

A THEORETICAL CONTEXT FOR SHAME

WARREN KINSTON, LONDON

Shame, till now the 'Cinderella of the unpleasant emotions' (Rycroft, 1968), deserves a central role in psychoanalytic theory alongside anxiety and guilt. An examination of the literature together with clinical and theoretical studies of my own has led me to define shame (the concept) as the signal, affective and cognitive, that a move from 'self-narcissism' to 'object-narcissism' is imminent (Kinston, 1980, 1982). The details of the shame experience and the penumbra of related experiences (e.g. inferiority, failure, guilt, aggression) will be described in the course of a brief critical review of the literature. These experiences will be shown to lock into the concept as defined above; further implications, phenomenological and theoretical, will be examined by using the associated theory of narcissism.

A full consistent account of shame must not only link the many clinical psychoanalytic observations, but also much written by others. Psychoanalysts have noted such features of shame as its links with self-exposure and fear of rejection, its connexions with sexuality and its absence in perversion, its relation to blushing and wishes to hide and the phenomenon of shame propensity. Other crucial features of shame are emphasized by non-psychoanalytic authors and these should either be understood within a psychoanalytic model or be purposefully and coherently excluded. For example, the Bible viewed the acceptance of shame as the ultimate in commitment; Shakespeare referred to shame far more often than to guilt and associated it with truth and honour rather than with inferiority or wrong doing; Nietzsche linked shame to loss of individuality and volition.

As will be evident in the literature review to follow, psychoanalytic authors have mainly ignored the need to bring order to apparently disparate clinical and non-clinical observations. Only Lichtenstein (1963) has attempted to assimilate the work of writers outside psychoanalysis. Psychoanalysts have tended to use the

term 'shame' much as it appears in their clinical material and have often confusingly linked it to another term, as in 'shame and guilt' or 'shame and inferiority feelings'.

Shame has perspectives, on the one hand so intensely personal and on the other so broadly social, that it has proved elusive for theoreticians focused on mental mechanisms. This double perspective is less clear in English which has one word for shame, than in languages such as German and French which have two words. 'Shame' does have two antonymic forms in English which correspond to the two meanings and it is possibly an example of the antithetical meaning of primary words (Freud, 1910).

The origins of the word 'shame' are obscure but scholars believe it derives from the Teutonic root (*s*)kem meaning 'to cover oneself' (Oxford English Dictionary). The two meanings which have come down to us are as follows:

Shame-unshamed (German: *Scham*, French: *Pudeur*) refers to modesty, chastity, shyness, bashfulness. In Biblical usage it refers to genitals. The emphasis in this meaning is on inner personal experience.

Shame-shameless (German: *Schande*; French: *Honte*) refers to disgrace, scandal, criminality (cf. seeds of shame). The emphasis in this meaning is on social customs and standards.

When Freud spoke of shame as being an important force stemming from the sexual drives, he used *Scham*. There are no references to *Schande* in the index of the '*Gesammelte Werke*'. However in his belief that the preservation of culture and civilized society depended mainly on hypocrisy (rather than guilt or moral standards) he was talking about *Schande* (Freud, 1915).

Aidos, the Greek Goddess of Shame, denoted both sexual shame and the genitals, and as she was the source of dignity, decency and good manners, shame was linked with reverence, respect and piety. Her companion was Dike (Justice, Natural Law) or Nemesis (Due Enactment). Hesiod prophesied that Aidos and Dike/

Tennent, 2009-05-26 Thinking more globally about the formation of theology enriches our understanding of what it means to be a Christian It s no secret that the center of Christianity has shifted from the West to the global South and East While the truths of the Christian faith are universal different contexts and cultures illuminate new questions understandings and expressions What does this mean for theology as Western theologians understand it Timothy Tennent argues that the Christian faith is culturally and theologically translatable Theology in the Context of World Christianity is written to expand our ecclesiastical cartography by highlighting within each of the major themes of systematic theology studies that are engaging the global church such as Anthropology with studies drawn from the different views of human identity between Eastern and Western cultures Christology with a focus on the emphases that African Christians place on the characteristics of Christ Pneumatology by looking at the role of the Holy Spirit in Latin American Pentecostalism Eschatology by focusing on how this branch of theology shapes world missions and evangelism Each of the ten chapters examines traditional theological categories in conversation with theologians from across the globe making this volume valuable for students pastors missionaries and theologians alike Theological reflection is active and exciting in the majority world church and Tennent invites you to your own reflection and celebration of Christ s global church These are perspectives that should be heard considered and brought into conversation with Western theologians Global theology can make us aware of our own blind spots and biases and has much to offer toward the revitalization of Western Christianity **Handbook of Sociological Theory** Jonathan H. Turner, 2006-05-17 Sociology is experiencing what can only be described as hyperdifferentiation of theories there are now many approaches competing for attention in the intellectual arena From this perspective we should see a weeding out of theories to a small number but this is not likely to occur because each of the many theoretical perspectives has a resource base of adherents As a result theories in sociology do not compete head on with each other as much as they coexist This seminal reference work was brought together with an eye to capturing the diversity of theoretical activity in sociology specifically the forefront of theory Contributors describe what they themselves are doing right now rather than what others have done in the past The goal of this volume is to allow prominent theorists working in a variety of traditions who wouldn t usually come together to review their work The chapters in this volume represent a mix of theoretical orientations and strategies but these these theories are diverse and represent the prominent theoretical discussions in sociology today Some areas included are Section I Theoretical Methodologies and Strategies Section II The Cultural Turn in Sociological Theorizing Section III Theorizing Interaction Processes Section IV Theorizing from the Systemic and Macrolevel Section V New Directions in Evolutionary Theorizing Section VI Theorizing on Power Conflict and Change Section VII Theorizing from Assumptions of Rationality This handbook will be of interest to those

wanting a broad spectrum and overview of late 20th early 21st century sociological theory **Pastoral Care in Context**

John Patton, 2005-02-18 An expert in the field of pastoral care John Patton demonstrates that pastoral care is a ministry of the church He focuses on the community of faith as an authorizer and source of care and upon the relationship between the pastor and a caring community Patton identifies and compares three paradigms of pastoral care the classical the clinical pastoral and the communal contextual This third paradigm emphasizes the caring community and the various contexts for care rather than focusing on pastoral care as the work of the ordained pastor Introducing the Cultural Context of the Old

Self-Evaluation Anita Konzelmann Ziv,Keith Lehrer,Hans Bernhard Schmid,2011-06-25 The book contains contributions by leading figures in philosophy of mind and action emotion theory and phenomenology As the focus of the volume is truly innovative we expect the book to sell well to both philosophers and scholars from neighboring fields such as social and cognitive science The predominant view in analytic philosophy is that an ability for self evaluation is constitutive for agency and intentionality Until now the debate is limited in two possibly mutually related ways Firstly self evaluation is usually discussed in individual terms and as such not sufficiently related to its social dimensions secondly self evaluation is viewed as a matter of belief and desire neglecting its affective and emotional aspects The aim of the book is to fill these research lacunas and to investigate the question of how these two shortcomings of the received views are related

Goffman Unbound! Thomas J. Scheff,Bernard S Phillips,Harold Kincaid,2015-11-17 Thomas Scheff demonstrates why Goffman remains such a key figure for social scientists Goffman may have been cautious about recognizing the role of emotions in social life but Scheff boldly and creatively shows why the sociological and the psychological are necessarily intertwined This is certainly a book for all serious analysts of social behaviour Michael Billig Nottingham University Scheff s critical eye is equal to his subject shrewdly appreciating Goffman s many virtues while also showing where and how Goffman s thinking needs revision and development This original and provocative book offers a fresh interpretation of Goffman and will become a benchmark for all subsequent commentary Greg Smith University of Salford One

of the seminal sociologists of the twentieth century Erving Goffman revolutionized our understanding of the microworld of emotions and relationships We all live in this world every day of our lives yet it is virtually invisible to us Goffman's genius was to recognize and describe this world as no one had before The book synthesizes prior scholarly commentary on Goffman's work and includes biographical material from his life untangling some of the many puzzles in Goffman's work and life Scheff also proposes ways of filling gaps and false starts One chapter explores the meaning of the emotion of love another of hatred These and other new directions could facilitate the creation of a microsocial science that unveils the emotional relational world

Bloody Revenge Thomas J. Scheff, 2019-03-11 As violence erupts in endless cycles and old grievances reemerge throughout the world we are challenged to examine the underpinnings of protracted conflict In this bold new work Thomas Scheff argues that the roots of protracted conflict lie in unacknowledged feelings of shame and rage Scheff builds from the assumption that the social bond is a real and palpable phenomena and that in every type of human contact the bond is either built maintained repaired or damaged He then demonstrates how damaged bonds are the basic cause of conflict When one side or the other in a dispute is humiliated or threatened in such a way as to disturb fundamental bonds the feelings that follow are often not acknowledged Threats to the social bond give rise to violent emotions shame and rage Unless these feelings are resolved the stage is then set for cycles of insult humiliation and bloody revenge According to Scheff it is by recognizing the emotional source of conflict and repairing the broken social bond that both sides achieve cognitive and emotional understanding allowing them to trust and cooperate and perceive themselves as all in the same boat Thus secure social bonds ensure clear boundaries even during competition or conflict that help keep wars limited and make disagreements productive
