Barr, 2018-12-13 Singapore gained independence in 1965 a city state in a world of nation states Yet its long and complex history reaches much farther back Blending modernity and tradition ideologies and ethnicities a peculiar set of factors make Singapore what it is today In this thematic study of the island nation Michael D Barr proposes a new approach to understand this development From the pre colonial period through to the modern day he traces the idea the politics and the geography of Singapore over five centuries of rich history In doing so he rejects the official narrative of the so called Singapore Story Drawing on in depth archival work and oral histories Singapore A Modern History is a work both for students of the country's history and politics but also for any reader seeking to engage with this enigmatic and vastly successful nation *The Oxford Companion to Politics of the World* Joel Krieger, 2001-08-02 The world has seen dramatic changes since the publication of the first edition of The Oxford Companion to Politics of the World in 1993 In the post Cold War world globalization now offers wealth and opportunities on a broader scale as well as greater international harmony but threatens to reinforce the

Best Of Times, The Worst Of Times, The: Maritime Security In The Asia-Pacific Joshua Ho, Catherine Zara Raymond, 2005-08-08 This authoritative book brings together in a single volume international experts renowned in their specializations to discuss issues and current trends relating to maritime security It looks at the issue of maritime security in the Asia Pacific through a three step approach Firstly it surveys both the global maritime outlook and the outlook in each of the regions of Northeast Asia Southeast Asia and South Asia From these regional perspectives trends in commercial shipping and force modernization and issues like the weapons proliferation and maritime terrorism are discussed After looking at the maritime environment the specific challenges that the maritime community faces are examined These challenges include

maritime boundary and territorial disputes in the South China Sea the force modernization of three Northeast Asian navies and the spectre of maritime terrorism The volume concludes by looking at some new initiatives for maritime cooperation a survey of maritime regime building and the legal and political implications of the proliferation security initiative *The Politics of Southeast Asia's New Media* William Atkins, 2002 Demonstrates that the challenge to authoritarian regimes anticipated by modern theorists as a result of the globalization of news and information is not materializing Instead state control is continuing in new subtler forms *Encyclopedia of Library and Information Science* Allen Kent, Harold Lancour, Jay E. Daily, 1979-08-01 The Encyclopedia of Library and Information Science provides an outstanding resource in 33 published volumes with 2 helpful indexes This thorough reference set written by 1300 eminent international experts offers librarians information computer scientists bibliographers documentalists systems analysts and students convenient access to the techniques and tools of both library and information science Impeccably researched cross referenced alphabetized by subject and generously illustrated the Encyclopedia of Library and Information Science integrates the essential theoretical and practical information accumulating in this rapidly growing field **Asianism and the Politics of Regional Consciousness in Singapore** Leong Yew, 2013-11-20 Over the last two decades Singapore has undergone a substantial degree of Asianization Apart from participating in the Asian values debate of the 1990s re visioning itself as New Asia and a global Asian hub and establishing Asian identities for the commodities it consumes and produces Singapore has also repurposed its modernity cultures and ethos along similar regionalist precepts However even in recent times Singapore continues to vacillate ambivalently between identifying with and differentiating itself from Asia Responding to the challenges Singapore faces in coming to terms with its Asian identity this book examines the complex cultural social and political underpinnings that have shaped Singapore's mainstream discourse on Asia Indeed it argues that its legacy as a colonial port city the exigencies of managing the post independence nation state and the larger forces of imperialism and capitalism all contribute to its politics of Asianism Taking a thoroughly interdisciplinary approach that spans history cultural studies postcolonialism and cultural geography Leong Yew reveals how Asia has been used to narrate Singapore's beginnings revalidate Singaporean ethnic culture and to consolidate its practices of consumption and commodification This book will be welcomed by students and scholars working across a range of fields including Asian culture and society Asian politics cultural theory and postcolonial studies *The Politics of Failed Policies* Sarah James, 2025-07-18 The Politics of Failed Policies examines the darker side of state autonomy and policy experimentation in our federal system policy failure While advances in statistics and computing promised the ability to evaluate the outcomes of state policies more precisely and accurately the path from information to responsive policy remains far from guaranteed especially given our highly polarized political climate Most of the existing scholarship focuses on individual characteristics that affect public officials likelihood of internalizing new information and refining their policy preferences In stark contrast author Sarah James takes a historical

institutionalist approach and shows that the design resources and processes of state level research institutions can systematically influence when evidence can overcome confirmation bias and partisan preferences among elected state officials evaluating a policy This work contributes a more precise definition of a state's capacity for research that better explains political responses to policy failure The detailed case studies support a theory of policy feedback in which policy and institutional landscape can empower diffusely organized and disadvantaged policy opponents to overcome the power of the traditional winners in the American political economy The Politics of Failed Policies takes seriously that policy research and learning are not isolated from the caprices of party politics and yet I show that state politics and policymaking are not irrevocably beholden to the whims of partisan bickering While ideological battles pressure from well resourced interest groups and yes even elections remain formidable forces in American politics strategically designed state policies and institutions can lay a foundation for building a coalition to respond to actual policy outcomes Choices about policy and institutional design have long term effects on when how and why public officials feel pressured to acknowledge and respond to policy failure

Popular Discontent Steven E. Schier, Todd E. Eberly, 2013-07-18 Popular distrust and the entrenchment of government by professionals lie at the root of America's most pressing political problems How did U S politics get to this point Contemporary American politics got much of its shape from the transformations brought about from the 1950s to the 1980s Presidential and congressional behavior voting behavior public opinion public policy and federalism were all reconfigured during that time and many of those changes persist to this day and structure the political environment in the early twenty first century Throughout American history parties have been a reliable instrument for translating majority preferences into

public policy From the 1950s to the 1980s a gradual antiparty realignment alongside the growth of professional government produced a new American political system of remarkable durability and remarkable dysfunction It is a system that is paradoxically stable despite witnessing frequent shifts in party control of the institutions of government at the state and national level Schier and Eberly's system level view of American politics demonstrates the disconnect between an increasingly polarized and partisan elite and an increasingly disaffected mass public

Mathematics Curriculum in Pacific Rim Countries - China, Japan, Korea, and Singapore Zalman Usiskin, Edwin Willmore, 2008-09-01 This volume contains the proceedings of the First International Curriculum Conference sponsored by the Center for the Study of Mathematics Curriculum CSMC The CSMC is one of the National Science Foundation Centers for Learning and Teaching Award No ESI 0333879 The countries China Japan Korea and Singapore in alphabetical order which also happens to be the order of their populations have each been in the news because of their performance on international tests and or their economic performance and potential They also have centralized education ministries that create a single mathematics curriculum framework followed in the entire country In all these countries curricula are differentiated for students with different interests usually around Grade 10 or 11 We think the reader will agree that the papers are of very high quality befitting the standing of the individuals who were invited but particularly notable for our international speakers because in three of these countries English is not the speaker's first language Following each paper we have included a short biography of the author's so that the reader can understand the perspective of the paper's author

The Rule of Law in Singapore Li-ann Thio, 2025-01-09 This book examines the operation of the rule of law in the non liberal democracy of Singapore The rule of law in Singapore has been both lauded for anchoring efficient and effective government and lambasted for being procedural and statist 21st century Singapore has experienced modest political liberalisation manifesting a paternal democracy where the governor governed relationship is evolving from a father knows best paternalistic mindset to a more consultative approach to governance where dialogue rather than dictat is the norm in a post deferential era The Singapore case study helps pluralise the rule of law as a universal principle which moderates power and may be variously implemented The book examines the reception of the rule of law within the Singapore legal order and how it interacts with constitutional principles like the separation of powers and democracy in the design of constitutional institutions and forging of structural and rights oriented judicial review It considers how the rule of law contoured by legal communitarianism sustains a managed democracy in relation to legislation governing internal security public assemblies religious harmony and online falsehoods It questions whether the chilling of political speech by strict laws on political defamation and contempt of court has been significantly defrosted by important developments which seek ordered liberty through a more calibrated form of review Lucid and engaging this book will be of interest to researchers working in constitutional law
