Shared Vulnerability The Media And American Perceptions Of The Bhopal Disaster:

Shared Vulnerability Lee Wilkins, 1987-04-21 This book chronicles the American media's coverage of the 1984 chemical spill in Bhopal India and its aftermath in the US. It explains how the press reported about Bhopal and examines journalism's subsequent influence on public perceptions about technological safety. It is an excellent addition to university collections in science writing, journalism criticism, and mass media research and should be useful to undergraduates at all levels. Choice. More than two years after the Bhopal disaster, fatalities and illnesses in this central Indian city continue to be reported by US media. Litigation involving Union Carbide still makes the front page. In this new book, Professor Wilkins offers a unique case study of news accounts of the worst industrial accident in history, combining a detailed review of media coverage with an analysis of public reaction to those reports.

Vulnerability and Security in Human Rights Literature and Visual Culture Alexandra Schultheis Moore, 2015-10-23 This book responds to the failures of human rights the way its institutions and norms reproduce geopolitical imbalances and social exclusions through an analysis of how literary and visual culture can make visible human rights claims that are foreclosed in official discourses. Moore draws on theories of vulnerability, precarity, and dispossession to argue for the necessity of recognizing the embodied and material contexts of human rights subjects. At the same time, she demonstrates how these theories run the risk of reproducing the structural imbalances that lie at the core of critiques of human rights. Pairing conventional human rights genres—legal instruments, human rights reports, reportage, and humanitarian campaigns—with literary and visual culture, Moore develops a transnational feminist reading praxis of five sites of rights and their violation over the past fifty years: UN human rights instruments and child soldiers in Nigerian literature; human rights reporting and novels that address state-sponsored ethnocide in Zimbabwe; the international humanitarian campaigns and disaster capitalism in fiction of Bhopal India; the work of M. decins Sans Frontières in the Sahel; Afghanistan, Democratic Republic of Congo, and Burma as represented in various media campaigns and in photographic narratives; and finally, the human rights campaigns, fiction, and film that have brought Indonesia's history of anti-leftist violence into contemporary public debate. These case studies underscore how human rights norms are always subject to conditions of imaginative representation and how literature and visual culture participate in that cultural imaginary. Expanding feminist theories of embodied and imposed vulnerability, Moore demonstrates the importance of situating human rights violations not only in the context of neo-liberal development policies but also in relation to the growth of security networks that serve the nation-state, often at the expense of the security of specific subjects and populations. In place of conventional victims and agents, the intersection of vulnerability and human rights opens up readings of human rights claims and suffering that are at once embodied and shareable yet which run the risk of cooptation by security rhetoric.

Advocacy after Bhopal Kim Fortun, 2009-05-04 The 1984 explosion of the Union Carbide chemical plant in Bhopal India was undisputedly one of the world's worst industrial disasters. Some have argued that the resulting litigation provided an innovative model for dealing

with the global distribution of technological risk others consider the disaster a turning point in environmental legislation still others argue that Bhopal is what globalization looks like on the ground Kim Fortun explores these claims by focusing on the dynamics and paradoxes of advocacy in competing power domains She moves from hospitals in India to meetings with lawyers corporate executives and environmental justice activists in the United States to show how the disaster and its effects remain with us Spiraling outward from the victims stories the innovative narrative sheds light on the way advocacy works within a complex global system calling into question conventional notions of responsibility and ethical conduct Revealing the hopes and frustrations of advocacy this moving work also counters the tendency to think of Bhopal as an isolated incident that can't happen here

The Great Flood Of 1993 Stanley Changnon, 2019-07-11 The flood that affected a third of the United States during the summer of 1993

was the nation's worst ranking as a once in 300 years event. It severely tested national state and local systems for managing natural resources and for handling emergencies illuminating both the strengths and weaknesses in existing methods of preparing for and dealing with massive prolonged flooding. Through detailed case studies this volume diagnoses the social and economic impacts of the disaster assessing how resource managers flood forecasters public institutions the private sector and millions of volunteers responded to it. The first comprehensive evaluation of the 1993 flood this book examines the way in which floods are forecast and monitored the effectiveness of existing recovery processes and how the nation manages its floodplains. The volume concludes with recommendations for the future in hope of better preparing the country for the next flood or other comparable disaster.

Contaminated Communities Michael Edelstein, 2018-10-08 In this wholly revised second edition Michael Edelstein draws on his thirty years as a community activist to provide a much expanded theoretical foundation for understanding the psychosocial impacts of toxic contamination. Informed by social psychological theory and an extensive survey of documented cases of toxic exposure and enlivened by excerpts drawn from more than one thousand interviews with victims *Contaminated Communities Second Edition* presents a candid portrayal of the toxic victim's experience and the key stages in the course of toxic disaster. The second edition introduces dozens of new cases and provides expanded considerations of environmental justice environmental racism environmental turbulence and environmental stigma as well as a fully articulated theory of lifescape. The new edition moves past the well charted role of reactive environmentalism to explore issues for a proactivist approach that employs a third path of social learning sustainable innovation consensus building and community empowerment.

Applied Risk Communication Within the Corps of Engineers Clifford S. Russell, Kevin O'Grady, Kevin T. O'Grady, 1996

General Technical Report SE, 1991

Flirting with Disaster Sandra K. Schneider, 1995 *Flirting with Disaster* is the first thorough examination of government successes and failures in responding to natural disaster situations. The author contrasts the bureaucratic principles that dominate governmental activity with the disruptive effects of disaster and the forms of human behavior that emerge during disaster situations. By comparing case studies of Hurricane Hugo Hurricane Andrew the Loma Prieta earthquake and the 1990 floods in South Carolina the author is able to identify the factors that contribute to effective response to disasters and the conditions under which relatively minor crises may lead to system breakdown. The book looks at an extremely important but previously unexamined area of public administration and public policy presents a general theory of governmental performance in natural disaster situations identifies factors contributing to government success or failure in coping with disasters offers fresh insights into how the government can improve its response in disaster situations and integrates insights from emergency management studies agenda building research and the study of collective behavior.

Accountability and Corporate Human Rights Violations in Tort and International Law Emmanuel Nartey, 2021-10-04 This volume identifies a coherent legal principle in order to establish a novel duty of care for corporate human rights violations and

environmental damages It examines whether tort and civil law offer better accountability and remedies for victims of corporate human rights abuses and carries out an in depth and critical analysis of the concept of corporate accountability Moreover a fundamental part of this book is devoted to examining the extent to which international criminal law influences international human rights law in its use of tort law and civil law remedies Finally the book sets out a theoretical mechanism for duty of care as well as a proposal for the establishment of a Hybrid International Transnational Corporation Court that would have the potential to effectively interpret the concept of the corporate duty of care under tort law

Pesticides, A Love Story Michelle Mart, 2018-01-26 Presto No More Pests proclaimed a 1955 article introducing two new pesticides miracle workers for the housewife and back yard farmer Easy to use effective and safe who wouldn't love synthetic pesticides Apparently most Americans did and apparently still do Why in the face of dire warnings rising expense and declining effectiveness do we cling to our chemicals Michelle Mart wondered Her book a cultural history of pesticide use in postwar America offers an answer America's embrace of synthetic pesticides began when they burst on the scene during World War II and has held steady into the 21st century for example more than 90% of soybeans grown in the US in 2008 are Roundup Ready GMOs dependent upon generous use of the herbicide glyphosate to control weeds Mart investigates the attraction of pesticides with their up to the minute promise of modernity sophisticated technology and increased productivity in short their appeal to human dreams of controlling nature She also considers how they reinforced Cold War assumptions of Western economic and material superiority Though the publication of Rachel Carson's Silent Spring and the rise of environmentalism might have marked a turning point in Americans' faith in pesticides statistics tell a different story Pesticides a Love Story recounts the campaign against DDT that famously ensued but the book also shows where our notions of Silent Spring's revolutionary impact falter where in spite of a ban on DDT farm use of pesticides in the United States more than doubled in the thirty years after the book was published As a cultural survey of popular and political attitudes toward pesticides Pesticides a Love Story tries to make sense of this seeming paradox At heart it is an exploration of the story we tell ourselves about the costs and benefits of pesticides and how corporations government officials ordinary citizens and the press shape that story to reflect our ideals interests and emotions

Promoting Risk Robert A. Stallings, 1995-01-01 According to Stallings the earthquake threat has failed to achieve the status of a fully constructed social problem owing to the nature of the resources available to risk promoters and the strategy and tactics they have used to promote the risk of earthquakes The results of his examination of a partially constructed social problem will prove useful not only to those exploring the dynamics of the social problems process but also to those who study risk public policy making and environmental issues where risk is involved
