

The background of the book cover is a close-up photograph of thistle plants. Several spherical, spiky thistle heads are visible, some in sharp focus and others blurred. Thin, green grass blades arch across the frame, creating a sense of depth and movement. The overall color palette is dominated by greens and the greyish-brown of the thistle heads.

 Steve Solomon,2006-01-30 Shows us how to garden like our ancestors gardened with just four basic hand tools and with little
 or no electricity or irrigation Carol Deppe author of The Resilient Gardener In hard times the family can be greatly helped by
 growing a highly productive food garden requiring little cash outlay or watering This book shows that any family with access
 to 3 5 000 sq ft of garden land can halve their food costs using a growing system requiring just the odd bucketful of
 household wastewater perhaps two hundred dollars worth of hand tools Gardening When It Counts helps readers rediscover
 traditional low input gardening methods to produce healthy food Currently popular intensive vegetable gardening methods
 are largely inappropriate to the new circumstances we find ourselves in Crowded raised beds require high inputs of water
 fertility and organic matter and demand large amounts of human time and effort Prior to the 1970s North American home
 food growing used more land with less labor with wider plant spacing with less or no irrigation and all done with sharp hand
 tools But these sustainable systems have been largely forgotten Designed for readers with no experience and applicable to
 most areas in the English speaking world except the tropics and hot deserts Gardening When It Counts is inspiring
 increasing numbers of North Americans to achieve some measure of backyard food self sufficiency Delightfully informative
 and abundantly rich with humor and grandfatherly wisdom A must read for anyone wanting a feast off the land of their own
