Sharks Sharks Sharks:

The Secret Life of Sharks A. Peter Klimley, 2008-06-17 Marine biologist Pete Klimley swims with the sharks He was one of the first scientists to free dive among sharks and he has spent nearly thirty years studying shark behavior sometimes swimming in schools of several hundred sharks From his firsthand observations he has learned that sharks are not the vicious man eaters that we imagine but fascinating animals with complex behaviors Most people who think of sharks at all think immediately of great white sharks But there are more than four hundred species of shark Dr Klimley has studied several species most notably the great white and the hammerhead He describes the great white as the athlete among sharks and the hammerhead as the Ph D of the shark world In *The Secret Life of Sharks* Dr Klimley reveals the significant discoveries he made about hammerhead navigation and great white eating habits By studying hammerheads gathered around underwater seamounts Dr Klimley learned that hammerheads rely on sophisticated tracking of ocean floor magnetism to navigate His long term study of great white sharks off the California coast demonstrated that these huge sharks prefer to eat seals and sea lions because of the energy contained in their fatty bodies They are selective eaters not the man eaters we expect and they sometimes go weeks between meals But Dr Klimley did observe a ritualized behavior that great whites practice in order to avoid deadly disputes over prey that one shark has captured and another wants Although we have learned a great deal about shark behavior says Dr Klimley there is much that we do not know Unfortunately we are destroying these magnificent creatures of the deep through overfishing and degradation of the oceans Already some populations of sharks have declined steeply Vividly written by one of the foremost authorities on sharks *The Secret Life of Sharks* is a fascinating account of some of the world's most magnificent animals **Sharks, Rays, and Chimaeras of**

California David Ebert, 2003-05-08 Ebert has herein assembled an enormous body of knowledge about California's 43 shark species ranging from shark and human behavior to taxonomic minutiae along with up to date explanations of their ecology status and fisheries More importantly his Herculean effort includes the often overlooked 25 species of skates rays and chimaeras That along with the fine illustrations of Mat Squillante should answer any question that a student diver natural history buff or recreational or commercial fisher might ask John E McCosker coauthor of *Great White Shark* The timing of this publication is ideal given the status of some of California's elasmobranch populations and the need for a deeper understanding of their biology ecology and fishery management The book is a comprehensive treatment if one wants to find out the latest information on any species of shark or ray off California this is the place to go An outstanding work Gregor M Cailliet Professor Moss Landing Marine Laboratories and Director Pacific Shark Research Center *The Sharks of North American Waters* José Ignacio Castro, 1983 For many years brief encounters between sharks and humans could leave the latter with a vivid memory of the much maligned fish but no convenient means of identifying it more specifically With the publication of *The Sharks of North American Waters* in 1983 everyone from the experienced ichthyologist to the weekend
