikiforuk makes his case for impending doom if we don t mend our energy spending ways The Star In this cogently argued book Andrew Nikiforuk deploys a powerful metaphor Oil dependency he writes is a modern form of slavery

and it s time for a global abolition movement Taras Grescoe author of Shanghai Grand A startling critique that should rouse us from our pipe dream of endless plenty Ronald Wright author of On Fiji Islands *Utopia Drive* Erik Reece,2024-09-04 For Erik Reece life at last was good he was newly married gainfully employed living in a creekside cabin in his beloved Kentucky woods It sounded as he describes it like a country song with a happy ending And yet he was still haunted by a sense that the world or more specifically his country could be better He couldn t ignore his conviction that in fact the good ol USA was in the midst of great social environmental and political crises that for the first time in our history we were being swept into a future that had no future Where did we here in the land of Jeffersonian optimism and better tomorrows go wrong Rather than despair Reece turned to those who had dared to imagine radically different futures for America What followed was a giant road trip and research adventure through the sites of America s utopian communities both historical and contemporary known and unknown successful and catastrophic What he uncovered was not just a series of lost histories and broken visionaries but also a continuing and vital but hidden idealistic tradition in American intellectual history *Utopia Drive* is an important and definitive reconstruction of that tradition It is also perhaps a new framework to help us find a genuinely sustainable way forward an engaging exploration and example of the fruitful tunnel visions of dreamers turned doers Publishers Weekly *Cows Save the Planet* Judith D. Schwartz,2013-04-22 Explains soil s role in ecology and the economy and reveals how treating soil in an environmentally sensitive way can bring about positive changes with respect to climate change biodiversity loss obesity and other crises **Children, Bereavement and Trauma** Paul Barnard,Julie Nagy,Ian Morland,1999 The recognition of children s natural resilience as fundamental to their ability to cope with trauma is central to this book Deriving from the authors experience of working with bereaved children the book promotes the idea of healthy coping and explores ways in which children and their families can be enabled to do this Technology Choice Kelvin W Willoughby,2019-07-09 This book attempts to provide a theoretical framework for answering difficult questions evoked by the concept of technology choice primarily by conducting a review of the Appropriate Technology movement and its ideas and experiments
