**China's Economic Development** Ming Lu, Zhao Chen, Yongqin Wang, Yan Zhang, Yuan Zhang, Changyuan Luo, 2013-01-01

Written by distinguished Chinese academics, this book provides a unique and rare insight into the development of the modern Chinese economy. The authors identify three major factors in the growth of the Chinese economy: economic decentralization and political centralization, the urban-rural divide and relational society. These are explored in depth via analyses of factors including urban and rural economic development and their political and social foundations, industrial agglomeration, transitions of public services and governmental responsibilities towards them, and developmental imbalances and mechanisms. It is illustrated that whilst contemporary China has obviously made great economic strides, a wide variety of problems are accumulating over time. The book concludes that following three decades of high economic growth, China now faces great challenges for sustainable growth and the institutions of China's economy have reached a critical point. Strategies for dealing with these challenges and requirements for the successful future development of China are thus prescribed. This fascinating book will provide a stimulating read for scholars, students and researchers in the fields of Asian studies, economics and development.

*Poverty and Inequality among Chinese Minorities* Ajit S. Bhalla, Shufang Qiu, 2024-11-01

The number of poor people in China is huge despite recent economic advances. The minorities in China constitute less than ten per cent of the entire population, yet they represent forty to fifty per cent of the absolute poor. This compelling book investigates the problem of poverty and inequality in and among Chinese ethnic minorities, focusing in particular on two important questions: Have the minorities shared the fruits of spectacular economic growth in China during the past two decades? Is their backwardness due to ethnic and cultural factors or to extremely low incomes? The authors examine the different factors explaining poverty, the relationship between poverty and ethnicity, poverty indicators that permit a comparison between minorities and non-minorities or the Han majority, economic and demographic characteristics of minorities, and their educational, occupational and gender profiles. They

consider whether special measures in favour of minorities introduced by the Chinese government have contributed to an improvement in their standard of living Poverty and Inequality among Chinese Minorities gives original research findings and new thinking on a highly topical issue in Chinese development economics and fills a gap in the existing economic literature
